Digital Humanities and Film Studies Adelheid Heftberger,2019-01-02 This book highlights the quantitative methods of data mining and information visualization and explores their use in relation to the films and writings of the Russian director, Dziga Vertov. The theoretical basis of the work harkens back to the time when a group of Russian artists and scholars, known as the "formalists," developed new concepts of how art could be studied and measured. This book brings those ideas to the digital age. One of the central questions the book intends to address is, "How can hypothetical notions in film studies be supported or falsified using empirical data and statistical tools?" The first stage involves manual and computer-assisted annotation of the films, leading to the production of empirical data which is then used for statistical analysis but more importantly for the development of visualizations. Studies of this type furthermore shed light on the field of visual presentation of time-based processes; an area which has its origin in the Russian formalist sphere of the 1920s and which has recently gained new relevance due to technological advances and new possibilities for computer-assisted analysis of large and complex data sets. In order to reach a profound understanding of Vertov and his films, the manual or computer-assisted data analysis must be combined with film-historical knowledge and a study of primary sources. In addition, the status of the surviving film materials and the precise analysis of these materials combined with knowledge of historical film technology provide insight into archival policy and political culture in the Soviet Union in the 1920s and 30s.

Using Technology with Classroom Instruction that Works Howard Pitler, Elizabeth Ross Hubbell, Matt Kuhn, 2012 Learn how to improve instruction by * Collecting the right data--the right way. * Incorporating relevant data into everyone's daily life. * Resisting the impulse to set brand-new goals every year. * Never settling for good enough. * Anticipating changes--big and small, local and federal. * Collaborating and avoiding privatized practice. * Involving all stakeholders in identifying problems, setting goals, and analyzing data. * Agreeing on what constitutes high-quality instruction and feedback. The challenge is to understand that data--not intuition or anecdotal reports--are tools to be used in getting better at teaching students. And teaching students effectively is what schools are all about. Following the guidance in this book, overcome uncertainty and concerns about data as you learn to collect and analyze both soft and hard data and use their secrets for instructional improvement in your school.

Experimental and Independent Italian Cinema Cristiano Anthony Cristiano,2020-07-06 Discussing a variety of independent and experimental Italian films, this book gives voice to a critically neglected form of Italian cinema. By examining the work of directors such as Marinella Pirelli, Mirko Locatelli and Cesrae Zavattini, the book defines, inspects and studies the cinematic panorama of Italy through a new lens. It thereby explores the character of independent films and their related practices within the Italian historical, cultural and cinematic landscape.
