**Flash Out of the Box** Robert Hoekman, Jr., 2004-11-18 If you believe the sky really is the limit when it comes to creating unparalleled user experiences and applications for the Web--then Macromedia Flash MX is sure to be your tool of choice. With Flash, you can integrate video, text, audio, and graphics into distinctive and compelling web content, stunningly interactive and expressive user interfaces, and rich applications for the Internet. Flash is all about helping you dramatically enhance the user experience. And Flash Out of the Box is all about helping you think outside of the box to get there--first, by diving into the Flash box and then becoming intimately acquainted with every nook and cranny of it. In Flash Out of the Box, you'll follow and work with a simple box through a day in the life style journey. You'll study, use, abuse, and transform the box as you move through exercises that teach you the basics of Flash, and much more, in an entertaining, unforgettable, task-oriented fashion. You'll learn to animate, work with video, load external assets, draw, mask, modularize, and many other things that will be essential as you move into more advanced techniques with other books. It's just you, Flash, and the box, mastering each technique along the way and adding others in a fashion that will let you practice and learn simultaneously. Most Flash tutorials you've looked at are tool-centric, focusing on Flash's individual features and how to use them (an approach that can quickly become tedious), whereas this innovative, engaging, and motivating book is uniquely user-centric. That means it concentrates on you and what you want and need to learn. Each successive lesson anticipates and builds upon your needs, capabilities, and questions as you evolve from Flash beginner to Flash master. Written in a fun and conversational tone, the highly accessible Flash Out of the Box makes learning Flash MX 2004 intuitive, logical, and, most of all, fun.

**Flash Remoting: The Definitive Guide** Tom Muck, 2003-09-23 Flash Remoting MX lets developers easily integrate rich Macromedia Flash content with applications that are built using Macromedia ColdFusion MX, Microsoft .NET, Java, PHP, or SOAP-based web services. The result is complex client/server applications that more closely resemble desktop applications than traditional web pages. Gone is the click/wait/reload approach of HTML. Your web application uses Flash as the front end while Flash Remoting handles the communication behind the scenes with the application server. All the end user knows is that it's fast and flexible. The potential uses for Flash Remoting are endless. Flash Remoting: The Definitive Guide will help you understand this breakthrough technology and use it to build your own Rich Internet Applications (RIAs). Build applications that connect to a database, file system, or other server-side technologies. Or, use Flash Remoting to create: online stores that feature catalogs and shopping cart systems sound and video clip libraries banner ads with built-in shopping carts, click-through tracking, and site search capabilities new controls that can be used in place of HTML extensions to Flash, Dreamweaver, Fireworks, and more front-ends to databases for administrators The book begins with Flash Remoting basics: setup, installation and an introduction to its underlying concepts. Next, you'll explore the Flash's User Interface components as they relate to Flash Remoting. Then, you'll gain insights into Flash Remoting internals and the Remoting API. The book is rich with examples that you will be able to run on your own system. The next section focuses on the server-side environment that you'll use for your

applications. Individual chapters cover Flash Remoting with ColdFusion, Server-Side ActionScript, Java, ASP.NET, and PHP. The last section covers more advanced Flash Remoting techniques, such as calling web services from Flash Remoting, extending objects and UI controls, best practices, and debugging. Plus there is a detailed chapter demonstrating a real-world application. The book concludes with a Flash Remoting API reference. Developers who are looking to create Rich Internet Applications with Flash will find Flash Remoting: The Definitive Guide indispensable.

Programming Flash Communication Server Brian Lesser, Giacomo Guilizzoni, Joey Lott, Robert Reinhardt, Justin Watkins, 2005-02-22 With the advent of Flash Communication Server MX (FCS), Macromedia believes that it's on the edge of a breakthrough in how people think about the Internet. FCS has been designed to provide web developers with the means to add polished interactive audio and video features to their sites, the sort of features that users have come to expect. Naturally, the process of efficiently integrating rich media into applications, web sites, and web content is a complex one, to say the least. That's where Programming Flash Communication Server factors in. As the foremost reference on FCS, it helps readers understand how FCS can facilitate: Video on demand Live webcasts Video chat and messaging Shared desktop conferences Live auctions Interactive whiteboard presentations Workflow collaboration Multi-user games Programming Flash Communication Server not only explains how to use the pre-built FCS components to construct a simple application, it also explains the architecture so that developers can program custom components to make even more advanced applications. In addition, the book explains how to truly optimize performance, and talks about considerations for networked applications as well as the media issues pertaining to FCS. Programming Flash Communication Server gives developers a sorely needed leg up on this potentially intimidating technology. It lets users develop cool web applications ranging from direct dating experiences with real-time video, to pre-recorded corporate presentations, to news services with video and audio, and much more. At last, the ability to build web sites with rich interactive features--minus the complex downloads and installation hassles--is a reality. And now, with Programming Flash Communication Server from O'Reilly by your side, you can do more quickly and easily than you ever dreamed possible.
