Managing Systems Migrations and Upgrades Charles V. Breakfield,Roxanne E. Burkey,2002-05-20 Managing Systems Migrations and Upgrades is the perfect book for technology managers who want a rational guide to evaluating the business aspects of various possible technical solutions. Enterprises today are in the middle of the R&D race for technology leadership, with providers who increasingly need to create markets for new technologies while shortening development, implementation, and life cycles. The cost for the current tempo of technology life cycles is endless change-management controls, organizational chaos, production use of high-risk beta products, and greater potential for failure of existing systems during migration. Burkey and Breakfield help you answer questions such as, Is the only solution open to me spending more than the industry average in order to succeed? and What are the warning signs that tell me to pass on a particular product offering? as well as How can my organization avoid the 'technical death marches' typical of the industry? This book will take the confusion out of when to make shifts in your systems and help you evaluate the value proposition of these technology changes. · Provides a methodology for decision making and implementation of upgrades and migrations · Avoids marketing hype and the technical herding instinct · Offers a tool to optimize technology changes for both staff and customers

The School Librarian's Technology Playbook Stacy Brown,2020-02-06 Using concrete examples, The School Librarian's Technology Playbook offers strategies for school librarians to initiate and support innovative practices throughout their school community. The role of school librarians has evolved: no longer do they primarily support teachers with reading and literacy resources. Many librarians now support teachers in integrating technology tools and innovative teaching practices in their classrooms. At her school, author and learning coordinator Stacy Brown has pioneered the transition to innovation and technology use in the classroom. In The School Librarian's Technology Playbook, she showcases different technology tools and innovative strategies that can be incorporated into the classroom, such as 3D printing, augmented reality, green screen applications, gamification, coding, makerEd, and more. She details the many ways in which school librarians can support teachers as they implement these new practices into their curriculum. School librarians will learn how to collaborate with teachers and how to empower them to step outside of their comfort zones to try new tools and teaching methods. Readers of this book will also learn how to support teachers as the technology continues to change in this dynamic educational landscape.
