2030: How Today's Biggest Trends Will Collide and Reshape the Future of Everything Mauro F. Guillén, 2020-08-25 AN INTERNATIONAL BESTSELLER Wall Street Journal Bestseller A Porchlight Book Bestseller Financial Times Best Books of 2020 Yahoo Finance Favorite Business Books of 2020 JP Morgan NextList 2021 selection Bold, provocative...illuminates why we're having fewer babies, the middle class is stagnating, unemployment is shifting, and new powers are rising." —ADAM GRANT The world is changing drastically before our eyes—will you be prepared for what comes next? A groundbreaking analysis from one of the world's foremost experts on global trends, including analysis on how COVID-19 will amplify and accelerate each of these changes. Once upon a time, the world was neatly divided into prosperous and backward economies. Babies were plentiful, workers outnumbered retirees, and people aspiring towards the middle class yearned to own homes and cars. Companies didn't need to see any further than Europe and the United States to do well. Printed money was legal tender for all debts, public and private. We grew up learning how to play the game, and we expected the rules to remain the same as we took our first job, started a family, saw our children grow up, and went into retirement with our finances secure. That world—and those rules—are over. By 2030, a new reality will take hold, and before you know it: - There will be more grandparents than grandchildren - The middle-class in Asia and Sub-Saharan Africa will outnumber the US and Europe combined - The global economy will be driven by the non-Western consumer for the first time in modern history - There will be more global wealth owned by women than men - There will be more robots than workers - There will be more computers than human brains - There will be more currencies than countries All these trends, currently underway, will converge in the year 2030 and change everything you know about culture, the economy, and the world. According to Mauro F. Guillen, the only way to truly understand the global transformations underway—and their impacts—is to think laterally. That is, using “peripheral vision,” or approaching problems creatively and from unorthodox points of view. Rather than focusing on a single trend—climate-change or the rise of illiberal regimes, for example—Guillen encourages us to consider the dynamic inter-play between a range of forces that will converge on a single tipping point—2030—that will be, for better or worse, the point of no return. 2030 is both a remarkable guide to the coming changes and an exercise in the power of “lateral thinking,” thereby revolutionizing the way you think about cataclysmic change and its consequences.

Post 2030-Agenda and the Role of Space Annette Froehlich, 2018-06-13 This book provides a deep insight to which extent further improvement should be envisaged to ensure and improve the sustainable development beyond 2030 (the Sustainable Development Goals is a set of 17 global goals with 169 associated targets which the state community adopted in 2015). As the world, its environment, economy and society is getting more and more technical advanced, it is of high interest to analyze how space and its various applications can support this development. Once the Goals of the “2030 Agenda for Sustainable Development” will be achieved new challenges are waiting. The analysis takes into account a proactive use of artificial intelligence for the development based on space infrastructure. Another important aspect revolves around the economic development which asks for further analysis of the cryptocurrencies relationship with space applications and how to use space based cryptocurrencies for development. Environment-wise the challenges for a sustainable development on Earth i.e. water supply, but also in outer space are requested ensuring a sustainable exploration and exploitation of space and its orbital resources. The book also highlights possible contributions of the post-2030 space industry to global economic development based on satellite technology and the enlargement of the scope of application of satellite data in administration and Justice to ensure development of effective, accountable and transparent institutions at all levels to promote growth, stability and security and peace on global level.

Utopia 2030 Ellie Ghassali, 2021-08 New technological & scientific breakthroughs are changing the world for the better or worse. You have to be fully versed on the MOST IMPORTANT developments to ensure you are making competent decisions for us all. There are grave moral & ethical concerns that are not being adequately addressed that you must rectify. This book will teach you the following information to empower you: Specific examples of new technology presented in an easy to digest format. Specific examples of new scientific discoveries you need to know about life. How these advancements are now changing the world for the better or worse. How the world is changing from the pandemic turmoil & continued globalization. How to harness our new technological capabilities to create our Utopia by 2030. Remember that time in history when we thought the earth was the center of the universe? Well this is like that time, because now we have new models for how our solar system, galaxy & the universe functions. There are new models for how the cellular world looks, how atoms look & how the brain works. These are fundamental aspects of reality that you are completely oblivious about & the less you know, the more powerless you are. Knowledge is power & with great power comes great responsibility to act for what's right. You can't be a force for good if you don't have the vital knowledge to determine what's right & wrong in this constantly evolving world of things. You have a choice to make, because you're either ready to learn everything or you'd rather remain oblivious in your own little world. (Non-Fiction) www.Utopia2030.com

