Since the stakeholders in the process includes artists, their managers, music publishers, record companies, distribution companies and the consumer, the law relating to internet music distribution is extremely complex. Andrew Sparrow's *Music Distribution and the Internet* provides those connected to the music and media industries with a guide to the legal requirements they must meet, answering questions such as: ¢ How should you conclude contracts with consumers over the internet? ¢ What are the various legal terms and conditions that should govern the sale of physical product to online music buyers? ¢ How should a website user's personal information be handled? ¢ What limitations are there on the way this data may be used for ongoing marketing of an artist's work or the merchandise associated with it? ¢ What are the latest copyright laws in this area and how do they apply to the internet? The book provides practical advice on how to approach key relationships with the internet buying consumer and other online media providers. The law is explained in straightforward terms and applied throughout in a music business context. *Music Distribution and the Internet* is an essential reference for anyone seeking to exploit and protect their rights and those of their artists in the rapidly expanding, constantly evolving and fascinating arena that is new media.

By combining these different avenues, the book will be of particular interest to practitioners, academics, researchers and legal scholars involved in the field of copyright law.

Personal Data (Privacy) Law in Hong Kong A Practical Guide on Compliance (Second Edition) Mr. Stephen Kai-yi

WONG, Professor Guobin ZHU, The idea of a right to privacy, which arose in reaction to the rapid rise of newspapers, instant photography and the “paparazzi” of the 19th century, has evolved into a constitutional right in much of the developed world. It is enshrined in Hong Kong through Articles 28, 29, 30 and 39 of the Basic Law. Hong Kong stands proud as the first jurisdiction in Asia to enact legislation to safeguard personal data in the form of the Personal Data (Privacy) Ordinance, Cap 486 (“the Ordinance”) which came into force in 1996. At its centre are the six Data Protection Principles based on the 1980 OECD Guidelines. The office of the Privacy Commissioner for Personal Data was created under this legislation to provide oversight and ensure compliance. The Octopus scandal in mid-2010 eventually led to substantial changes being made to the Ordinance that were enacted in 2012 and 2013, the main amendments being the Direct Marketing provisions and the provision of legal assistance and representation to aggrieved persons. In this digital age, the Ordinance is proving to be the main safeguard of our privacy rights. The Data Protection Principles seek to create broad common principles based on fairness that apply to the public and private sectors. The passage of twenty years since the enactment of the Ordinance has given rise to a substantial body of case law and administrative decisions on these principles and the other provisions of the Ordinance. The new amendments have already been the subject of judicial scrutiny. This publication, which replaces its predecessor, has the dual aim of becoming a practitioner’s guide on the important subject of personal data privacy, containing, as it does, a detailed exposition of the principles and provisions in the Ordinance and a comprehensive source of reference materials, and of enabling the Privacy Commissioner to discharge his major duty to promote awareness and understanding of the Ordinance. The second edition includes not only a full discussion of these principles, but also summaries of all the seminal cases and Administrative Appeals Board rulings in this area, as well as a comprehensive list of all the pertinent cases.
