Fire Engines Eddie Baker,2018-08-23 More complex and imposing than any other vehicle in the British emergency services, the fire engine has a long and interesting history. The earliest water pumps had been developed by the eighteenth century – basic manual pumps that had to be hauled around by people or horses, and were often only used on fire-insured premises. In the nineteenth and twentieth centuries horse-drawn, steam-powered fire engines, and eventually motorised fire engines, came to revolutionise firefighting, offering far greater versatility and the brigades came to be run by the municipalities. In this beautifully illustrated introduction, Eddie Baker charts the history of fire engines and their variants, and the increasingly complex equipment they have carried, such as high-rise ladders and high-pressure hoses. He also explains the wider history of the fire service and how the engines have been shaped by its needs and, most importantly, those of the firefighters themselves.

Fighting Fires S. Ewen,2009-11-27 The first full-length scholarly history of the British fire service, 1800-1978, this book scrutinizes how firemen created a professional public service incumbent upon municipal government. It examines the influence of major fires and leading personalities within the fire service in constructing a professional ethos for municipal fire brigades.

*Persistent, Bioaccumulative, and Toxic (PBT) Chemicals* Adam D. K. Abelkop,John D. Graham,Todd V. Royer,2018-10-08 Developed from the efforts of a multiyear, international project examining how persistent, bioaccumulative, and toxic (PBT) chemicals are evaluated and managed, *Persistent, Bioaccumulative, and Toxic (PBT) Chemicals: Technical Aspects, Policies, and Practices* focuses on improving the processes that govern PBTs. Incorporating science and policy literature—as well as interviews and panel discussions featuring experts from around the world—this book provides you with an international perspective of PBT policies (centering on Europe, Asia, and North America), and reveals major findings and recommendations for improving PBT science, laws, and policies. It includes case studies of specific chemicals, provides an introduction to the overall subject of toxic chemicals, and weighs in on science and policy expansion for PBTs. It also provides summary tables of important PBTs, and discussions on the number of PBTs in commerce, weight of evidence approaches, market deselection, and international management. The text: Assesses the history, current practice, and future of PBT management Considers the roles scientific data, modeling, and conventions play in identifying and regulating PBTs Explores the number of PBTs in commerce and the growing role of weight of evidence (WOE) in the making of PBT determinations Identifies issues that are likely to come up in WOE judgments Examines international, national, subnational, and regional PBT policies Includes a comprehensive and easy-to-understand analysis of PBT science and policy This book reviews the current science, policies, and practices surrounding the regulation of PBTs. It also provides relevant research, recommendations, and suggestions for improving the management and oversight of PBTs.

**Spon's Architects' and Builders' Price** Davis Langdon,2006-05-17 Spon's Architects' and Builders' Price Book 2004 is the most detailed, professionally relevant source of construction price information currently available anywhere. With competition growing fiercer throughout the industry and with increasing pressure to obtain a 'competitive advantage', the A and B's unique tender index will be more valuable than ever before. This is the only price book that publishes details of its cost base in such a way that it can be adjusted to allow for market conditions that affect building prices. A separate minor works section on coloured paper covers contracts of around £65,000 in value. The A and B comes with a 'free' CDROM that enables the reader to view the entire book on screen, cut and paste prices into other tender documents, export to other major packages, perform simple calculations, index search, produce estimate and tender documents and adjust rates and data. This complete package now means that Spon's Architects' and Builders' Price Book 2004 is now better than ever and is a resource that no building firm, surveyor or architect should be without. New features in this 129th edition include: an easier-to-read format; information on, and incorporating, the new CICJ three year wage agreement, effective from Monday, 30th June 2003. It also includes additional items for: hot and cold water piping systems; additional building boards and external wall cladding; further aluminium systems curtain walling; western red cedar external wall cladding; fire retardant steel beams; metal and glazed balustrading; sarnafil roofing and acoustic sliding partitions.
