OECD

Regional Economic Outlook, October 2010, Sub-Saharan Africa International Monetary Fund. African Dept., 2010-10-25 The October 2010 Regional Economic Outlook features: (i) an overview of economic developments and prospects in sub-Saharan Africa; (ii) an analytical assessment of how monetary policy changes are transmitted through the region's economies; and (iii) a study of why growth rates in the West African Economic and Monetary Union (WAEMU) have lagged behind other parts of sub-Saharan Africa. The overview highlights the broad-based economic recovery that is now under way in sub-Saharan Africa and projects growth of 5 percent in 2010 and 5 1/2 percent in 2011. It explores the resilience of most economies in the region to the global financial crises of 2007-09 and explains why sound economic policy implementation and a growing orientation of trade toward Emerging Asia are expected to continue to underpin growth. The second chapter provides evidence suggesting that monetary policy may have more power to influence monetary conditions than previously assumed. Main messages from the WAEMU study are the importance of strong policy environments and political stability for achieving sustained growth; and of robust fiscal frameworks for directing resources towards priority spending needs.

World Economic Outlook, April 2016 International Monetary Fund. Research Dept., 2016-04-12 Major macroeconomic realignments are affecting prospects differentially across the world's countries and regions. The April 2016 WEO examines the causes and implications of these realignments—including the slowdown and rebalancing in China, a further decline in commodity prices, a related slowdown in investment and trade, and declining capital flows to emerging market and developing economies—which are generating substantial uncertainty and affecting the outlook for the global economy. Additionally, analytical chapters examine the slowdown in capital flows to emerging market economies since their 2010 peak—its main characteristics, how it compares with past slowdowns, the factors that are driving it, and whether exchange rate flexibility has changed the dynamics of the capital inflow cycle—and assess whether product and labor market reforms can improve the economic outlook in advanced economies, looking at the recent evolution and scope for further reform, the channels through which reforms affect economic activity under strong versus weak economic conditions, reforms' short- to medium-term macroeconomic effects, and sequencing of reforms and coordination with other policies to maximize their potential quantitative economic benefits. A special feature analyzes in depth the energy transition in an era of low fossil fuel prices.

India International Monetary Fund. Monetary and Capital Markets Department, 2017-12-21 This paper discusses the findings of the Financial System Stability Assessment for India. Since the 2011 Financial Sector Assessment Program, India has recorded strong growth in both economic activity and financial assets, supported by important structural reforms and terms of trade gains. Increased diversification, commercial orientation, and technology-driven inclusion have supported growth in the financial industry, backed by improved legal, regulatory, and supervisory frameworks. Yet, the financial sector is facing considerable challenges, and economic growth has recently slowed down. High nonperforming assets (NPAs) and slow deleveraging and repair of corporate balance sheets are testing the resilience of the banking system, and holding back investment and growth. The authorities have been pursuing policies to accelerate the process of NPA resolution.

*OECD Economic Surveys: Costa Rica 2023* OECD,2023-02-06 Costa Rica recovered well from the pandemic-induced recession. Sustained and resilient export performance continues to support growth, while consumption is hindered by high inflation and unemployment. The fiscal situation improved but remains challenging, requiring sustained efforts to contain spending and boost public sector efficiency for several years.

*Mali* International Monetary Fund,2008-12-22 This paper presents Mali's First Review under the Poverty Reduction and Growth Facility, and requests for Waiver of Nonobservance of Performance Criteria. The food and fuel price shocks have begun to moderate, partly because of the authorities' supply-side measures and declining oil prices. New risks are emerging from the global credit crisis and its spillover effects onto global growth, commodity markets, and exchange rates. The authorities need to be vigilant on the fiscal front because policies have relaxed owing to external food and fuel price shocks and higher-than-expected nondebt financing.
