Eyetracking Web Usability Jakob Nielsen,Kara

Pernice,2010-04-26 Eyetracking Web Usability is based on one of the largest studies of eyetracking usability in existence. Best-selling author Jakob Nielsen and coauthor Kara Pernice used

rigorous usability methodology and eyetracking technology to analyze 1.5 million instances where users look at Web sites to understand how the human eyes interact with design. Their findings will help designers, software developers, writers, editors, product managers, and advertisers understand what people see or don't see, when they look, and why. With their comprehensive three-year study, the authors confirmed many known Web design conventions and the book provides additional insights on those standards. They also discovered important new user behaviors that are revealed here for the first time. Using compelling eye gaze plots and heat maps, Nielsen and Pernice guide the reader through hundreds of examples of eye movements, demonstrating why some designs work and others don't. They also provide valuable advice for page layout, navigation menus, site elements, image selection, and advertising. This book is essential reading for anyone who is serious about doing business on the Web.

Digital Media, Youth, and Credibility Miriam J. Metzger, Andrew J. Flanagin, 2008 The difficulties in determining the quality of information on the Internet--in particular, the implications of wide access and questionable credibility for youth and learning. Today we have access to an almost inconceivably vast amount of information, from sources that are increasingly portable, accessible, and interactive. The Internet and the explosion of digital media content have made more information available from more sources to more people than at any other time in human history. This brings an infinite number of opportunities for learning, social connection, and entertainment. But at the same time, the origin of information, its quality, and its veracity are often difficult to assess. This volume addresses the issue of credibility--the objective and subjective components that make information believable--in the contemporary media environment. The contributors look particularly at youth

audiences and experiences, considering the implications of wide access and the questionable credibility of information for youth and learning. They discuss such topics as the credibility of health information online, how to teach credibility assessment, and public policy solutions. Much research has been done on credibility and new media, but little of it focuses on users younger than college students. *Digital Media, Youth, and Credibility* fills this gap in the literature. Contributors Matthew S. Eastin, Gunther Eysenbach, Brian Hilligoss, Frances Jacobson Harris, R. David Lankes, Soo Young Rieh, S. Shyam Sundar, Fred W. Weingarten

Mystic Isles of the South Seas Frederick O'Brien, 1921 Most people have heard of Charles Bernard Nordhoff and James Norman Hall who came out to Tahiti and wrote *Mutiny on the Bounty* and its sequels, as well as *Faery Lands of the South Seas*, another installment in the Resnick Library of Worldwide Adventure. But there was another American, all but forgotten today, who traveled to the South Seas, fell in love with what he saw, and took pen to paper to share his experiences with those back home. His name was Frederick J. O'Brien, and, after working for a time for the Manila Times, he wrote a trio of books about what he had seen and experienced. Before the dust had cleared, he had written *White Shadows in the South Seas*, *Mystic Isles of the South Seas*, and *Atolls of the Sun* -- all classics in the field, and until now all long out of print. Not meant to be in any way academic, these books are quite simply love poems written to the tropical paradise that was French Polynesia in the early years of the 20 th Century. As the author himself puts it in his foreword: It is for those who stay at home yet dream of foreign places that I have written this book, a record of one happy year spent among the simple, friendly cannibals....There is little of profound research. Nothing, I fear, to startle the anthropologist or to revise encyclopedias; such expectation was far from my thoughts when I

sailed from Papeite on the Morning Star. I went to see what I should see, and to learn whatever should be taught me by the days as they came. What I saw and what I learned the reader will see and learn, and no more. With plenty of photographs to illustrate his text, O'Brien has given readers a glimpse of South Seas life the way it used to be -- and through his own words, we feel as though we have been there.

Graphic Design Theory Helen Armstrong, 2012-08-10 *Graphic Design Theory* is organized in three sections: *Creating the Field* traces the evolution of graphic design over the course of the early 1900s, including influential avant-garde ideas of futurism, constructivism, and the Bauhaus; *Building on Success* covers the mid- to late twentieth century and considers the International Style, modernism, and postmodernism; and *Mapping the Future* opens at the end of the last century and includes current discussions on legibility, social responsibility, and new media. Striking color images illustrate each of the movements discussed and demonstrate the ongoing relationship between theory and practice. A brief commentary prefaces each text, providing a cultural and historical framework through which the work can be evaluated. Authors include such influential designers as Herbert Bayer, L'szlo Moholy-Nagy, Karl Gerstner, Katherine McCoy, Michael Rock, Lev Manovich, Ellen Lupton, and Lorraine Wild. Additional features include a timeline, glossary, and bibliography for further reading. A must-have survey for graduate and undergraduate courses in design history, theory, and contemporary issues, *Graphic Design Theory* invites designers and interested readers of all levels to plunge into the world of design discourse.
