

Ferraris Reloaded 100

Leonardo Acerbi

Ferrari Century Roberto Boccafogli,1998 The last 100 years have been a century of dramatic changes -- 100 years which saw, among other things, the birth of the automobile and the world's subsequent fascination with speed, From this context emerged driver and car designer Enzo Ferrari, the very embodiment of that evolving spirit.Ferrari: A Dream Born in the Snow traces the life of Enzo Ferrari, the advent of the Ferrari marque, and all the ups and downs of Ferrari racing, from the beginning through the present era of Michael Schumacher. This beautifully produced book is illustrated from cover to cover with hundreds of black-and-white archival photographs, as well as color photos and illustrations from throughout the history of Ferrari racing. Boccafogli's painstakingly researched text includes dozens of fascinating sidebars and year-by-year historical data on the team. This text and wealth of visual information, at \$19.95, make the book a value for Ferrari enthusiasts, auto buffs, and race fans alike.From its first steps, the Ferrari marque became a legend in the world of motor sports. This book is a faithful account of the legend and its sometimes unhappy chapters, a story that continues 100 years after the legend's birth.

Ferrari Dennis Adler,2006 From the author of Porche comes the stunning, magnificently illustrated story of Enzo Ferrari and the matchless cars he's presented to the public for more than half a century.

Ferrari Ecurie Garage Francorchamps Gianni Rogliatti,1992 The Ecurie Francorchamps has been one of the most important Ferrari racing teams in the last 30 years. This book combines spectacular photos of its canary-yellow cars on some of the world's most famous circuits with a review of the 100 most notable Ferraris ever to race with the team.

The History of Ferraris Seth Kingston,2018-12-15 Introduce your readers to the Ferrari, which has received numerous accolades for design and performance, both as race cars and luxury automobiles. Enzo Ferrari worked for Alfa Romeo, but left the company in 1939 to begin his own automobile company. Ferrari's main goal was to create an automobile capable of beating Alfa Romeo in a car of his creation. He opened Auto Avio Costruzioni in Modena, Italy, in 1939. In 1947, Ferrari took a V12, known today as the 125 S, out for it's first test drive. Ferraris have shined on the racing circuit and Enzo Ferrari was awarded for his devotion for adding to Italy's international reputation after World War II.

Ferrari 312P & 312PB Ed McDonough,Peter Collins,2009-11-01 The late 1960s and early 1970s formed a significant epoch in the world of international sports car racing. As the motor racing rule-making body moved back and forth between cars that less and less resembled road-going vehicles, prototype sports car racing captured the imagination of manufacturers, teams and fans alike. Porsche vs Ferrari vs Alfa Romeo vs Matra provided some of the best ever racing for sports cars. At first the 5-litre Porsches and Ferraris battled through 1970 and 1971, but the 3-litre prototypes that previously had run in another class rapidly became more and more competitive. By 1973, the Ferrari 312PB, little more than a Grand Prix car with full bodywork, was dominating the scene. This has always been viewed as one of the great eras in sports car racing, when all the Grand Prix drivers were fully active in sports cars as well as F1 machines. With 100 contemporary pictures, this is the story of a great time in motor sport history.

Ferrari Roberto Bonetto,White Star Publisher,2011-12 From the first Ferrari 125 S in 1947 to the Ferrari 590 GTO of 2010, the automobiles of the Cavallino Rampante (prancing horse) have marked the history of motoring on the roadway as well as on the racetrack. The fascinating line; the inimitable red of the chassis, now become paradigm; the power and unmistakable sound of the V8 and V12 engines have made, and continue to make, the automobiles produced at Maranello, in the province of Modena, a veritable legend on the road as well as a symbol of Italian excellence. Cars of refined style, the work of illustrious planners and designers like Pininfarina, Bertone, and Vignale, Ferraris are dreams come true for lovers of four-wheeled vehicles, and veritable cult objects for appassionati and collectors around the world. Enzo Ferrari, the founder of the prestigious automobile company, said: 'The best Ferrari ever built is the next one'. It's a legend that continues to renew itself.

The Ferrari Phenomenon Matthew L. Stone,Luca Dal Monte,2010 For more than six decades no other name has inspired as much passion and excitement among car enthusiasts, racing fans, and the general public. Ferrari road cars are fast, beautiful, and fabulously expensive; the race cars are synonymous with victory in Formula One, as well as sports-car competition. But the Ferrari name means much more than just cars or the numbers that measure horsepower, speed, or price. Whether they were built for the road or the track, Ferraris are also marvelous conduits to a world of interesting stories and fascinating facts. Over the years the lore and legends surrounding Ferrari have involved people, history, design, pop culture, mystery, lies, rumor, and humor. Loyal Ferrari owners have run the gamut from royalty to rock stars. Ferraris have made memorable appearances in movies and TV shows, and they have been the subject of countless books and articles. And Ferrari champions have included some of the greatest names in racing history, from Ascari and Gangio to Schumacher and Alonso. The Ferrari Phenomenon offers an innovative, wide-ranging perspective on the world's most iconic car manufacturer. It covers everything from little-known details of Enzo Ferrari's life to unexpected facts about one-off cars, historic races, and famous Ferrari owners. There's also a virtual tour of the Ferrari factory, and even tips on what to see when you visit Maranello.--Publisher description.

