Earth Force Shemer Kuznits,2019-04-30 On the first day, a mist descended from the heavens blanketing Earth.On the second day, a cryptic message, 'Infusion commencing', appeared in the corner of everyone's eyes. On the third day, the sick were healed and the crippled walked again. On the fourth day, celebration and joy spread across the globe. And on the fifth day, the warping began...There was no warning. A mist descended from the sky, disabling all technology and causing a weird message to appear at the corner of everyone's eye. The situation grew even worse as animals and people started to warp, transforming into terrible monsters that prey on the livings. Within months, human civilization had crumbled. Unable to fight the seemingly-indestructible beasts, the survivors are reduced to cowering in reinforced shelters. Waiting for the end to come. Helpless. All seemed lost until a few brave souls discovered the secret of their new reality: the Tec and how to use it to level up. Together they represent humanity's last best hope for salvation. But they first must find the answers to the mystery of their new existence. Their journey will require them to quickly adapt to alien technology, operate strange spaceships, and even befriend an extra-terrestrial merchant with an Inferiority Complex.

Duped Abby Ellin, 2019-01-15 Abby Ellin was shocked to learn that her fiancé was leading a secret life. But as she soon discovered, the world is full of people who aren't what they seem. From Abby Ellin's first date with the Commander, she was caught up in a whirlwind. Within six months he'd proposed, and they'd moved in together. But soon, his exotic stories of international espionage began to unravel. Finally, it all became clear: he was lying about who he was. After leaving him and sharing her story, she was floored to find out that her experience was far from unique. People everywhere, many of them otherwise sharp-witted and self-aware, are being deceived by their loved ones every day. In *Duped*, Abby Ellin studies the art and science of lying, talks to people who've had their worlds upended by duplicitous partners, and writes with great openness about her own mistakes. These remarkable stories reveal how often we encounter people whose lives beneath the surface are more improbable than we ever imagined.

Information Hiding Fabien A. P. Petitcolas, 2003-07-01 These post-proceedings contain 27 papers that were accepted for presentation at the Fifth International Workshop on Information Hiding, held 7–9 October 2002, in Noordwijkerhout, The Netherlands. The papers were selected from 78 submissions on the basis of their scientific excellence and novelty by the program committee. We tried to have a balanced program covering several aspects of information hiding. The program committee was composed of Ross J. Anderson (University of Cambridge, UK), Jan Camenisch (IBM Zurich Research Laboratory, Switzerland), Ingemar J. Cox (NEC Research Institute, USA), John McHugh (SEI/CERT, USA), Ira S. Moskowitz (Naval Research Laboratory, USA), Job Oostveen (Philips Research, The Netherlands), Andreas Pfitzmann (Dresden University of Technology, Germany), Mike Reiter (Carnegie Mellon University, USA), and me. We all wish to thank all the authors of submissions for offering their papers for consideration. This year, contrary to the four previous workshops, the call for papers requested anonymous submissions. However, anonymity was not compulsory and we did accept some papers in which the identity of the authors was clear. Each submission was assigned to three members of the program committee. Papers submitted by program committee members were assigned to four reviewers. The program committee relied on the advice of outside colleagues. We also insisted that 12 of the 27 accepted papers should be revised according to the comments of the reviewers.

.NET Game Programming with DirectX 9.0 Alexandre Santos Lobao, Ellen Hatton, 2003-04-07 Written in easy-to-understand language, this book is a must-read if you'd like to create out-of-the-ordinary, yet simple games. Authors Alexandre Lobao and Ellen Hatton demonstrate the ease of producing multimedia games with Managed DirectX 9.0 and programming the games with Visual Basic .NET on the Everett version of Microsoft's Visual Studio. The authors emphasize simplicity, but still explore important concepts of Managed DirectX 9.0, such as Direct3D, DirectSound, DirectMusic (using the COM

interface), DirectInput (including force-feedback joysticks), DirectShow, and DirectPlay. Additional chapters discuss game programming technologies: Speech API for generating character voices, GDI+ for simple games, and multithreading. A bonus chapter even shows you how to port a simple game to a Pocket PC. The book includes two chapters' worth of sample games. The first presents a game with simple features; the second extends that game and presents additional concepts. A library of game programming helper classes is also created, step by step, in both chapters.