2030 Albert Brooks, 2011-05-10 Is this what's in store? June 12, 2030 started out like any other day in memory—and by then, memories were long. Since cancer had been cured fifteen years before, America's population was aging rapidly. That sounds like good news, but consider this: millions of baby boomers, with a big natural predator picked off, were sucking dry benefits and resources that were never meant to hold them into their eighties and beyond. Young people around the country simmered with resentment toward the olds and anger at the treadmill they could never get off of just to maintain their parents' entitlement programs. But on that June 12th, everything changed: a massive earthquake devastated Los Angeles, and the government, always teetering on the edge of bankruptcy, was unable to respond. The fallout from the earthquake sets in motion a sweeping novel of ideas that pits national hope for the future against assurances from the past and is peopled by a memorable cast of refugees and billionaires, presidents and revolutionaries, all struggling to find their way. In 2030, Albert Brooks' all-too-believable, dystopian imagining of where today's challenges could lead us tomorrow makes gripping and thought-provoking reading.

2030 Rutger van Santen, Djan Khoe, Bram Vermeer, 2010-09-15 Imagine living in 1958, and knowing that the integrated circuit--the microchip--was about to be invented, and would revolutionize the world. Or imagine 1992, when the Internet was about to transform virtually every aspect of our lives. Incredibly, this book argues that we stand at such a moment right now--and not just in one field, but in many. In 2030, authors Rutger van Santen, Djan Khoe, and Bram Vermeer interview over two dozen scientific and technological experts on themes of health, sustainability and communication, asking them to look forward to the year 2030 and comment on the kind of research that will play a necessary role. If we know what technology will be imperative in 2030, the authors reason, what can we do now to influence future breakthroughs? Despite working in dissimilar fields, the experts called upon in the book - including Hans Blix (Head of the UN investigation in Iraq), Craig Venter (explorer of the human DNA), and Susan Greenfield (a leading world authority on the human brain), among many others - all emphasize the interconnectedness of our global networks in technology and communication, so tightly knit that the world's major conflicts are never isolated incidents. A fresh understanding of the regularities underlying these complex systems is more important than ever. Using bright, accessible language to discuss topics of universal interest and relevance, 2030 takes the position that we can, in fact, influence the course of history. It offers a new way of looking forward, a fresh perspective on sustainability, stability and crisis-prevention. For anyone interested in modern science, this book will showcase the technologies that will soon change the way we live.

Hello from 2030 Jan Paul Schutten,2014-10-07 Would you like to know the future? And, will it be what we think it will be, or will today's predictions be laughably wrong? In *Hello from 2030*, middle graders get a peek at what's coming just around the corner. In the year 2030, today's kids will be grappling with issues adults are just starting to address now. No, not flying cars: real world conundrums like, what will 8 billion people eat? How can humans produce less trash? Which cool technologies will be used to figure all this out? And, how do people predict the future anyway? This book gives kids not only plenty to dream, argue, and think about, but also a first-hand look at futurology, the science of predicting the future.--

The 2030 Spike Colin Mason,2003 The clock is relentlessly ticking Our world teeters on a knife-edge between a peaceful and prosperous future for all, and a dark winter of death and destruction that threatens to smother the light of civilization. Within 30 years, in the 2030 decade, six powerful 'drivers' will converge with unprecedented force in a statistical spike that could tear humanity apart and plunge the world into a new Dark Age. Depleted fuel supplies, massive population growth, poverty, global climate change, famine, growing water shortages and international lawlessness are on a crash course with potentially catastrophic consequences. In the face of both doomsaying and denial over the state of our world, Colin Mason cuts through the rhetoric and reams of conflicting data to muster the evidence to illustrate a broad picture of the world as it is, and our possible futures. Ultimately his message is clear; we must act decisively, collectively and immediately to alter the trajectory of humanity away from catastrophe. Offering over 100 priorities for immediate action, *The 2030 Spike* serves as a guidebook for humanity through the treacherous minefields and wastelands ahead to a bright, peaceful and prosperous future in which all humans have the opportunity to thrive and build a better civilization. This book is powerful and essential reading for all people concerned with the future of humanity and planet earth.

