Reading Project Jessica Pressman,Mark C. Marino,Jeremy Douglass,2015-05-01 Electronic literature is a rapidly growing area of creative production and scholarly interest. It is inherently multimedial and multimodal, and thus demands multiple critical methods of interpretation. Reading Project: A Collaborative Analysis of William Poundstone's Project for Tachistoscope {Bottomless Pit} is a collaboration between three scholars combining different interpretive methods of digital literature and poetics in order to think through how critical reading is changing—and, indeed, must change—to keep up with the emergence of digital poetics and practices. It weaves together radically different methodological approaches—close reading of onscreen textual and visual aesthetics, Critical Code Studies, and cultural analytics (big data)—into a collaborative interpretation of a single work of digital literature. Project for the Tachistoscope {Bottomless Pit} is a work of electronic literature that presents a high-speed, one-word-at-a-time animation synchronized to visual and aural effects. It tells the tale of a mysterious pit and its impact on the surrounding community. Programmed in Flash and published online, its fast-flashing aesthetic of information overload bombards the reader with images, text, and sound in ways that challenge the ability to read carefully, closely, and analytically in traditional ways. The work's multiple layers of poetics and programming can be most effectively read and analyzed through collaborative efforts at computational criticism such as is modeled in this book. The result is a unique and trailblazing book that presents the authors' collaborative efforts and interpretations as a case study for performing digital humanities literary criticism of born-digital poetics.

Multimedia Applications Ralf Steinmetz,Klara Nahrstedt,2013-03-09 Multimedia Applications discusses the basic characteristics of multimedia document handling, programming, security, human computer interfaces, and multimedia application services. The overall goal of the book is to provide a broad understanding of multimedia systems and applications in an integrated manner: a multimedia application and its user interface must be developed in an integrated fashion with underlying multimedia middleware, operating systems, networks, security, and multimedia devices. Fundamental information and properties of hypermedia document handling, multimedia security and various aspects of multimedia applications are presented, especially about document handling and their standards, programming of multimedia applications, design of multimedia information at human computer interfaces, multimedia security challenges such as encryption and watermarking, multimedia in education, as well as multimedia applications to assist preparation, processing and application of multimedia content.

The Story of the Selma Voting Rights Marches in Photographs David Aretha,2014-01-01 The Civil Rights Act of 1964 was a momentous victory for civil rights activists, but one major obstacle remained in the path toward equal rights for African Americans: the right to vote. In the South, segregationists prevented African Americans from voting. Civil rights leaders believed it was time for strong action and chose Selma, Alabama, as the rallying point. There, the marches and protests captured the nation's attention. Through gripping primary source photographs, author David Aretha explores this important time in American history.

The Poetry of Religious Sorrow in Early Modern England Gary Kuchar,2011-03-03 In early modern England, religious sorrow was seen as a form of spiritual dialogue between the soul and God, expressing how divine grace operates at the level of human emotion. Through close readings of both Protestant and Catholic poetry, Kuchar explains how the discourses of 'devout melancholy' helped generate some of the most engaging religious verse of the period. From Robert Southwell to John Milton, from Aemilia Lanyer to John Donne, the language of 'holy mourning' informed how poets represented the most intimate and enigmatic aspects of faith as lived experience. In turn, 'holy mourning' served as a way of registering some of the most pressing theological issues of the day. By tracing poetic representations of religious sorrow from Crashaw's devotional verse to Shakespeare's weeping kings, Kuchar expands our understanding of the interconnections between poetry, theology and emotion in post-Reformation England.
