**The Client-Centered Law Firm** Jack Newton, 2020-03-31 The legal industry has long been risk averse, but when it comes to adapting to the experience-driven world created by companies like Netflix, Uber, and Airbnb, adherence to the old status quo could be the death knell for today's law firms. In *The Client-Centered Law Firm*, Clio cofounder Jack Newton offers a clear-eyed and timely look at how providing a client-centered experience and running an efficient, profitable law firm aren't opposing ideas. With this approach, they drive each other. Covering the what, why, and how of running a client-centered practice, with examples from law firms leading this revolution as well as practical strategies for implementation, *The Client-Centered Law Firm* is a rallying call to unlock the enormous latent demand in the legal market by providing client-centered experiences, improving internal processes, and raising the bottom line.

**Modeling Techniques in Predictive Analytics** Thomas W. Miller, 2014-10 Today, successful firms win by understanding their data more deeply than competitors do. They compete based on analytics. In *Modeling Techniques in Predictive Analytics, Revised Edition*, the leader of Northwestern University's prestigious analytics program brings together all the up-to-date concepts, techniques, and R code you need to excel in analytics. Thomas W. Miller's balanced approach combines business context and quantitative tools, appealing to managers, analysts, programmers, and students alike. This Revised Edition is updated with new sources throughout, and has been reorganized to be completely modular. Each chapter now stands completely on its own - thereby supporting even more flexible learning paths, and helping readers quickly access all the knowledge they need to solve any category of problem. Miller addresses multiple business challenges and business cases, including segmentation, brand positioning, product choice modeling, pricing research, finance, sports, Web and text analytics, and social network analysis. He illuminates the use of cross-sectional data, time series, spatial, and even spatio-temporal data. For each problem, Miller explains: Why the problem is significant What data is relevant How to explore your data How to model your data - first conceptually, with words and figures; and then with mathematics and programs Miller walks through model construction, explanatory variable subset selection, and validation, demonstrating best practices for improving out-of-sample predictive performance. He employs data visualization and statistical graphics in exploring data, presenting models, and

evaluating performance. Extensive example code is presented in R, today's #1 system for applied statistics, statistical research, and predictive modeling; all code is set apart from other text so it's easy to find for those who want it (and easy to skip for those who don't).

*The Enforcers* Rob Wells, 2019-11-18 In the 1980s, real estate developer and banker Charles H. Keating executed one of the largest savings and loans frauds in United States history. Keating had long used the courts to muzzle critical reporting of his business dealings, but aggressive reporting by a small trade paper called the National Thrift News helped bring down Keating and offered an inspiring example of business journalism that speaks truth to power. Rob Wells tells the story through the work of Stan Strachan, a veteran financial journalist who uncovered Keating's misdeeds and links to a group of US senators—the Keating Five—who bullied regulators on his behalf. Editorial decisions at the National Thrift News angered advertisers and readers, but the newsroom sold ownership on the idea of investigative reporting as a commercial opportunity. Examining the National Thrift News's approach, Wells calls for a new era of business reporting that can—and must—embrace its potential as a watchdog safeguarding the interests of the public.

**Bioseparations Science and Engineering** Roger G. Harrison, Paul W. Todd, Scott R. Rudge, Demetri P. Petrides, 2015-01-27 Designed for undergraduates, graduate students, and industry practitioners, *Bioseparations Science and Engineering* fills a critical need in the field of bioseparations. Current, comprehensive, and concise, it covers bioseparations unit operations in unprecedented depth. In each of the chapters, the authors use a consistent method of explaining unit operations, starting with a qualitative description noting the significance and general application of the unit operation. They then illustrate the scientific application of the operation, develop the required mathematical theory, and finally, describe the applications of the theory in engineering practice, with an emphasis on design and scaleup. Unique to this text is a chapter dedicated to bioseparations process design and economics, in which a process simulator, SuperPro Designer® is used to analyze and evaluate the production of three important biological products. New to this second edition are updated discussions of moment analysis, computer simulation, membrane chromatography, and evaporation, among others, as well as revised problem sets. Unique features include basic information about bioproducts and engineering analysis and a chapter with bioseparations laboratory exercises. *Bioseparations Science and Engineering* is ideal for students and professionals working in or studying bioseparations, and is the premier text in the field.

*Fundamental Analysis* Eugenio Milani, 2019-08-26 Fundamental Analysis is the method to understand market trends. Being able to predict the trend of a market, be it stock exchange, forex, commodities or any other product, is the skill you need to make profitable trading. That's why you need fundamental analysis. Unlike technical analysis, the fundamental analysis takes into account

many variables relating to the context in which the product operates and allows you to make long-term evaluations, without having to follow signals or indicators daily. What sets Fundamental Analysis apart from any other market analysis technique is the ability to base one's strategy not on historical or past facts, but on what is happening at the exact moment you decide to invest.
