*Subcreation: Fictional-World Construction from J.R.R. Tolkien to Terry Pratchett and Tad Williams*

Stefanie Schult, 2017-01-26 The doctoral thesis argues that the term Subcreation with its revised and broadened definition, in part differing from J.R.R. Tolkien's original term sub-creation, may be used for the discussion of the making of fictional worlds in literary discourse. The successful conception of a fictional world depends on the reader's willing suspension of disbelief. This depends both on the author and his skilled composition of the world and all its aspects, as well as on the reader's acceptance of this invented fictional world. The author needs to create a narrative with an inner consistency, which is crucial to achieving the effect of the reader's immersion in the fictional world. The fundamental aspects that an author needs to realize to achieve successful Subcreation have been structured into and analysed in four categories: Language and Linguistic Variation, Physiopoeia, Anthropoeia and Mythopoeia. Furthermore, this thesis shows that, as contemporary examples of fantastic literature, both Tad Williams's and Terry Pratchett's fictional worlds are successfully created through the realization of

these aspects of Subcreation. Apart from commenting on the success of the subcreative process, this thesis also remarks upon the cultural influences both authors include in their writings. While both may be considered Anglophone in a general categorization, Pratchett's Discworld retains a feeling of 'Britishness' that is not to be found in Williams's Otherland. The thesis proposes several approaches to Subcreation that may be studied subsequently. So, for example, it may be possible to determine the success of an author's Subcreation by collecting empirical data. Apart from literary works this field of studies may also include other media.

**Video Games Around the World** Mark J. P. Wolf, 2015-05-22 Thirty-nine essays explore the vast diversity of video game history and culture across all the world's continents. Video games have become a global industry, and their history spans dozens of national industries where foreign imports

compete with domestic productions, legitimate industry contends with piracy, and national identity faces the global marketplace. This volume describes video game history and culture across every continent, with essays covering areas as disparate and far-flung as Argentina and Thailand, Hungary and Indonesia, Iran and Ireland. Most of the essays are written by natives of the countries they discuss, many of them game designers and founders of game companies, offering distinctively firsthand perspectives. Some of these national histories appear for the first time in English, and some for the first time in any language. Readers will learn, for example, about the rapid growth of mobile games in Africa; how a meat-packing company held the rights to import the Atari VCS 2600 into Mexico; and how the Indonesian MMORPG Nusantara Online reflects that country's cultural history and folklore. Every country or region's unique conditions provide the context that shapes its national industry; for example, the long history of computer science in the United Kingdom and Scandinavia, the problems of piracy in China, the PC Bangs of South Korea, or the Dutch industry's emphasis on serious games. As these essays demonstrate, local innovation and diversification thrive alongside

productions and corporations with global aspirations. **Franz Liszt and His World** Christopher H. Gibbs, Dana Gooley, 2010-08-29 No nineteenth-century composer had more diverse ties to his contemporary world than Franz Liszt (1811-1886). At various points in his life he made his home in Vienna, Paris, Weimar, Rome, and Budapest. In his roles as keyboard virtuoso, conductor, master teacher, and abbé, he reinvented the concert experience, advanced a progressive agenda for symphonic and dramatic music, rethought the possibilities of

church music and the oratorio, and transmitted the foundations of modern pianism. The essays brought together in *Franz Liszt and His World* advance our understanding of the composer with fresh perspectives and an emphasis on historical contexts. Rainer Kleinertz examines Wagner's enthusiasm for Liszt's symphonic poem *Orpheus*; Christopher Gibbs discusses Liszt's pathbreaking Viennese concerts of 1838; Dana Gooley assesses Liszt against the backdrop of antivirtuosity polemics; Ryan Minor investigates two cantatas written in honor of Beethoven; Anna Celenza offers new insights about Liszt's experience of Italy; Susan Youens shows how Liszt's songs engage with the modernity of Heinrich Heine's poems; James Deaville looks at how publishers sustained Liszt's popularity; and Leon Botstein explores Liszt's role in the transformation of nineteenth-century preoccupations regarding religion, the nation, and art. *Franz Liszt and His World* also includes key biographical and critical documents from Liszt's lifetime, which open new windows on how Liszt was viewed by his contemporaries and how he wished to be viewed by posterity. Introductions to and commentaries on these documents are provided by Peter Bloom, José Bowen, James Deaville, Allan Keiler, Rainer

Kleinertz, Ralph Locke, Rena Charnin Mueller, and Benjamin Walton.