2030 Amy Zuckerman,James Daly,2009-03-19 Winner of the 2012 Grand Canyon Reader Award for a Non-fiction book Global events and new technology change how we live from moment to moment. So, what will our world be like in twenty years? Come take a look as futurists Amy Zuckerman and James Daly examine what a kid's daily life might be like in the year 2030. Inspired and informed by trends and scientific and technological research, 2030 is not only a peek at some cool future gadgets (talking dog collars, cars that drive themselves), but also a thoughtful examination of how our lives might be impacted as we adjust to environmental change.

Thermageddon Robert Hunter,2003 He and many respected scientists believe that all environmental lines will be crossed around the year 2030, when climate change will be so extreme as to be irreversible and what he calls Thermageddon - thermal Armageddon - may ensue..

UNESCO science report UNESCO,2015-11-09 There are fewer grounds today than in the past to deplore a North-South divide in research and innovation. This is one of the key findings of the UNESCO Science Report: towards 2030. A large number of countries are now incorporating science, technology and innovation in their national development agenda, in order to make their economies less reliant on raw materials and more rooted in knowledge. Most research and development (R&D) is taking place in high-income countries, but innovation of some kind is now occurring across the full spectrum of income levels according to the first survey of manufacturing companies in 65 countries conducted by the UNESCO Institute for Statistics and summarized in this report. For many lower-income countries, sustainable development has become an integral part of their national development plans for the next 10-20 years. Among higher-income countries, a firm commitment to sustainable development is often coupled with the desire to maintain competitiveness in global markets that are increasingly leaning towards 'green' technologies. The quest for clean energy and greater energy efficiency now figures among the research priorities of numerous countries. Written by more than 50 experts who are each covering the country or region from which they hail, the UNESCO Science Report: towards 2030 provides more country-level information than ever before. The trends and developments in science, technology and innovation policy and governance between 2009 and mid-2015 described here provide essential baseline information on the concerns and priorities of countries that could orient the implementation and drive the assessment of the 2030 Agenda for Sustainable Development in the years to come.

2030 Amy Zuckerman,James Daly,2009-03-19 Winner of the 2012 Grand Canyon Reader Award for a Non-fiction book Global events and new technology change how we live from moment to moment. So, what will our world be like in twenty years? Come take a look as futurists Amy Zuckerman and James Daly examine what a kid's daily life might be like in the year 2030. Inspired and informed by trends and scientific and technological research, 2030 is not only a peek at some cool future gadgets (talking dog collars, cars that drive themselves), but also a thoughtful examination of how our lives might be impacted as we adjust to environmental change.

America 2030 Ben Shapiro,2017-11-27 The year is 2030 and the America you know is gone. In its place are streets lined with panhandlers, inescapable crime, empty schools, overflowing hospices, abandoned churches, and stranglehold restrictions on what you can buy, say, and believe. New York Times bestselling author Ben Shapiro's *America 2030* is not fiction; it is a serious projection of things to come if our country continues down its current path. In between narrative snapshots of our dystopian future, Shapiro looks at the policies and people who put America's frightening transformation in motion.

Leading Health Indicators 2030 National Academies of Sciences, Engineering, and Medicine,Health and Medicine Division,Board on Population Health and Public Health Practice,Committee on Informing the Selection of Leading Health Indicators for Healthy People 2030,2020-04-05 Beginning in 1979 and in each subsequent decades, the U.S. Department of Health and Human Services (HHS) has overseen the Healthy People initiative to set national goals and objectives for health promotion and disease prevention. At the request of HHS, this study presents a slate of Leading Health Indicators (LHIs) that will serve as options for the Healthy People Federal Interagency Workgroup to consider as they develop the final criteria and set of LHIs for Healthy People 2030.

