Larry J. Wagenaar, Paul Trap

Sessional Papers Canada. Parliament, 1913 Report of the Dominion fishery commission on the fisheries of the province of Ontario, 1893, issued as vol. 26, no. 7, supplement.

Systems, Relations, and the Structures of International Societies Jack Donnelly, 2023-10-25 Inspired by recent work in evolutionary, developmental, and systems biology, *Systems, Relations, and the Structures of International Societies* sketches a robust conception of systems that grounds a new conception of levels (of organization, not merely analysis). Understanding international systems as multi-level multi-actor complex adaptive systems allows explanations of important features of the world that are inaccessible to dominant causal and rationalist explanatory strategies. It also develops a comprehensive critique of IR's dominant conception of systems and structures (narrow, rigid, and unfruitful); presents a novel conception of the interrelationship of the social production of continuities and the social production of change; and sketches models of spatio-political structure that cast new light on the development of international systems, including a distinctive account of the nature of globalization.
