Traumatic Loss and Recovery in Jungian Studies and Cinema Mark Holmwood, 2022-10-31 This book explores traumatic loss, grief, and recovery through the thoughtful combination of Abraham & Torok's 'crypt' theory, Jungian thought, and film theory to guide readers through the darkest places of the human psyche. Focusing on both the destructive and reconstructive choices people can make, the book explores prolonged grief disorder, complicated mourning, post-traumatic stress disorder, embitterment, disenfranchised grief, trauma-related rumination as well as mental, emotional and physical pain. Presented with real life examples and fictional ones, the book connects the psychoanalytic concepts of intrapsychic tomb and theoretra with Jungian concepts such as teleological model of the psyche, dreams, alchemical operations, shadow, archetypes, enantiodromia, symbols, and compensation on the canvas of modern grief theory. Traumatic Loss and Recovery in Jungian Studies and Cinema is important reading for

psychoanalysts, Jungian analysts, and psychotherapists with an interest in popular culture, as well as cinema students, scholars, and general readers interested in psychology, counselling, mental health and media studies.

Radioisotopes Nirmal Singh, 2011-10-21 The book *Radioisotopes - Applications in Physical Sciences* is divided into three sections namely: *Radioisotopes and Some Physical Aspects*, *Radioisotopes in Environment* and *Radioisotopes in Power System Space Applications*. Section I contains nine chapters on radioisotopes and production and their various applications in some physical and chemical processes. In Section II, ten chapters on the applications of radioisotopes in environment have been added. The interesting articles related to soil, water, environmental dosimetry/tracer and composition analyzer etc. are worth reading. Section III has three chapters on the use of radioisotopes in power systems which generate electrical power by converting heat released from the nuclear decay of radioactive isotopes. The system has to be flown in space for space exploration and radioisotopes can be a good alternative for heat-to-electrical energy conversion. The reader will very much benefit from the chapters presented in this section.
