The Defining Decade Meg Jay, 2012-04-17 The Defining Decade has changed the way millions of twentysomethings think about their twenties—and themselves. Revised and reissued for a new generation, let it change how you think about you and yours. Our thirty-is-the-new-twenty culture tells us the twentysomething years don't matter. Some say they are an extended adolescence. Others call them an emerging adulthood. In *The Defining Decade*, Meg Jay argues that twentysomethings have been caught in a swirl of hype and misinformation, much of which has trivialized the most transformative time of our lives. Drawing from more than two decades of work with thousands of clients and students, Jay weaves the latest science of the twentysomething years with behind-closed-doors stories from twentysomethings themselves. The result is a provocative read that provides the tools necessary to take the most of your twenties, and shows us how work, relationships, personality, identity and even the brain can change more during this decade than at any other time in adulthood—if we use the time well. Also included in this updated edition: Up-to-date research on work, love, the brain, friendship, technology, and fertility What a decade of device use has taught us about looking at friends—and looking for love—online 29 conversations to have with your partner—or to keep in mind as you search for one A social experiment in which digital natives go without their phones A Reader's Guide for book clubs, classrooms, or further self-reflection

Digital Media, Youth, and Credibility Miriam J. Metzger, Andrew J. Flanagin, 2008 The difficulties in determining the quality of information on the Internet—in particular, the implications of wide access and questionable credibility for youth and learning. Today we have access to an almost inconceivably vast amount of information, from sources that are increasingly portable, accessible, and interactive. The Internet and the explosion of digital media content have made more information available from more sources to more people than at any other time in human history. This brings an infinite number of opportunities for learning, social connection, and entertainment. But at the same time, the origin of information, its quality, and its veracity are often difficult to assess. This volume addresses the issue of credibility—the objective and subjective components that make information believable—in the contemporary media environment. The contributors look particularly at youth audiences and experiences, considering the implications of wide access and the questionable credibility of information for youth and learning. They discuss such topics as the credibility of health information online, how to teach credibility assessment, and public policy solutions. Much research has been done on credibility and new media, but little of it focuses on users younger than college students. *Digital Media, Youth, and Credibility* fills this gap in the literature. Contributors Matthew S. Eastin, Gunther Eysenbach, Brian Hilligoss, Frances Jacobson Harris, R. David Lankes, Soo Young Rieh, S.

Recent Advances in Natural Language Processing Ruslan Mitkov, Nicolas Nicolov, 1997-01-01 This volume is based on contributions from the First International Conference on "Recent Advances in Natural Language Processing" (RANLP'95) held in Tzigov Chark, Bulgaria, 14-16 September 1995. This conference was one of the most important and competitively reviewed conferences in Natural Language Processing (NLP) for 1995 with submissions from more than 30 countries. Of the 48 papers presented at RANLP'95, the best (revised) papers have been selected for this book, in the hope that they reflect the most significant and promising trends (and latest successful results) in NLP. The book is organised thematically and the contributions are grouped according to the traditional topics found in NLP: morphology, syntax, grammars, parsing, semantics, discourse, grammars, generation, machine translation, corpus processing and multimedia. To help the reader find his/her way, the authors have prepared an extensive index which contains major terms used in NLP; an index of authors which lists the names of the authors and the page numbers of their paper(s); a list of figures; and a list of tables. This book will be of interest to researchers, lecturers and graduate students interested in Natural Language Processing and more specifically to those who work in Computational Linguistics, Corpus Linguistics and Machine Translation.

Business Model Management Bernd W. Wirtz, 2020-09-30 "How are business models purposeful designed and structured? How can the models be implemented professionally and managed successfully and sustainably? In what ways can existing business models be adapted to the constantly changing conditions? In this clearly structured reference work, Bernd W. Wirtz gives an answer to all these issues and provides the reader with helpful guidance. Although, 'Business Model Management' is first and foremost a scientific reference book, which comprehensively addresses the theory of business models, with his book Bernd W. Wirtz also turns to practitioners. Not least, the many clearly analyzed case studies of companies in different industries contribute to this practical relevance. My conclusion: 'Business Model Management' is an informative and worthwhile read, both for students of business administration as a textbook as well as for experienced strategists and decision makers in the company as a fact-rich, practical compendium." Matthias Müller, Chief Executive Officer Porsche AG (2010-2015), Chief Executive Officer (2015-2018) Volkswagen AG "In dynamic and complex markets a well thought out business model can be a critical factor for the success of a company. Bernd Wirtz vividly conveys how business models can be employed for strategic competition and success analysis. He structures and explains the major theoretical approaches in the literature and practical solutions in an easy and understandable way. Numerous examples from business practice highlight the importance of business models in the context of strategic management. The book has the potential to

become a benchmark on the topic business models in the German-speaking world.” Hermann-Josef Lamberti, Member of the Board Deutsche Bank AG 1999-2012/ Member of the Board of Directors, Airbus Group “The business environment has become increasingly complex. Due to changing conditions, the executive board of a company is confronted with growing challenges and increasing uncertainty. Thus, a holistic understanding of the corporate production and performance systems is becoming more and more important. At this point, Bernd W. Wirtz introduces and presents the concept of the structured discussion of the own business model. Business models present operational service processes in aggregated form. This holistic approach channels the attention of management, supports a sound understanding of relationships and facilitates the adaption of the business to changing conditions. The management of business models is thus an integrated management concept. Through the conceptual presentation of complex issues the author makes a valuable contribution to the current literature. In particular, the referenced case studies from various industries make the book clear and very applicable to practice.” Dr. Lothar Steinebach, Member of the Board, Henkel AG 2007-2012/ Supervisory Board, ThyssenKrupp AG

