After The Storm Anthony H. Cordesman,2016-10-06 This comprehensive analysis documents the military forces in each Middle Eastern country at the end of the Cold War. Cordesman discusses security developments and provides a qualitative and quantitative analysis of the strength and effectiveness of every army, navy, air force, and air defence force in the region. He further assesses post-Cold War modernization and expansions plans and each country's internal security situations, the role the military plays in its government and internal tensions and civil wars. Special attention is paid to Iran and Iraq and the author examines the military changes in both countries as responses to the Iran-Iraq and the First Gulf War. After the Storm is unique in combining the evaluation of conventional forces with assessments of developments in biological, chemical and nuclear weapons and provides a coherent picture of the state of the military in the Middle East in the early 1990s. Summary tables and charts present keys statistics for the region, formatted to allow quick country by country comparisons.

European Access to Space: Business and Policy Perspectives on Micro Launchers Matteo Tugnoli,Martin Sarret,Marco Aliberti,2018-05-31 The book provides an analysis of the dynamics of the global launch service market associated with small satellites, by placing a particular focus on its unfolding trends and future outlook. From an economic perspective, the emergence of numerous micro launcher initiatives on top of already existing launch solutions for small satellites raises questions about the specific nature and size of the small satellite market that will - or could - be addressed by these emerging launch services offerings. Identifying the specific features of such market by characterizing customers' expectations and providing a competitive analysis of the different launch solutions for small satellites is the second objective of this report. Finally, and from a policy perspective, the book reflects on whether such market could and should be handled on a purely private basis in the European context, or on the contrary generates relevant stakes that compels European institutional actors to become more actively involved in this domain.

The complete range of hardware used in land, sea and air forces throughout the world at the time of publication is covered, from tanks to rocket systems, helicopters to cruise missiles, alongside full details of size, weight and operational range. The book's main strength lies in the detail it gives of armament and associated ammunition capabilities, and of the sensors and other electronics required for the weapons to be used effectively. A key title amongst Routledge reference reissues, Christopher Chant's important work will be of great value to students and professionals requiring a comprehensive and accessible reference guide, as well as to weapons 'buffs'.

The Chinese Army Today Dennis J. Blasko, 2013-06-17 The Chinese Army Today is a comprehensive study of the Chinese military, examining its ground forces in a level of detail not found in any other contemporary works. This new, revised edition has been fully updated to take account of recent changes in the institution. In 1999, the military modernization program of the Chinese People's Liberation Army increased in intensity and achieved a focus not seen in the previous two decades. Based primarily on actual Chinese sources, this book details these changes and puts them in the context of the many traditions that still remain. Written by a retired professional military officer who has served in China, the text uses first-hand observation of the Chinese military and three decades of military experience to weave many disparate threads from official Chinese statements, documents, and media reports into an integrated whole. The author also conducts an in-depth exploration into the many forces that constitute the People's Liberation Army. This is an essential book for all students of Chinese military and security affairs, and highly recommended for students of Chinese Politics, Asian Security, and International Relations and Strategic Studies, in general.
