Robert Ridgway

In a Class of Their Own Gary Ritchison,2023-11-06 With more than 10,000 species that vary in size, use diverse habitats that extend across latitudes and altitudes, consume a wide variety of food items, differ in how they fly (or not), communicate, and reproduce, and have different life histories, birds exhibit remarkable variation in form (anatomy) and function (physiology). Our understanding of how natural selection has generated this variation as birds evolved and as different species adapted to their unique circumstances has grown considerably in recent years. In *In a Class of Their Own: A Detailed Examination of Avian Forms and Functions*, this variation is explained in great detail, beginning with an overview of avian evolution and continuing with information about the structure and function of the avian skeleton, muscles, and the various body systems. Other chapters focus on avian locomotion (including flight), migration, navigation, communication, energy balance and thermoregulation, and various aspects of avian reproduction, such as nests and nest building, clutch sizes, and parental care. *In a Class of Their Own: A Detailed Examination of Avian Forms and Functions* will be must reading for anyone, professional or non-professional, who needs or wants to learn more about birds.

Soviet Fighters of the Second World War Jason Nicholas Moore,2021-07-30 The Red Air Force had just started to re-equip with modern monoplane fighters when the Germans opened Operation Barbarossa, the invasion of the Soviet Union. Hundreds of fighters were destroyed in the first few days, but many of these were obsolete biplanes. *Soviet Fighters of the Second World War* details fighter development from the dark days of Barbarossa to eventual triumph over Berlin. Starting with outdated aircraft such as the Polikarpov Po-2 biplane and monoplane fighters, the Soviets then settled on two main lines of development: the inline-engine LaGG-3 and its radial-engine derivatives, the La-5 and La-7, and the inline-engine Yakovlev fighters, which were produced in greater numbers than any other series of fighters. Not only are these aircraft accurately described, but experimental fighters are also dealt with. In addition, colour profiles illustrate these aircraft in terms of design, camouflage and markings. From the I-15bis biplane of the late 1930s to the superb La-7 and Yak-3 fighters of the last year of the war, all Red Air Force fighters are covered in this comprehensive volume.

Integrating Pain Treatment into Your Spine Practice Steven M. Falowski,Jason E. Pope,2016-04-08 This book fills the gap in knowledge and patient care by showing spine surgeons how to integrate pain management techniques into their practice. The first of its kind, *Integrating Pain Treatment into Your Spine Practice* is in tune with current efforts by major neurosurgical and neuromodulation societies and leading manufacturers of neuromodulation equipment to educate spine surgeons on the management of their patients' post-surgical pain. Designed as an all-in-one volume, this book explains how to identify candidates for pain treatment and when to refer them to specialists. It also presents "how-to" clinical information on approaches to managing pain, from the medical to the interventional and provides practical business guidance on coding and reinforcement.

Vagos, Mongols, and Outlaws Charles Falco,Kerrie Droban,2013-02-05 The basis for the hit TV series *Gangland Undercover!* The gripping account from an ex-con who went undercover to help the ATF infiltrate three of America's most violent biker gangs Despite lacking any experience with motorcycle gangs, Charles Falco infiltrated three of America's deadliest biker gangs: the Vagos, Mongols, and Outlaws. In separate investigations that spanned years and coasts, Falco risked his life, suffering a fractured neck and a severely torn shoulder, working deep under cover to bring violent sociopaths to justice. His dedication was profound; Falco spent almost three years infiltrating the Vagos gang and rose to second in command of the Victorville, California chapter. He even served

time in San Bernardino's Murder Unit and endured solitary confinement to protect his cover and the investigations. Falco recorded confessions of gangland-style killings and nearly became a target himself before he sought refuge in the Witness Protection Program. But discontent to remain on the sidelines and motivated by a strong sense of duty, Falco eventually left the Program and volunteer his talents again to infiltrate the Mongols and Outlaws, rising in rank to Vice President of the Petersburg, Virginia Outlaws chapter. His efforts culminated in sixty two arrests of members for various crimes, including assault and murder. Executing one of this country's most successful RICO prosecutions and effectively crippling the criminal enterprise, Falco's engrossing narrative of the dangers of the biker underworld harkens back to Hunter S. Thompson's classic Hell's Angels, vividly recounting a life undercover.

Authors, Factions, and Courts in Angevin England Fabrizio De Falco,2024-01-21 Authors, Factions, and Courts in Angevin England: A Literature of Personal Ambition (12th-13th Century) advances a model for historical study of courtly literature by foregrounding the personal aims, networks, and careers as the impetus for much of the period's literature. The book takes two authors as case studies – Gerald of Wales and Walter Map – to show how authors not only built their own stories but also used popular narratives and the tools of propaganda to achieve their own, personal goals. The purpose of this study is to overturn the top-down model of political patronage, in which patrons – and particularly royal patrons – set the cultural agenda and dictate literary tastes. Rather, Fabrizio De Falco argues that authors were often representative of many different interests expressed by local groups. To pursue those interests, they targeted specific political factions in the changeable political scenario of Angevin England. Their texts reveal a polycentric view of cultural production and its reception. The study aims to model a heuristic process which is applicable to other courtly texts besides the chosen case-studies.

Bird Conservation David R. Williams,Robert G. Pople,David A. Showler,Lynn V. Dicks,Matthew F. Child,Erasmus K.H.J. zu Ermgassen,William J. Sutherland,2013-03-01 This book brings together scientific evidence and experience relevant to the practical conservation of wild birds. The authors worked with an international group of bird experts and conservationists to develop a global list of interventions that could benefit wild birds. For each intervention, the book summarises studies captured by the Conservation Evidence project, where that intervention has been tested and its effects on birds quantified. The result is a thorough guide to what is known, or not known, about the effectiveness of bird conservation actions throughout the world. The preparation of this synopsis was funded by the Natural Environment Research Council and Arcadia.

The Falcon Thief Joshua Hammer,2021-02-16 A “well-written, engaging detective story” (Kirkus Reviews, starred review) about a rogue who trades in rare birds and their eggs—and the wildlife detective determined to stop him. On May 3, 2010, an Irish national named Jeffrey Lendrum was apprehended at Britain's Birmingham International Airport with a suspicious parcel strapped to his stomach. Inside were fourteen rare peregrine falcon eggs snatched from a remote cliffside in Wales. So begins a “vivid tale of obsession and international derring-do” (Publishers Weekly), following the parallel lives of a globe-trotting smuggler who spent two decades capturing endangered raptors worth millions of dollars as race champions—and Detective Andy McWilliam of the United Kingdom's National Wildlife Crime Unit, who's hell bent on protecting the world's birds of prey. “Masterfully constructed” (The New York Times) and

“entertaining and illuminating” (The Washington Post), The Falcon Thief will whisk you away from the volcanoes of Patagonia to Zimbabwe’s Matobo National Park, and from the frigid tundra near the Arctic Circle to luxurious aviaries in the deserts of Dubai, all in pursuit of a man who is reckless, arrogant, and gripped by a destructive compulsion to make the most beautiful creatures in nature his own. It’s a story that’s part true-crime narrative, part epic adventure—and wholly unputdownable until the very last page.