CALL and complexity - short papers from EUROCALL 2019 Fanny Meunier,Julie Van de Vyver,Linda Bradley,Sylvie Thouësny,2019-12-09 The theme selected for the 2019 EuroCALL conference held in Louvain-la-Neuve was ‘CALL and complexity’. As languages are known to be intrinsically and linguistically complex, as are the many determinants of learning (additional) languages, complexity is viewed as a challenge to be embraced collectively. The 2019 conference allowed us to pay tribute to providers of CALL solutions and to recognize the complexity of their task. We hope you will enjoy reading this volume as it offers a rich glimpse into the numerous debates that took place during EuroCALL 2019. We look forward to continuing those debates and discussions with you at the next EuroCALL conferences!

Your Twenties Jessica Smith,2018-02-02 Are you a 20-something eager to find yourself in this crazy thing we call, The Real World? *cue dramatic sound effect* Until now, we've spent our entire lives in school. The great thing about school is that with each new year comes a new syllabus! But now what? No one warned us that our twenties would feel like floating in outer space. Can someone please turn on the gravity? We need a little direction here! Are you looking to find more clarity?Do you want to get to know yourself better?Are you eager to find your why?Are you ready to own your life? If so, take a BIG ole breath because you've come to right place. You are not alone in your 20-something journey and this book was written just for you as you speed through life. This book is quirky, fun, and full of advice. It's not going to add MORE to your plate (we've got enough going on), and I've organized it into the five major areas of life:1. SELF-LOVE 2. HEALTHY MIND 3. BODY ACCEPTANCE 4. RELATIONSHIPS 5. CAREER These, I believe, are the areas in which we experience the most change during this roller coaster of a decade. Each micro chapter will give you the tools, tips, n' tricks to navigate life's ups and downs with ease, grace, and a whole lot of fun. If you're ready to take the plunge, open to page one and let's get started.

Sound, Music and Movement in Parkinson's Disease Marta M. N. Bieńkiewicz,Cathy Craig,2017-01-05 Recent years have brought new insights to the understanding of Parkinson's disease, impact of exercise and sound displays in rehabilitation and movement facilitation. There is growing evidence that auditory signals in the environment can provide a temporal template for movement and change the mode of motor control from intrinsic to extrinsic; habitual to goal-directed, enabling enhanced motor performance in patients. In addition, forced exercise rate studies show that exercising at the pace of healthy adults can have potential neuroprotective benefits for patients. Many research groups have explored the use of auditory cues (such as rhythmical auditory

training) in improving gait and upper limb movement parameters. Cues are usually either intermittent (metronome) or continuous (dynamic sound displays). Similarly, dance based interventions suggest that patients benefit from additional sensory information (i.e. the temporal structure embedded in music and proprioceptive information from a dancing partner) that facilitates movement. On the contrary, studies dedicated to auditory perception and motor timing report an impaired ability of patients to perceive and synchronise with complex rhythmical structures (i.e. causing an inability to play musical instruments). With the growth of modern technology and the increasing portability of hi-specification devices (such as smart phones), new research questions on the design of interventions are beginning to emerge as we strive for more efficient therapeutic approaches. In this Research Topic we wanted to bring together top scientists from the movement disorder, motor control and sound related studies along with therapists. That way, we can engage in cross-disciplinary and challenging scientific debate about future rehabilitation avenues and frontiers for Parkinson's disease patients.

Uses of Technology in Primary and Secondary Mathematics Education Lynda Ball, Paul Drijvers, Silke Ladel, Hans-Stefan Siller, Michal Tabach, Colleen Vale, 2018-05-14 This book provides international perspectives on the use of digital technologies in primary, lower secondary and upper secondary school mathematics. It gathers contributions by the members of three topic study groups from the 13th International Congress on Mathematical Education and covers a range of themes that will appeal to researchers and practitioners alike. The chapters include studies on technologies such as virtual manipulatives, apps, custom-built assessment tools, dynamic geometry, computer algebra systems and communication tools. Chiefly focusing on teaching and learning mathematics, the book also includes two chapters that address the evidence for technologies' effects on school mathematics. The diverse technologies considered provide a broad overview of the potential that digital solutions hold in connection with teaching and learning. The chapters provide both a snapshot of the status quo of technologies in school mathematics, and outline how they might impact school mathematics ten to twenty years from now.