Global Trends 2030 National Intelligence Council,2018-02-07 This important report, *Global Trends 2030-Alternative Worlds*, released in 2012 by the U.S. National Intelligence Council, describes megatrends and potential game changers for the next decades. Among the megatrends, it analyzes: - increased individual empowerment - the diffusion of power among states and the ascent of a networked multi-polar world - a world's population growing to 8.3 billion people, of which sixty percent will live in urbanized areas, and surging cross-border migration - expanding demand for food, water, and energy It furthermore describes potential game changers, including: - a global economy that could thrive or collapse - increased global insecurity due to regional instability in the Middle East and South Asia - new technologies that could solve the problems caused by the megatrends - the possibility, but by no means the certainty, that the U.S. with new partners will reinvent the international system Students of trends, forward-looking entrepreneurs, academics, journalists and anyone eager for a glimpse into the next decades will find this essential reading.

The World in 2030 UNESCO,2021-12-31

Replacing GDP by 2030 Rutger Hoekstra,2019-05-30 Proposes an new strategy for the beyond-GDP community which aims to replace the economic paradigm centred on Gross Domestic Product (GDP) by 2030.

Contours of the World Economy 1-2030 AD Angus Maddison,2007-09-20 This book seeks to identify the forces which explain how and why some parts of the world have grown rich and others have lagged behind. Encompassing 2000 years of history, part 1 begins with the Roman Empire and explores the key factors that have influenced economic development in Africa, Asia, the Americas

and Europe. Part 2 covers the development of macroeconomic tools of analysis from the 17th century to the present. Part 3 looks to the future and considers what the shape of the world economy might be in 2030. Combining both the close quantitative analysis for which Professor Maddison is famous with a more qualitative approach that takes into account the complexity of the forces at work, this book provides students and all interested readers with a totally fascinating overview of world economic history. Professor Maddison has the unique ability to synthesise vast amounts of information into a clear narrative flow that entertains as well as informs, making this text an invaluable resource for all students and scholars, and anyone interested in trying to understand why some parts of the World are so much richer than others.

2030, the Coming Tumult Richard M. Mosey,2009 The short-term benefits of unlimited growth are driving the American economic and social model right off a cliff. The author shows how corporations drown out scientists and global elites prosper during economic collapse. He explores the role of monotheistic religions in abetting population growth and downplaying human agency in the current unprecedented crisis and charts the effects of increasing poverty, population migration, and social tension.

2030 Robert Hunter,2002 In 2030, Bob Hunter has drawn on the experience of a lifetime to argue that our time is running out on planet Earth. He, and many respected scientists, believe that all environmental lines will be crossed around the year 2030. By that time, climate change will be so extreme as to be irreversible. The burning off of the planet's ozone layer and the melting of the polar ice cap – with its attendant disruption of ocean currents and flooding of low-lying areas around the world – will be impossible to stop. In this book, he produces the scientific evidence for global warming – and the role we all play in it. Then he goes on to spell out the stunning consequences in his usual vigorous, no-holds-barred way. What makes this book hopeful, however, is Hunter's activist-at-the-barricades conviction that, if we all act now, we can still change this. To do so, he argues, we have to make environmental protection the chief concern of every government – local, national, international – turning all our armies and security forces into what Hunter calls "protectors of the lifeboat." This won't be easy, for powerful lobby groups, fighting for the oil and gas industries, have immense influence and the ears of our decision-makers. But, Hunter argues, if we do nothing, future generations will have reason to curse us – if there are future generations. At the same time, each of us can make a personal commitment to, as Hunter says, "step back from the edge." He freely admits his own lifetime as an "energy mammoth," but Bob Hunter has pledged – as he argues all of us should – to change his own climate-damaging habits and shows us how this can be done. From the Hardcover edition.

Criteria for Selecting the Leading Health Indicators for Healthy People 2030 National Academies of Sciences, Engineering, and Medicine,Health and Medicine Division,Board on Population Health and Public Health Practice,Committee on Informing the Selection of Leading Health Indicators for Healthy People 2030,2020-01-17 Every ten years, the Department of Health and Human Service's Healthy People Initiative develops a new set of science-based, national objectives with the goal of improving the health of all Americans. Defining balanced and comprehensive criteria for healthy people enables the public, programs, and policymakers to gauge our progress and reevaluate efforts towards a healthier society. Criteria for Selecting the Leading Health Indicators for Healthy People 2030 makes recommendations for the development of Leading Health Indicators for the initiative's Healthy People 2030 framework. The authoring committee's assessments inform their recommendations for the Healthy People Federal Interagency Workgroup in their endeavor to develop the latest Leading Health Indicators. The finalized Leading Health Indicators will establish the criteria for healthy Americans and help update policies that will guide decision-making throughout the next decade. This report also reviews and reflects upon current and past Healthy People materials to identify gaps and new objectives.

