**The Flash Vol. 6: Out of Time** Robert Venditti, Van Jensen, 2015-06-23 Now that the Crime Syndicate's reign of terror is finally at an end, the Fastest Man Alive is more determined than ever to catch the countless criminals they released from Iron Heights-and stop the killer who's using weapons stolen from the Flash's rogues gallery to commit his crimes. In between, he's even trying to guide a troubled kid named Wally West back to the right path. But with each daring rescue and bullet-dodging battle, it feels like the time is slipping through his fingers. And years from now, his time has run out. A darker, more driven Flash is working backwards through time to fix his forerunner's mistakes and save the lives he was too late to save-by any means necessary. His friends and enemies alike barely recognize him. That's because he's harboring a terrible secret about the Speed Force that fuels him. A secret that's set him on a collision course with himself. Writers Robert Venditti & Van Jensen (GREEN LANTERN) join artist Brett Booth (NIGHTWING) launch an all-new era-and present the New 52 debut of Wally West-in THE FLASH VOL. 6: OUT OF TIME ! Collects THE FLASH #30-35, THE FLASH ANNUAL, and THE FLASH: FUTURES END #1.

**Standards for Fats & Oils** Harry W. Lawson, 2012-12-06 This book was written as a basic reference textbook for students in the schools of hotel, restaurant, and institutional management. It is also designed to be a reference and further study guide for cooks, chefs, dietitians, and foodservice management personnel who are already employed in this important industry. There are many texts available that thoroughly cover, in great depth, the chemistry and technical aspects of fats and oils. However, the author is not aware of any text devoted exclusively to fats and oils for foodservice. Therefore, this book is designed to provide just enough technical background to allow an understanding of how and why certain types of fats and oils work for specific uses in foodservice. This leads to practical applications and standards for the various types of products available for such uses as deep frying, griddling, pan frying, salad dressing, and baking. Tested quantity recipes are included as a further guide to product usage and menu expansion. This book is divided into three parts. The first part deals with the chemistry and general technical background for fats and oils. Part II covers the major practical applications in foodservice, along with recipes. In Part III, nutrition, dietary considerations, product and recipe development techniques, and sanitary and quality control procedures are considered. Fats and oils play a very important role in all foodservice operations. This book will provide the information necessary for a good understanding of these products and how they should be

used.

**Food Oils and Fats** H.W. Lawson, 2013-04-17 This is a basic reference/textbook for professionals and students involved with these important oils and fats. It is a valuable source of information for those preparing for or already professionally associated with the Food Processing and Foodservice industries. Chapters one through six deal with the technology of oils and fats, including sources, chemical structure, physical and chemical properties, and processing techniques. Chapters seven through twelve are devoted to the utilization of oils and fats in Food Manufacturing and Foodservice, including deep frying, griddling, baking of all types, salad dressings, margarines, hard butters, and dairy product replacements. The last four chapters contain a most complete and up-to-date treatment of nutrition, as well as the latest developments in analytical methods, flavor, and product development as they relate to oils and fats. This book contains the necessary information for an understanding of how oils and fats are used in the food industry and how this information is used to set standards and meet performance goals. In a thoroughly readable way it is a how-to-do, hands-on treatise on using oils and fats for every major food use. ix Acknowledgments I gratefully acknowledge many friends at Procter & Gamble who provided updated material, some currently employed and some recently retired. Fred J. Baur, formerly of Procter & Gamble, wrote the updated chapters related to Analytical Methods, Flavor, Nutrition, and Dietary Considerations.
