Hannibal and Me Andreas Kluth, 2012-01-05 A dynamic and exciting way to understand success and failure, through the life of Hannibal, one of history's greatest generals. The life of Hannibal, the Carthaginian general who crossed the Alps with his army in 218 B.C.E., is the stuff of legend. And the epic choices he and his opponents made-on the battlefield and elsewhere in life-offer lessons about responding to our victories and our defeats that are as relevant today as they were more than 2,000 years ago. A big new idea book inspired by ancient history, Hannibal and Me explores the truths behind triumph and disaster in our lives by examining the decisions made by Hannibal and others, including Albert Einstein, Eleanor Roosevelt, Steve Jobs, Ernest Shackleton, and Paul Cézanne-men and women who learned from their mistakes. By showing why some people overcome failure and others succumb to it, and why some fall victim to success while others thrive on it, Hannibal and Me demonstrates how to recognize the seeds of success within our own failures and the threats of failure hidden in our successes. The result is a page-turning adventure tale, a compelling human drama, and an insightful guide to understanding behavior. This is essential reading for anyone who seeks to transform misfortune into success at work, at home, and in life.

Patry on Copyright William F. Patry, 2010 The author provides an encyclopedic analysis of copyright, placing court opinions and statutes in their real-world context. In addition to enumerating a complete legislative and statutory history for relevant provisions on pertinent litigation issues, a circuit-by-circuit breakdown is provided. The extensive discussion of remedial, jurisdictional, choice of law, and international issues is unparalleled in other legal work.--Publisher's website.

Copyright Law Benedict Atkinson, 2017-07-05 This volume shows how, since 1950, the growth of copyright regulation has followed, and enabled, the extraordinary economic growth of the entertainment, broadcasting, software and communications industries. It reproduces articles written by an extensive list of leading thinkers. US scholars represented in readings include James Boyle, Lawrence Lessig, Pamela Samuelson, Mark Lemley, Alfred Yen, Julie Cohen, Peter Jaszi and Eben Moglen. Leading non-US contributors include Alan Story, Brian Fitzgerald and Peter Drahos. These and other authors explain copyright origins, the development of the law, the theory of enclosure, international trends, recent developments, and current and future directions. Today, the copyright system is often portrayed as an engine of growth, and effective regulation as a predictor of economic development. However, critics see dangers in the expansion of intellectual property rights. The articles in this volume focus principally on the digital age, examining how copyright regulation is likely to affect goals of dissemination and access.

Digital Copyright Jessica Litman, Professor Litman's work stands out as well-researched, doctrinally solid, and always piercingly well-written.-JANE GINSBURG, Morton L. Janklow Professor of Literary and Artistic Property, Columbia UniversityLitman's work is distinctive in several respects: in her informed historical perspective on copyright law and its legislative policy; her remarkable ability to translate complicated copyright concepts and their implications into plain English; her willingness to study, understand, and take seriously what ordinary people think copyright law means; and her creativity in formulating alternatives to the copyright quagmire. -PAMELA SAMUELSON, Professor of Law and Information Management; Director of the Berkeley Center for Law & Technology, University of California, BerkeleyIn 1998, copyright lobbyists succeeded in persuading Congress to enact laws greatly expanding copyright owners' control over individuals' private uses of

their works. The efforts to enforce these new rights have resulted in highly publicized legal battles between established media and new upstarts. In this enlightening and well-argued book, law professor Jessica Litman questions whether copyright laws crafted by lawyers and their lobbyists really make sense for the vast majority of us. Should every interaction between ordinary consumers and copyright-protected works be restricted by law? Is it practical to enforce such laws, or expect consumers to obey them? What are the effects of such laws on the exchange of information in a free society? Litman's critique exposes the 1998 copyright law as an incoherent patchwork. She argues for reforms that reflect common sense and the way people actually behave in their daily digital interactions. This paperback edition includes an afterword that comments on recent developments, such as the end of the Napster story, the rise of peer-to-peer file sharing, the escalation of a full-fledged copyright war, the filing of lawsuits against thousands of individuals, and the June 2005 Supreme Court decision in the Grokster case. Jessica Litman (Ann Arbor, MI) is professor of law at Wayne State University and a widely recognized expert on copyright law.

The articles focus principally on the digital age and discuss copyright origins, the development of the law, the theory of enclosure, international trends, recent developments, and current and future direction, including the dangers in the expansion of intellectual property rights.

Does What You Export Matter? Daniel Lederman, William Maloney, 2012-06-18 Does what economies export matter for development? If so, can industrial policies improve on the export basket generated by the market? This book approaches these questions from a variety of conceptual and policy viewpoints. Reviewing the theoretical arguments in favor of industrial policies, the authors first ask whether existing indicators allow policy makers to identify growth-promoting sectors with confidence. To this end, they assess, and ultimately cast doubt upon, the reliability of many popular indicators advocated by proponents of industrial policy. Second, and central to their critique, the authors document extraordinary differences in the performance of countries exporting seemingly identical products, be they natural resources or 'high-tech' goods. Further, they argue that globalization has so fragmented the production process that even talking

about exported goods as opposed to tasks may be misleading. Reviewing evidence from history and from around the world, the authors conclude that policy makers should focus less on what is produced, and more on how it is produced. They analyze alternative approaches to picking winners but conclude by favoring 'horizontal-ish' policies--for instance, those that build human capital or foment innovation in existing and future products--that only incidentally favor some sectors over others.

Where the Deer and the Antelope Play Nick Offerman, 2023-10-03 A humorous and rousing set of literal and figurative sojourns as well as a mission statement about comprehending, protecting, and truly experiencing the outdoors, fueled by three journeys undertaken by actor, humorist, and New York Times bestselling author Nick Offerman Nick Offerman has always felt a particular affection for the Land of the Free--not just for the people and their purported ideals but to the actual land itself: the bedrock, the topsoil, and everything in between that generates the health of your local watershed. In his new book, Nick takes a humorous, inspiring, and elucidating trip to America's trails, farms, and frontier to examine the people who inhabit the land, what that has meant to them and us, and to the land itself, both historically and currently. In 2018, Wendell Berry posed a question to Nick, a query that planted the seed of this book, sending Nick on two memorable journeys with pals--a hiking trip to Glacier National Park with his friends Jeff Tweedy and George Saunders, as well as an extended visit to his friend James Rebanks, the author of *The Shepherd's Life* and *English Pastoral*. He followed that up with an excursion that could only have come about in 2020--Nick and his wife, Megan Mullally, bought an Airstream trailer to drive across (several of) the United States. These three quests inspired some

“deep-ish thinking from Nick, about the history and philosophy of our relationship with nature in our national parks, in our farming, and in our backyards; what we mean when we talk about conservation; and the importance of outdoor recreation, all subjects very close to Nick's heart. With witty, heartwarming stories and a keen insight into the human problems we all confront, this is both a ramble through and celebration of the land we all love.
