Introduction When it comes to defining first aid, it means the immediate care provided to an ill or injured person before a proper medical treatment is availed. In other words, first aid can be regarded as the life saving measures. But, why is it so important to know about first aid? The main

purpose of first aid is to save the lives of people in life threatening accidental situations when no help is around. No doubt, the era we live in is the era of technologies, machines and modern vehicles, but unfortunately we are utilizing these facilities at the cost of our precious lives. The incidences of fire cases and road side accidents have been increasing for the past few decades. But, in most of the accidental situations, the death of the victim happens due to the lack of immediate medical treatment. Sometimes, it is not possible for the ambulance or a doctor to reach to the calamity stricken location immediately. What would you do if a friend of yours was choking in front of you and none of the people are around you was a doctor? Obviously, you just wouldn't let your friend die in front of your eyes. This is where your training or knowledge of first aid would come handy, if you had any. By knowing the first aid skills, you might be at least able to save the life of victims on the spot before help could arrive. This clearly portrays the importance of first aid training. The number of precious lives that we lose every year in accidents can be significantly reduced by promoting the concept of first aid training. This basic purpose of this book is to teach you different techniques and maneuvers that everyone should at least have some knowledge about. Who knows when you might face an emergency? It's better to be prepared than not. So, buckle your seat belts and dive into the world of handy first aid skills that you should know. I'm sure by the time you reach the end of this book, you'll be happy that you came across

something this good.

*Prepper's Survival Medicine Handbook* Timothy S. Morris, 2014-12 *Prepper's Survival Medicine Handbook: The Ultimate Prepper's Guide to Preparing Emergency First Aid and Survival Medicine for You and Your Family* Are you wondering how to perform first aid techniques and administer survival medicine during any situation? One of the most overlooked, yet vitally important, aspects of any survival situation is medical treatment.

Following a catastrophic event, emergency medical responders will be overburdened (to say the least) and unable to respond to many calls for assistance as these departments struggle to categorize emergencies based on severity and a host of other factors that likely depend on the situation. Even in less extreme cases, think about the last time you called 911 or had to go to the ER following an injury. How long did it take to receive treatment? Were you satisfied with the results of the medical care you paid for? And if you live in a rural area, an emergency medical response could take hours in the best of circumstances. Sprinkle in some bad weather or a regional catastrophe and the reality is that you may not receive the assistance you need in time. It's for this reason that understanding at least the basics of both emergency first aid and survival medicine are essential to any survival plan. Discover how to provide first aid, perform CPR and lots of other life-saving techniques. Also, you'll discover.. *First Aid Book* Andrew Larry, 2021-07-13 First aid is the assistance that one gives to a person who has an emergency medical condition such as serious bleeding, choking, or the need for CPR. It is essential for people who may not be trained in other areas of healthcare. For example, paramedics are valuable because they have medical training and equipment to handle more serious emergencies than someone without those qualifications. It is important to learn First Aid because it can help save someone's life. This is especially true for those who do not have training in other areas of healthcare and are the first to respond to emergencies. It is also important because a person's life may be saved by knowing how to provide basic assistance in an emergency through CPR, or the Heimlich maneuver. Within the United States alone, about 300,000 people die from heart disease every year (CDC). One should be able to give correct CPR because it could relieve a person from cardiac arrest until medical professionals can arrive. First Aid could also be useful for many other reasons such as burns, bleeding, and bone and muscle injuries. The purpose of this book is to inform the reader of the information needed to help someone with an emergency and to provide tips for how to respond if confronted with one.

When learning how to give first aid, it is important to know who would be more appropriate for the situation. First aid training can be done in a classroom setting, but it may not be necessary. There are many reasons why an individual would need first aid training and how it could benefit them or others. The most important reason why one would need first aid is because they may not have any other medical training (CDC). The information you learn will be useful in the future to save a person's life. The following are a few reasons why it is important to have first aid training: This book covers: General First Aid Knowledge First Aid Knowledge to be Mastered and Developed Drugs Used in First Aid Common Types of Drug Administration Sites Splints for Broken Bones and Joints Gravity First Aid Development of Basic First Aid Skills Special Needs of the Elderly People and Handicapped People in Case of Illness or Accident Pregnancy in Case of an Accident Childbirth in Case of an Accident And much more... Everyone should know how to give basic first aid such as bandaging wounds, splints, and using an oxygen mask. Knowing how to provide these types of first aid may be useful in the future. For example, someone who has an injury may not have any medical training; however, they could be able to give good quality first aid if they were educated on the subject. Also, knowing how to help with a burn or bleeding wound allows one to help with painlessly. Also, it could save the person's life until medical professionals arrive. This book will surely help you in getting the right knowledge, skills and attitude to become a

good first-aider. This book will cover step by step instructions on how to save someone's life.
