Innovation-Driven Business and Sustainability in the Tropics Emiel L. Eijdenberg,Malobi Mukherjee,Jacob Wood,2023-08-04 The edited volume presents the conference proceedings from the "Sustainability, Economics, Innovation, Globalisation and Operational Psychology Conference 2023" (SEIGOP 2023), organized by the Centre for International Trade and Business in Asia (CITBA) at James Cook University, Singapore. This edited volume places the highly dynamic, but also, jeopardized climatological - geographical region of the Tropics centre stage. The region is developing rapidly, with significant progress being made through the development of innovative technologies. The Tropics represent a region in which people live amid the greatest level of biodiversity anywhere on the planet. Nonetheless, propelled by rapid population growth, the Tropics is a region on the rise, with higher living standards and increased levels of international trade and investment. Densely populated emerging countries like India, Indonesia and Nigeria will be among the largest economies of the world by the end of the century. These upward socioeconomic trends are compromised by the impact of climate change on the Tropics' biodiversity. Such developments have forced policymakers, businesses, and local

communities to search for more sustainable and creative ways to live and work. For these reasons, this edited volume presents theory-driven conceptual, qualitative, quantitative and mixed-methods studies on the impact of innovation-driven businesses on the complex interplay of socio-cultural, economic, and environmental factors in the Tropics.

Pre-Owned Clothing Business Startup Marian Robinson, 2020-05-10 I bet you don't even know the goldmine that's in your closet. My grandmother had the best fashion sense for her era. She was always seen dressed to the nines, pearls in tow, and heels galore. She would never leave the house without her trusty shoulder-pinned sweater. She kept every part of her appearance in check as she visited the salon with a weekly, standing appointment. Lipstick was a must. I inherited her fashionista trait. My Gran, as I called her, was a fashionista to the max. When she passed away, I found myself inheriting her vast walk-in closet collection of savvy vintage clothing. I wasn't quite sure what to do with all of it. I kept the pieces that meant the most to me and began to sell the rest. To my surprise, the demand for vintage clothing in great condition, or renewed, upcycled pieces, is immense, widespread, and appeals to men and women of all ages. My business was born - and it thrived! In my book, I will show you exactly how to go about starting and running your own pre-loved clothing business. You gain not only the monetary benefits of selling a high-demand product, but you will also be saving the world's landfills from unnecessary waste. In 2012 alone, an estimated 14.3 million tons of textiles were discarded to the landfill as reported by the Environmental Protection Agency-an alarming number for something seemingly harmless as discarding old clothes. Why toss clothing that has good life still left in it? There are so many ways you can succeed with your secondhand clothing shop, but the best thing you can do (and the most valuable experience you can get) is to go out and actually do it! Experience is always the best teacher. Until you get out and start selling, you will never be able to grasp everything fully that running a used clothing shop entails. Of course, the most important thing you can do is to be prepared for it, just so you know you're setting yourself up for success. You will have the tools you need in this book to start making good money by selling old clothes. You will learn: About crafting a plan for your business Finding who your customer will be Where to place your brick-and-mortar store, should you go that route Creating a solid marketing plan Budgeting and costs How to conduct market research Building your inventory and where to source products Upcycled hacks to increase the life of your products Advice for online marketplaces such as ThredUP, Poshmark, eBay, Depop, Facebook Marketplace, Tradesy, Vinted, Instagram, Craigslist, Mercari, LePrix, The Real Real, Grailed, VarageSale, Etsy, Shopify, and Amazon FBA How to set up a physical, brick and mortar store Branding and logo design Inventory management techniques Marketing strategies - direct and online How to set your prices Finally, how I grew my business - with advice about running a physical and online sales hybrid You will gain a much deeper understanding of how to start, run, and grow your own secondhand clothing business. Click Add to Cart now! You won't regret it! I wish I had this book when I first started my business. I also absolutely LOVE the variety of marketplaces available since I started my business. These choices can be difficult to navigate, and my book will guide you. For a limited time, when you purchase the paperback book on Amazon, you can download the Kindle version for FREE as my gift to you for your continued success.

Fashion Supply Chain Management Using Radio Frequency Identification (RFID) Technologies Calvin Wong, Z. X. Guo, 2014-02-16 Fashion Supply Chain Management Using Radio Frequency Identification (RFID) Technologies looks at the application of RFID technologies in such areas as order allocation, garment manufacturing, product tracking, distribution and retail. As supply chains in the textiles and fashion industry become ever more complex and global, and as the shift to mass customization puts more pressure on a rapid and flexible response to customer needs, monitoring and improving supply chain efficiency in the industry becomes crucial. Radio frequency identification (RFID) technologies offer a unique opportunity to achieve these goals. This book reviews the role of RFID technologies in the textiles and fashion supply chain to improve distribution, process management and product tracking, garment manufacturing, and assembly line operations. It also explores how RFID technologies can improve order allocation in the supply chain, and how these technologies can also be used for intelligent apparel product cross-selling. Its chapters also discuss measuring the impact of RFID technologies in improving the efficiency of the textile supply chain, and modeling the effectiveness of RFID technologies in improving sales performance in fashion retail outlets. Fashion Supply Chain Management Using Radio Frequency Identification (RFID) Technologies is a comprehensive resource for academic researchers, industry managers, and professionals within the fashion industry. Looks at the application of RFID technologies in order allocation, garment manufacturing, product tracking, distribution, and retail Reviews RFID technologies in the textiles and fashion supply chain for improving distribution, process management and product tracking, garment manufacturing, and assembly line operations Focuses on measuring the impact of RFID technologies on efficiency, and modeling the effectiveness of RFID technologies in improving retail outlet sales
