Here, you will see the proud body of the sword God, appreciate the forbidden spell of the magician to destroy the world, and peep into the majesty of the holy kingdom of Warcraft. Fire Behavior Associated with the 1994 South Canyon Fire on Storm King Mountain, Colorado ,1998 In the aftermath of the deaths of 14 firefighters during the South Canyon Fire in July 1994, fire scientists assessed what occurred and suggested guidelines that may help firefighters avert such a tragedy in the future. This report describes the fuel, weather, and topographical factors that caused the transition from a relatively slow-spreading, low-intensity surface fire to a high-intensity, fast-spreading fire burning through the entire fuel complex, surface to crown. The analysis includes a detailed chronology of fire and firefighter movements, changes in the environmental factors affecting the fire behavior, and crew travel rates and fire spread rates. Eight discussion points apply directly to firefighter safety.

Fire in the United States; 1985-1994 (ninth edition) ,

The St. Bernard Fire Department in Hurricane Katrina , During Hurricane Katrina and the ensuing aftermath of floods caused by failed levees, St. Bernard Parish suffered some of the worst damage. The rescue of over 6,000 stranded, injured, and defenseless residents proved dangerous, traumatic, and lonely for the parish fire department. Firemen would quickly learn their roles were diverse and demanding, and they would find little help from outside sources. Acting as EMTs, rescue and recovery, mechanics, social workers, and providers for parish residents, they had to ignore their own losses and heartaches for days in order to save as many lives as they could, alone.
