Migration Guide to Firebird 3 Carlos Cantu, 2016-07-31 Why a Migration Guide? Firebird 3 brings numerous innovations, such as the long-awaited full SuperServer's SMP support, network and database encryption, local user authentication in the database, improvements in the communication protocol, in addition to several new features in different areas of the DBMS. All this made the migration process from an older Firebird version a bit more complicated than it was in previous versions, where, basically, all you had to do was replace the server with the new Firebird version or, at worst, a backup and restore of the database. Moving to Firebird 3 can be a tricky process, and this Guide will help you in the process of migrating your existing databases and servers to Firebird 3, avoiding headaches and bad surprises! It also will give you tips regarding the use of Firebird 3 with legacy applications.
