Balsam Fir E. V. Bakuzis, H. L. Hansen, 1965-07-30 *Balsam Fir* was first published in 1965. Minnesota Archive Editions uses digital technology to make long-unavailable books once again accessible, and are published unaltered from the original University of Minnesota Press editions. Professors Bakuzis and Hansen, with the assistance of a number of co-authors of individual chapters, present an exhaustive survey of the literature on the balsam fir, providing a coherent picture of the species and its place in nature and forestry practice. The balsam fir is used extensively in the pulp and paper industry, and it is known to millions as a traditional Christmas tree. In North America it is a major tree species in Canada, in the northeastern United States, and in the Great Lakes region. In the search of the literature, over 2000 sources were consulted and considerably more than half of them are cited in the book. The references, organized in an ecological framework, cover the period from the seventeenth century to the present. The authors have reviewed and integrated these data in a unified, but multipurposed, book. In the integration of the source material the authors also made contributions of their own. The book contains the following chapters: Botanical Foundations, Geography and Synecology, Ecological Factors, Microbiology, Entomology, Reproduction, Stand Development, Growth and Yield, and Utilization. Appendixes list fungi and myxomycetes and insects associated with balsam fir. There are 30 illustrations, including a frontispiece drawing by the noted nature artist Francis Lee Jaques. The book will appeal to a wide range of readers specifically concerned with forestry, including research workers, educators, entomologists, pathologists, and managing foresters, as well as conservationists and wildlife biologist in general.

Fir Island and Conway Patricia Hanstad Pleas, Janet K. Utgard and Andrea Millward Xaver, 2017-03-20 The North Fork and the South Fork of the Skagit River were navigated by those searching for gold and land in the 1870s. Flooding became a deterrent for many, but those who stayed discovered an abundance of fertile soil and natural resources. Scandinavian immigrants, predominantly Norwegian, came to settle in the area, some with their families, and worked in logging and in farming. As the population grew, small towns and businesses were soon established. Skagit City and Fir were located on Fir Island; Conway and Milltown were located east of the island. In 1914, a bridge connected the island to the mainland, replacing the ferry at Mann's Landing. After many floods, the removal of logjams, and the arrival of the Great Northern Railroad, Mount Vernon began to prosper upriver, and the little towns began to disappear. Today, Fir Island and Conway are destinations for tourists who come to see snow geese and trumpeter swans during migration. Farmers continue to work the soil, and many descendants of pioneers still remain.