Open Library: Provides access to over 1 million free eBooks, including classic literature and contemporary works. 2030 Offers a vast collection of books, some of which are available for free as PDF downloads,

particularly older books in the public domain. 2030 : This website hosts a vast collection of scientific articles, books, and textbooks. While it operates in a legal gray area due to copyright issues, its a popular resource for finding various publications. Internet Archive for 2030 : Has an extensive collection of digital content, including books, articles, videos, and more. It has a massive library of free downloadable books. Free-eBooks 2030 Offers a diverse range of free eBooks across various genres. 2030 Focuses mainly on educational books, textbooks, and business books. It offers free PDF downloads for educational purposes. 2030 Provides a large selection of free eBooks in different genres, which are available for download in various formats, including PDF. Finding specific 2030, especially related to 2030, might be challenging as theyre often artistic creations rather than practical blueprints. However, you can explore the following steps to search for or create your own Online Searches: Look for websites, forums, or blogs dedicated to 2030, Sometimes enthusiasts share their designs or concepts in PDF format. Books and Magazines Some 2030 books or magazines might include. Look for these in online stores or libraries. Remember that while 2030, sharing copyrighted material without permission is not legal. Always ensure youre either creating your own or obtaining them from legitimate sources that allow sharing and downloading. Library Check if your local library offers eBook lending services. Many libraries have digital catalogs where you can borrow 2030 eBooks for free, including popular titles. Online Retailers: Websites like Amazon, Google Books, or Apple Books often sell eBooks. Sometimes, authors or publishers offer promotions or free periods for certain books. Authors Website Occasionally, authors provide excerpts or short stories for free on their websites. While this might not be the 2030 full book , it can give you a taste of the authors writing style. Subscription Services Platforms like Kindle Unlimited or Scribd offer subscription-based access to a wide range of 2030 eBooks, including some popular titles.

FAQs About 2030 Books

1. Where can I buy 2030 books? Bookstores: Physical bookstores like Barnes & Noble, Waterstones, and independent local stores. Online Retailers: Amazon, Book Depository, and various online bookstores offer a wide range of books in physical and digital formats.
2. What are the different book formats available? Hardcover: Sturdy and durable, usually more expensive. Paperback: Cheaper, lighter, and more portable than hardcovers. E-books: Digital books available for e-readers like Kindle or software like Apple Books, Kindle, and Google Play Books.
3. How do I choose a 2030 book to read? Genres: Consider

the genre you enjoy (fiction, non-fiction, mystery, sci-fi, etc.). Recommendations: Ask friends, join book clubs, or explore online reviews and recommendations. Author: If you like a particular author, you might enjoy more of their work.

4. How do I take care of 2030 books? Storage: Keep them away from direct sunlight and in a dry environment. Handling: Avoid folding pages, use bookmarks, and handle them with clean hands. Cleaning: Gently dust the covers and pages occasionally.
5. Can I borrow books without buying them? Public Libraries: Local libraries offer a wide range of books for borrowing. Book Swaps: Community book exchanges or online platforms where people exchange books.
6. How can I track my reading progress or manage my book collection? Book Tracking Apps: Goodreads, LibraryThing, and Book Catalogue are popular apps for tracking your reading progress and managing book collections. Spreadsheets: You can create your own spreadsheet to track books read, ratings, and other details.
7. What are 2030 audiobooks, and where can I find them? Audiobooks: Audio recordings of books, perfect for listening while commuting or multitasking. Platforms: Audible, LibriVox, and Google Play Books offer a wide selection of audiobooks.
8. How do I support authors or the book industry? Buy Books: Purchase books from authors or independent bookstores. Reviews: Leave reviews on platforms like Goodreads or Amazon. Promotion: Share your favorite books on social media or recommend them to friends.
9. Are there book clubs or reading communities I can join? Local Clubs: Check for local book clubs in libraries or community centers. Online Communities: Platforms like Goodreads have virtual book clubs and discussion groups.
10. Can I read 2030 books for free? Public Domain Books: Many classic books are available for free as theyre in the public domain. Free E-books: Some websites offer free e-books legally, like Project Gutenberg or Open Library.