Understanding Engineering Mathematics John Bird, 2013-11-20 Studying engineering, whether it is mechanical, electrical or civil relies heavily on an understanding of mathematics. This new textbook clearly demonstrates the relevance of mathematical principles and shows how to apply them to solve real-life engineering problems. It deliberately starts at an elementary level so that students who are starting from a low knowledge base will be able to quickly get up to the level required. Students who have not studied mathematics for some time will find this an excellent refresher. Each chapter starts with the basics before gently increasing in complexity. A full outline of essential definitions, formulae, laws and procedures are introduced before real world situations, practicals and problem solving demonstrate how the theory is applied. Focusing on learning through practice, it contains examples, supported by 1,600 worked problems and 3,000 further problems contained within exercises throughout the text. In addition, 34 revision tests are included at regular intervals. An interactive companion website is also provided containing 2,750 further problems with worked solutions and instructor materials

Introducing Human Geographies, Third Edition Paul Cloke, Philip Crang, Mark Goodwin, 2013-12-05 Introducing Human Geographies is the leading guide to human geography for undergraduate students, explaining new thinking on essential topics and discussing exciting developments in the field. This new edition has been thoroughly revised and updated and coverage is extended with new sections devoted to biogeographies, cartographies, mobilities, non-representational geographies, population geographies, public geographies

and securities. Presented in three parts with 60 contributions written by expert international researchers, this text addresses the central ideas through which human geographers understand and shape their subject. Part I: Foundations engages students with key ideas that define human geography's subject matter and approaches, through critical analyses of dualisms such as local-global, society-space and human-nonhuman. Part II: Themes explores human geography's main sub-disciplines, with sections devoted to biogeographies, cartographies, cultural geographies, development geographies, economic geographies, environmental geographies, historical geographies, political geographies, population geographies, social geographies, urban and rural geographies. Finally, Part III: Horizons assesses the latest research in innovative areas, from mobilities and securities to non-representational geographies. This comprehensive, stimulating and cutting edge introduction to the field is richly illustrated throughout with full colour figures, maps and photos. These are available to download on the companion website, located at www.routledge.com/9781444135350.

Creationism in Europe Stefaan Blancke, Hans Henrik Hjermitsev, Peter C Kjærgaard, 2014-12-15 A history of Creationism in Europe, from its reception to its rise and the response that has followed. For decades, the creationist movement was primarily situated in the United States. Then, in the 1970s, American creationists found their ideas welcomed abroad, first in Australia and New Zealand, then Korea, India, South Africa, Brazil, and elsewhere—including Europe, where creationism plays an expanding role in public debates about science policy and school curricula. In this, the first comprehensive history of creationism in Europe, leading historians, philosophers, and scientists narrate the rise of—and response to—scientific creationism, creation science, intelligent design, and organized antievolutionism in countries and religions throughout Europe. Providing a map of creationism in Europe, the authors chart the history of creationist activities and strategies. Over the past forty years, creationism has spread swiftly among European Catholics, Protestants, Jews, Hindus, and Muslims, even as anti-creationists sought to halt it. Anti-evolution messages gained such widespread approval, in fact, that in 2007 the Parliamentary Assembly of the Council of Europe passed a resolution advising member states to “defend and promote scientific knowledge” and “firmly oppose the teaching of creationism as a scientific discipline on an equal footing with the theory of evolution.” Creationism in Europe offers an introduction to the cultural history of modern Europe, the variety of worldviews in Europe, and the interplay of science and religion in a global context. It will be of interest to students and scholars in the history and philosophy of science, religious studies, and evolutionary theory, as well as policy makers and educators concerned about the spread of creationism in our time.

Artificial Intelligence and Cognitive Science Lorcan Coyle, Jill Freyne, 2010-11-16 This book constitutes the refereed proceedings of the 20th Irish Conference on Artificial Intelligence and Cognitive Science, AICS 2009, held in Dublin, Ireland in August 2009. Handbook of Smart Textiles Xiaoming Tao, 2015-10-14 The “Handbook of Smart Textiles” aims to provide a comprehensive overview in the field of smart textile describing the state of the art in the research sector as well as the well-established techniques applied in industries. The handbook is planned to cover from fundamental theories, experimental techniques, characterization methods, as well as real applications with successful commercialized examples. The book is structured in a way in which it is appropriate for graduate students, PhD candidates, and professionals in diverse scientific and engineering communities devoted to relevant fields,

including textile engineering, chemistry, bioengineering, material engineering, mechanical engineering, electrical engineering. The book will also provide a solid reference for industrial players who look for innovative technologies as well as environmental, safety concerns for the development of smart textile related products.

Csound Victor Lazzarini, Steven Yi, John ffitch, Joachim Heintz, Øyvind Brandtsegg, Iain McCurdy, 2016-11-15 This rigorous book is a complete and up-to-date reference for the Csound system from the perspective of its main developers and power users. It explains the system, including the basic modes of operation and its programming language; it explores the many ways users can interact with the system, including the latest features; and it describes key applications such as instrument design, signal processing, and creative electronic music composition. The Csound system has been adopted by many educational institutions as part of their undergraduate and graduate teaching programs, and it is used by practitioners worldwide. This book is suitable for students, lecturers, composers, sound designers, programmers, and researchers in the areas of music, sound, and audio signal processing.