The Ferrari Legend Antoine Prunet,1981-01 This epigram, usually applied to horse racing, could have equally been devised for Enzo Ferrari and the men of Maranello whose cars bear the badge of the prancing horse. With 23 World Championship titles behind them, the sleek and powerful Italian cars have established a record second to none. Ferrari Sports, GT and pure racing cars have forged an incomparable reputation over the years, and it is largely the expertise born of this experience which has made their road going equivalents so prestigious and desirable. From the Tipo 125 Sport of 1946 to the 308, Ferrari have made more high performance cars - over 500 variants - than any other marque. Some are legendary, such as the 250 GT, the Daytona or the Berlinetta Boxer, but many older models are often forgotten, some now almost totally unknown. In this lavishly illustrated and superbly produced book (as only befits one about such a superb marque), Atoine Prunet examines each of the road cars in detail. Containing 450 pages and over 500 illustrations - many in full colour - The Ferrari Legend pays due tribute to the designers and engineers of Maranello as well as to the coachbuilders who have made them so visually dramatic and appealing.

Ferrari 330 AMERICA Cyrille Jaquinot,2021-04-21 The Ferrari 330 America if it is unknown to the public, however, deserves to be a Ferrari in its own right. Often seen as the interim model between the 250 GTE and the 330 GT 2+2, it remains a mystery as it has a body of the 250 GTE Series III Pininfarina with a 4-liter Colombo 12-cylinder engine derived from the 400 Superamerica. Rare car because only 50 were built by Pininfarina on the initiative of Luigi Chinetti, the famous Ferrari importer located on the East Coast of the USA with his company Luigi Chinetti Motors Inc. of Manhattan, New York. This unique book is a tribute to Luigi Chinetti, the first man who was able to convince with charisma and enthusiasm Enzo Ferrari on Christmas eve 1946 to become a real car manufacturer. Ferrari's history with Chinetti will remain inseparable forever.The foreword is by the great American pilot Mario Andretti. The first part of this unique book is devoted to the life of Luigi Chinetti until 1964.The history of Ferraris Americas, Superamericas is discussed until the arrival of the 250 GTE 2 + 2 then finally the mysterious 330 America.A register of the 50 units manufactured in 1963 on more than 200 pages with testimonies from the famous Ferrari world.A complete book in English by the French historian Cyrille Jaquinot which will be a reference in the libraries of Ferrari enthusiasts.

A Century of Car Aerodynamics Julian Edgar,2021-05-31 Covering every decade from the 1920s until now, this book reveals an incredible array of fascinating and advanced aerodynamic designs - cars shaped to cheat the wind or stick to the road. Meet an automotive inventor so weird he'd taken a vow of silence and had to communicate by writing notes... discover one of the lowest-drag cooling systems ever used in a production car... and see how the science and art of car aerodynamics have progressed over the last 100 years. Written with the full cooperation of car aerodynamicists from Porsche, Tesla, General Motors and Volkswagen, the coverage is detailed and accurate. Over 60 individual cars are described - from the tiny Fiat Uno to the mighty Bluebird Land Speed Record car. Learn about wings and spoilers, the Kamm tail and how today's low-drag electric cars are being developed. Be amazed that some cars built over 80 years ago have better aerodynamic figures than many current cars. See rare concept cars from Mercedes, Ford and Chrysler. Researched on three continents and containing more than 450 photos, diagrams and graphs, this book will forever change how you view car aerodynamics. Someone once said that to know where you are going you need to know where you have come from. Julian Edgar's new book provides car aerodynamicists with a vivid and detailed understanding of how we got here over the past 100 years. Jeff Howell, Visiting Professor Loughborough University and former head of Aerodynamics at Rover, Jaguar Land Rover and Tata Motors European Technical Centre. This book takes you on a fascinating and engrossing journey through the history of automotive aerodynamics, highlighting notable milestones in learning and technology, but also bringing real humanity to some of the illustrious names of the field, and adding illuminating context to their work. Rob Palin, lead aerodynamicist on the Tesla Model S A fascinating and well-researched trip through history that will expand the understanding of anyone interested in vehicle aerodynamics. Jon Young, car aerodynamics enthusiast.

Ferrari Fever Marc Sonnery,Paul F. Schouwenburg,2014-01-31 Ferrari Fever is a fascinating and nostalgic look back at the classic car collecting scene in the 60's and 70's, an era when some of the rarest and most interesting Italian automobiles could still be found hidden or languishing in barns, junkyards or by the side of the road...almost lost in time. Paul Schouwenburg s story begins in wartime occupied Amsterdam, a poignant backdrop to the hardships of the years to follow, when the appearance of any exotic Italian thoroughbred was a rare sight indeed. Fuelled by a fascination for all things mechanical, adventures on a Rudge bicycle and early experiences in his parents succession of Rovers, Paul gains a burning passion for finding, restoring, and ultimately racing Italian cars. But these were not just any Italian cars -from the early 60s onwards, he begins to uncover several rare Alfas, from 1900CSS Zagato to Tipo 33/2, in addition to a host of very special Ferraris, including a 250GTO, 340 America Touring, 250 MM Vignale Berlinetta, 250GT SWB Competition/61 and 275GTB/C/LM, usually by word of mouth or tenuous rumour. Having acquired them, often many different models at a time, he would drive them home across Europe through snow storms, and restore them single-handedly in his spare time, full-time job as a world-leading head and neck cancer surgeon permitting! If that wasn t exciting enough, he would then race them, often winning, before moving on to the next irresistible project. Filled with rich anecdotes and rare insights into the colourful characters of the day, including Jacques Swaters and Rob de la Rive Box, Paul s passion and incredible drive make for exciting reading. Indeed this is a unique take, a look in the rear view mirror at a bygone era when gems could be found incredibly cheaply and enthusiasts took seat-of-the-pants decisions regarding many aspects of a hobby which was uncharted, innocent and simply not as commercial as today he couldn t even give away his 250 GTO at the time!
