We Gather Together Neil J. Young, 2016 The story of the birth of the Religious Right is a familiar one. In the 1970s, mainly in response to Roe v. Wade, evangelicals and conservative Catholics put aside their longstanding historical prejudices and theological differences and joined forces to form a potent political movement that swept across the

country. In this provocative book, Neil J. Young argues that almost none of this is true. Young offers an alternative history of the Religious Right that upends these widely-believed myths. Theology, not politics, defined the Religious Right. The rise of secularism, pluralism, and cultural relativism, Young argues, transformed the relations of America's religious denominations. The interfaith collaborations among liberal Protestants, Catholics, and Jews were met by a conservative Christian counter-force, which came together in a loosely bound, politically-minded coalition known as the Religious Right. This right-wing religious movement was made up of Mormons, conservative Catholics, and evangelicals, all of whom were united--paradoxically--by their contempt for the ecumenical approach they saw the liberal denominations taking. Led by the likes of Jerry Falwell, they deemed themselves the pro-family movement, and entered full-throated into political debates about abortion, school prayer, the Equal Rights Amendment, gay rights, and tax exemptions for religious schools. They would go on to form a critical new base for the Republican Party. Examining the religious history of interfaith dialogue among conservative evangelicals, Catholics, and Mormons, Young argues that the formation of the Religious Right was not some brilliant political strategy hatched on the eve of a history-altering election but rather the latest iteration of a religious debate that had gone on for decades. This path breaking book will reshape our understanding of the most important religious and political movement of the last 30 years.

American Labour's Cold War Abroad Anthony Carew, 2018-09-21 During the Cold War, American labour organizations were at the centre of the battle for the hearts and minds of working people. At a time when trade unions were a substantial force in both American and European politics, the fiercely anti-communist American Federation of Labor-Congress of Industrial Organizations (AFL-CIO) set a strong example for labour organizations overseas. The AFL-CIO cooperated closely with the US government on foreign policy and enjoyed an intimate, if sometimes strained, relationship with the CIA. The activities of its international staff, and especially the often secretive work of Jay Lovestone and Irving Brown—whose biographies read like characters plucked from a Le

Carré novel—exerted a major influence on relationships in Europe and beyond. Having mastered the enormous volume of correspondence and other records generated by staffers Lovestone and Brown, Carew presents a lively and clear account of what has largely been an unknown dimension of the Cold War. In impressive detail, Carew maps the international programs of the AFL-CIO during the Cold War and its relations with labour organizations abroad, in addition to providing a summary of the labour situation of a dozen or more countries including Finland, France, Italy, Germany, Japan, Greece, and India. American Labour's Cold War Abroad reveals how the Cold War compelled trade unionists to reflect on the role of unions in a free society. Yet there was to be no meeting of minds on this, and at the end of the 1960s the AFL-CIO broke with the mainstream of the international labour movement to pursue its own crusade against communism.
