The Hidden Lamp Zenshin Florence Caplow,Reigetsu Susan Moon,2013-10-21 The Hidden Lamp is a collection of one hundred koans and stories of Buddhist women from the time of the Buddha to the present day. This revolutionary book brings together many teaching stories that were hidden for centuries, unknown until this volume. These stories are extraordinary expressions of freedom and fearlessness, relevant for men and women of any time or place. In these pages we meet nuns, laywomen practicing with their families, famous teachers honored by emperors, and old women selling tea on the side of the road. Each story is accompanied by a reflection by a contemporary woman teacher--personal responses that help bring the old stories alive for readers today--and concluded by a final meditation for the reader, a question from the editors meant to spark further rumination and inquiry. These are the voices of the women ancestors of every contemporary Buddhist.

Information Infrastructures within European Health Care Margunn Aanestad,Miria Grisot,Ole Hanseth,Polyxeni Vassilakopoulou,2018-08-07 This book is open access under a CC BY-NC 2.5 license. The book aims to be a resource for those interested in planning and implementing large-scale information infrastructures for novel electronic services in health care. The focus of this book is on the pivotal role of the installed base (i.e. the already existing elements of an infrastructure) for ensuing infrastructural development. The book presents rich empirical cases on the design, development and implementation of core infrastructural components (e-prescription and public patient-oriented web platforms) in different national settings across Europe. Therefore, this is a book in which theoretical insights and practical experiences are tightly connected. Contributions have been sourced from a network of academics that have been working on the topic for years, and who have previously collaborated and shared a common understanding of the challenges entailed in expanding information infrastructures within healthcare. The book aims to become a refrence for those seeking theoretical and empirical insights for conceptualizing and steering the evolution of information infrastructures in healthcare. The two types of systems (e-prescription and public patient-oriented web platforms) have been selected because they are widespread across Europe, because they invite comparisons, and because they are exemplary of two different types of aims. E-prescription initiatives are usually seen as opportunities to improve healthcare delivery by systematic and not dramatic change. Public patient-oriented web platforms are seen as opportunities to pursue wider and more radical innovation. This book targets researchers, practitioners and students who would benefit from a book providing a comprehensive view to contemporary approaches for the design and deployment of large-scale, inter-organizational systems within healthcare.

Best of Enemies Rainier George Weiner,2015-05-07 Suppose fate placed you on an inflatable life-raft in the middle of the freezing Atlantic Ocean along with your most bitter enemy contrivable? Would the emotions of hatred, revenge and love of country trump the desire to survive, if killing that enemy ensured your own demise? Captain Mat Richardson, USN, and Emil Gluckler, a German submarine commander, experience that option during the 2nd World War. Mat, captain of a small destroyer, and Emil, commander of an attacking submarine, become stranded on a life- raft after each of the combatant crafts sink each other during a fierce naval engagement. They subsequently experience 38 harrowing days striving for survival. If nothing else, this required the ultimate in mutual cooperation. If the two survived, would the events have a lasting effect on their relationship? Or, if one had the opportunity to kill the other at a later date in a new war-time circumstance, would he do so,
