Massive and Irreparable Rotator Cuff Tears Nuno Sampaio Gomes,Ladislav Kovačič, Frank Martetschläger, Giuseppe Milano,2020-04-22 This book offers a truly comprehensive overview of the understanding and treatment of massive and irreparable rotator cuff tears, a painful and disabling shoulder condition that continues to pose major challenges. A thorough examination of basic science issues and evidence lays the foundation for discussion of key controversies in the field and exposition of a practical approach to treatment in which the role of both conservative and surgical management is explained. Special insights are provided into the new biological and nonoperative approaches that are becoming increasingly popular among practitioners. All potential surgical techniques are described, from partial repair and tendon transfer, to the use of dedicated implants. In addition, the value of anesthesia and regional blocks, both during surgery and in the postoperative phase, is discussed. The concluding section addresses particularly complex scenarios and offers guidance on the management of treatment complications and failures. Written by leading international shoulder experts, the book will be of value for shoulder surgeons, rehabilitators, and other health care practitioners.

*Frontiers in Electronics* Yoon-Soo Park,Michael Shur,William Tang,2002 The 2002 Workshop on Frontiers in Electronics was the third in the series of WOFE workshops. Over 70 leading experts from academia, industry, and government agencies reported on the most recent developments in their fields and exchanged views on future trends and directions of the electronics and photonics industry. The issues they addressed ranged from system-on-chip to DNA doping, from ultrathin SOI to electrotiles, from photonics integration on the ULSI platform to wide band gap semiconductor devices and solid state lighting. The rapid pace of electronic technology evolution compels a merger of different technical areas, and WOFE-02 provided a unique opportunity for cross-fertilization of the

emerging fields of microelectronics, photonics, and nanoelectronics. The workshop was informal and stimulated provocative views, visionary outlooks, and discussions on controversial issues. Preferences in Negotiations Henner Gimpel,2007-06-13 The attachment effect can hinder effective negotiation. Parties are influenced by their subjective expectations formed on account of the exchange of offers, they form reference points, and loss aversion potentially leads to a change of preferences when expectations change. This book presents a motivation, formalization, and substantiation of the attachment effect. The results can be used for prescriptive advice to negotiators.