*Looking at Lysistrata* ,2013-11-01 In Aristophanes' *Lysistrata*, the women of Athens, fed up with the war against Sparta, go on a sex strike and barricade themselves into the acropolis to persuade their husbands to vote against the war. It is the most often performed of all Aristophanes' comedies. It is also, perhaps, the most misunderstood. This collection of essays by eight leading academics - written for sixth-form students and the general public alike - sets the play firmly in its historical and social context, while exploring Aristophanes' purpose in writing it and considering the responses of

modern audiences and directors. The collection has been assembled and edited by David Stuttard, whose energetic new performing version of the play is included in this volume. Contributors include: Alan Beale; Edith Hall; Lorna Hardwick; James Morwood; Martin Revermann; James Robson; Alan H. Sommerstein; Michael Walton.

Jewel of the Endless Erg: Mage Errant John Bierce, 2019-02-12 After surviving Skyhold's deadly labyrinth, Hugh and his friends are looking forwards to an uneventful summer. Their teacher Alustin has chartered a sandship for a training expedition into the vast sea of sand known as the Endless Erg, aiming for the wealthy and powerful desert city of Theras Tel. Hugh's happier than he's been in a long, long time, and he's quite excited for the fresh air, sunshine, and quiet. Of course, given Hugh's luck, their summer is going to be anything but quiet. They're about to be plunged into a morass of pirates, monsters, warring cults, flesh-tearing sandstorms, and a conspiracy against Indris Stormbreaker, the dragon queen of Theras Tel herself. At least Hugh's going to get plenty of fresh air and sunshine.

Nightlord Garon Whited, 2015-08-31 It's not easy, being King. Especially since he has an allergy to sunrise and sunset, a fire-goddess for a mother-in-law, demonic adversaries, random assassins, and a basement full of insecurities to cope with. Add to that his daughter, the priestess/princess, a couple of lightly-deranged professional magicians, a whole city full of wizards, and enough squabbling princes to resemble a kindergarten argument. It's enough to make a man want to just go home. Luckily for Eric, he has the world's largest pet rock, a smart-mouthed sword, and a horse that not only understands him, but likes him anyway.

The Future Revisited Francoise Schiltz, 2012-05-04 The Future Revisited examines Hollywood adaptations of Jules Verne stories and is an interdisciplinary study that offers a fresh perspective on film history, French literature, science fiction and America in the 1950s. It is a fascinating and authoritative account of how the stories of Jules Verne, a distinguished French novelist better known around the world as the father of science fiction and an accurate predictor of much of the twentieth century, found particular resonance with US filmmakers in the 1950s. Schiltz looks at four of the most popular films - Around the World in 80 Days, 20,000 Leagues Under the Sea, Journey to the Center of the Earth and Mysterious Island - and argues that there were many parallels between Verne's technological adventures and postwar America, with its themeparks, shopping malls, Levittowns and plethora of consumer goods. Just as nineteenth-century readers of Verne's books could experience

travel from the comfort of their seats, viewers of these films could be swept away on an imaginary flight, a voyage in a submarine, or a trek to the earth's core, all in spectacular widescreen and with ground-breaking special effects. Yet the pleasures offered were ambivalent: encounters with exotic places and cultures might have led the audience to question common assumptions such as gender roles; seeing futuristic domestic spaces could highlight the confusion of attitudes to private and public life in suburbia, and the films' blending of nostalgia and progress might draw attention to society's tug-of-war between innovation and conformity.

*Ritchie Mined - Volume I* Bill H. Ritchie, 2018-05-03 Short summaries of 3,026 essays by Bill H. Ritchie, artist, teacher and visionary drawn from his journals written between 1969 - 2009. He structured the headings of each article according an imaginary place he calls Emeraldal, imagining ten islands on a lake where he, as a recipient of a mythical prize, is encouraged to write freely about anything that seems important to an artist, teacher and philosopher. Mindful of the use of new technologies, each essay summary has key index features which would allow a reader having a

computer and optional CD-ROM to retrieve the full text of any article. Or, using freely chosen keywords of their own, find the articles which have those words in them.

*DADA, Surrealism, and the Cinematic Effect* R. Bruce Elder, 2015-10-15 This book deals with the early intellectual reception of the cinema and the manner in which art theorists, philosophers, cultural theorists, and especially artists of the first decades of the twentieth century responded to its advent. While the idea persists that early writers on film were troubled by the cinema's lowly form, this work proposes that there was another, largely unrecognized, strain in the reception of it. Far from anxious about film's provenance in popular entertainment, some writers and artists proclaimed that the cinema was the most important art for the moderns, as it exemplified the vibrancy of contemporary life. This view of the cinema was especially common among those whose commitments were to advanced artistic practices. Their notions about how to recast the art media (or the forms forged from those media's materials) and the urgency of doing so formed the principal part of the conceptual core of the artistic programs advanced by the vanguard art movements of the first half of the twentieth century.

This book, a companion to the author's previous, *Harmony & Dissent*, examines the Dada and Surrealist movements as responses to the advent of the cinema.
