From the very beginning of the release Mac has won users mind. The developer of Mac has worked to give maximum protection to their user's data. However, like windows Mac users also face problem of data losing. Reason of data losing is same as data losing on Windows. Now I am going to describe how you can recover files on MAC using a small software called EaseUs Data Recovery. It allows users to quickly get deleted, damaged or formatted data.

Targeting: The Challenges of Modern Warfare Paul A.L. Ducheine,Michael N. Schmitt,Frans P.B. Osinga,2015-11-03 This book offers a multidisciplinary treatment of targeting. It is intended for use by the military, government legal advisers and academics. The book is suitable for use in both military training and educational programs and in Bachelor and Master degree level courses on such topics as War Studies and Strategic Studies. The book first explores the context of targeting, its evolution and the current targeting process and characteristics. An overview of the legal and ethical constraints on targeting as an operational process follows. It concludes by surveying contemporary issues in targeting such as the potential advent of autonomous weapon systems, 'non-kinetic' targeting, targeting in multinational military operations and leadership decapitation in counter-terrorism operations. The deep practical experience and academic background of the contributors ensures comprehensive treatment of current targeting and use of force issues. Paul Ducheine is Professor for Cyber Operations and Cyber Security, Netherlands Defence Academy, Breda, The Netherlands; and Professor of Law of Military Cyber Operations and Cyber Security at the University of Amsterdam, The Netherlands. Michael Schmitt is Charles H. Stockton Professor & Director, Stockton Center for the Study of International Law, U.S. Naval War College, Newport, Rhode Island, and Professor of Public International Law, University of Exeter, UK. Frans Osinga is Chair of the War Studies Department, Netherlands Defence Academy, Breda, The Netherlands, and Professor of Military Operational Art and Sciences.

Netslaves Bill Lessard,Steve Baldwin,2000 A funny, horrifying, compulsively readable expose of the cyber-sweatshop culture--a riveting read for anyone who is fascinated by the new Web society.

The Two-Income Trap Elizabeth Warren,Amelia Warren Tyagi,2016-04-12 From #1 New York Times bestselling author Senator Elizabeth Warren and consultant Amelia Warren Tyagi, the classic book about America's middle class -- and why economic security remains out of reach for many. In this exposé, Elizabeth Warren and Amelia Warren Tyagi show that modern middle-class families are increasingly trapped by the grinding reality of flat wages and rising costs. Warren and Tyagi reveal how a ferocious bidding war for housing and education has silently engulfed America's suburbs, driving up the cost of keeping families in the middle class, and placing unprecedented pressure on hard-working families. Revolutionary when it was first published in 2003, The Two-Income Trap remains disturbingly relevant today. Now with a new introduction by the authors, The Two Income Trap shows why the usual remedies won't solve the problem and points toward the policy changes that would create better opportunities for both parents and children.

Bugsplat Bruce Cronin,2018 Why do states who are committed to the principle of civilian immunity and the protection of non-combatants end up killing and injuring large numbers of civilians during their military operations? Bugsplat explains this paradox through an in-depth examination of five conflicts fought by Western powers since 1989. It argues that despite the efforts of Western military organizations to comply with the laws of armed conflict, the level of collateral damage produced by Western military operations is the inevitable outcome of the strategies and methods through which their military organizations fight wars. Drawing on their superior technology and the strategic advantage of not having to fight on their own territory, such states employ highly-concentrated and overwhelming military force against a wide variety of political, economic, and military targets under conditions likely to produce high civilian casualties. As a result, collateral damage in western-fought wars is largely both foreseeable and preventable. The book title is derived from the name of a computer program that had been used by the Pentagon to calculate probable civilian casualties prior to launching air attacks.

Stoicism and the Art of Happiness Donald Robertson,2018-09-06 The stoics lived a long time ago, but they had some startling insights into the human condition - insights which endure to this day. The philosophical tradition, founded in Athens by Zeno of Citium in 301 BC, endured as an active movement for almost 500 years, and contributions from dazzling minds such as Cicero, Seneca and Marcus Aurelius helped create a body of thought with an extraordinary goal - to provide a rational, healthy way of living in harmony with the nature of the universe and in respect of our relationships with each other. In many ways a precursor to Cognitive Behavioural Therapy (CBT), Stoicism provides an armamentarium of strategies and techniques for developing psychological resilience, while celebrating all in life which is beautiful and important. By learning what stoicism is, you can revolutionise your life and learn how to seize the day, live happily and be a better person. This simple, empowering book shows how to use this ancient wisdom to make practical, positive changes to your life. Using thought-provoking case studies, highlighting key ideas and things to remember and providing tools for self-assessment, it demonstrates that Stoicism is a proven, profound pathway to happiness.

Law of Land Warfare Judge Advocate General's School (United States. Army),1943

Humane Warfare Christopher Coker,2003-08-29 The decision to fight 'humanitarian wars' - such as Kosovo - and the development of technology to make war more humane, illustrates the trend in the West to try to humanise war, and thereby humanise modernity. This highly controversial and cutting-edge book asks whether the attempt to make war 'virtual' or 'virtuous' can succeed and whether the west is deluding itself (not its enemies) in thinking that war can ever be made more humane. Christopher Coker's radical conclusion is that Western humanitarian warfare is in fact an endgame as other non-Western societies will make sure it does not succeed. Eminently readable, this book combines theory with accounts by politicians and serving military personnel, alongside illuminating literary insights. It will be vital reading for all those interested in international relations and strategic studies and defence issues, including journalists, students and politicians.
