Practical Rendering and Computation with Direct3D 11 Jason Zink,Matt Pettineo,Jack Hoxley,2016-04-19 Direct3D 11 offers such a wealth of capabilities that users can sometimes get lost in the details of specific APIs and their implementation. While there is a great deal of low-level information available about how each API function should be used, there is little documentation that shows how best to leverage these capabilities. I have found it very useful as it has well outlined steps to help carry out minor ops safely and covers quite a wide range of simple procedures commonly done in primary care. It also has illustrations and useful hints to avoid mistakes. In all, a must buy for any GP/GP trainee who wants that extra bit of guidance with practical procedures. Excellent book for GPs not only useful for those who are interested in minor surgery but to use in day to day practice. Very useful for those who want to improve practical skills. Easy explanations, detailed description, good illustrations. Very detailed description of procedures, good illustration, makes minor surgery easy for everybody who is motivated to start! A really useful reference for GPs providing minor surgery procedures, but also for GPs looking either to set up an enhanced service, or to expand their existing one. Well written, great illustrations; highlyrecommended. Note from the publisher:This book will help you to understand what is possible and to remind you how to do the procedures correctly. It is not a substitute for gaining relevant practical experience through expert supervision or at a specialist training course, such as one of those run by the RCGP.

3D Game Engine Design David Eberly,2006-11-03 The first edition of 3D Game Engine Design was an international bestseller that sold over 17,000 copies and became an industry standard. In the six years since that book was published, graphics hardware has evolved enormously. Hardware can now be directly controlled through techniques such as shader programming, which requires an entirely new thought process of a programmer. In a way that no other book can do, this new edition shows step by step how to make a shader-based graphics engine and how to tame this new technology. Much new material has been added, including more than twice the coverage of the essential techniques of scene graph management, as well as new methods for managing memory usage in the new generation of game consoles and portable game players. There are expanded discussions of collision detection, collision avoidance, and physics—all challenging subjects for developers. The mathematics coverage is now focused towards the end of the book to separate it from the general discussion. As with the first edition, one of the most valuable features of this book is the inclusion of Wild Magic, a commercial quality game engine in source code that illustrates how to build a real-time rendering system from the lowest-level details all the way to a working game. Wild Magic Version 4 consists of over 300,000 lines of code that allows the results of programming experiments to be seen immediately. This new version of the engine is fully shader-based, runs on Windows XP, Mac OS X, and Linux, and is only available with the purchase of the book.

Portable Shell Programming Bruce Blinn,1996 One element that the Korn shell does not contain is portability. Bruce Blinn focuses on shells that are portable, known as Bourne Shells. This practical book treats the shell like a programming language. Lists over 250 major shell examples.

COVID-19 and Risk Alaszewski, Andy,2021-03-09 Risk has emerged as a key mechanism for controlling the future and learning from past misfortunes. How did risk influence policy makers' responses to COVID-19? How will they be judged for their decisions? Drawing on case studies from the UK, China, Japan, New Zealand and the US, this original text explores policy responses to COVID-19 through the lens of risk. The book considers how different countries framed the pandemic, categorised their populations and communicated risk. It also evaluates the role of the media, conspiracy theories and hindsight in shaping responses to COVID-19. As we reflect on the 'first wave', this book offers a vital resource for anticipating future responses to crises.

Shadow and Light Parris Quinn,2012-11 After the light of day, some people like to unwind in the shadow and let out steam in unusual ways. One man likes to be his woman's slave, one woman dares her boyfriend to watch as she services a group of bankers, another gets a leash on her collar and lets her animal instincts run wild in front of her lover's camera. Shadow & Light is a beautifully rendered erotic comic and the first in an exciting series.

Buddhism and Politics in Twentieth Century Asia Ian Harris,2010-07-15 In this study, a team of international scholars assess the manner in which Buddhist organizations and individuals have resisted, come to terms with, or in some cases allied themselves with the forces of war, modernity, westernization, nationalization, capitalism, communism, and ethnic conflict. By examining issues such as left-right divisions in the monastic order, the rise of organized lay movements, Buddhist social activism, as well as explicitly Buddhist inspired political activity, this book seeks to demonstrate that the emphasis on meditation and mental training is only one strand in this richly complex world historical tradition.

Inside Installations Tatja Scholte,Glenn Wharton,2011 Anything is possible in installation art. The typically short lifespan of the materials and techniques used and

the intended experience can be endless, often to the despair of the custodian of the work. The processes involved in preserving this complex form of art, reinstalling it, finding ways to recreate the experience over and again, as well as the decisionmaking that underlies these processes, form the backbone of this book. What did the artist originally intend and how has that concept been realised in the past? How can one preserve and document the installation? What relation exists between the components and the space, and what is the spectator's part in the work? Questions of this kind are examined in connection with a number of case studies. At the same time, it reports on the results of an extensive research project Inside Installations (2004–2007) carried out by an international group of custodians active in the conservation of contemporary art. Tatja Scholte is programme manager at the Cultural Heritage Agency of the Netherlands (RCE) and specialised in the theory of contemporary art conservation. Dr. Glenn Wharton serves as Media Conservator at the Museum of Modern Art in New York. He is also on faculty in the Museum Studies Program at New York University, and was the founding Executive Director of INCCA-NA, the North American group of the International Network for the Conservation of Contemporary Art.
