Online Help Systems Greg Kearsley,1988 This book attempts to summarize current knowledge about the design and implementation of help systems. It reviews the results of research on helps as well as examining examples of help systems in existing software. Guidelines for design and implementation are provided. It is hoped that this book will stimulate thought, further research, and experimentation on the topic.

The Nurnberg Funnel John Millar Carroll,1990 How do people

acquire beginning competence at using new technology? The legendary Funnel of Nurnberg was said to make people wise very quickly when the right knowledge was poured in; it is an approach that designers continue to apply in trying to make instruction more efficient. This book describes a quite different instructional paradigm that uses what learners do spontaneously to find meaning in the activities of learning. It presents the minimalist approach to instructional design - its origins in the study of people's learning problems with computer systems, its foundations in the psychology of learning and problem solving, and its application in a variety of case studies. Carroll demonstrates that the minimalist approach outperforms the standard systems approach in every relevant way - the learner, not the system determines the model and the methods of instruction. It supports the rapid achievement of realistic projects right from the start of training, instead of relying on drill and practice techniques, and designing for error recognition and recovery as basic instructional events, instead of seeing error as failure. The book's many examples - including a brief discussion of recent commercial applications - will help researchers and practitioners apply and develop this new instructional technology. The Nurnberg Funnel inaugurates the Technical Communications series, edited by Ed Barrett. Author John M. Carroll has participated for a number of years as a leader in the interdisciplinary field of human-computer interactions. He has been: Manager of User Interface Theory and Design at IBM's Thomas J. Watson Research Center (1976-1994); a professor in Computer Science at Virginia Tech (through 2003); and is currently (2018) Distinguished Professor and co-Director of the College of Information Sciences and Technology's Laboratory for Computer Supported Collaboration and Learning at Pennsylvania State University. He is also the Director of

the university's Center for Human-Computer Interaction. He has received numerous awards, especially for his contributions to Information Technology and its relationship with humans. ~Compiled from MIT Press and Penn State University: <https://jcarroll.list.psu.edu/> (Retrieved 2018, September 7.)

Illustrating Computer Documentation William Horton, 1991-08-28 Clearly explains the methods of graphic illustration, emphasizing the principles of good design. Covers the complete range of illustration types such as symbols, photos, lists and tables, maps, color, depth, change, solidity and more. Each chapter includes practice exercises, design rules of thumb, abundant software user documentation examples and detailed reading lists.

Managing Your Documentation Projects JoAnn T. Hackos, 1994 Practical, authoritative, and the first comprehensive guide to managing every phase of your publication project. The only book devoted exclusively to technical publication project management, *Managing Your Documentation Projects* arms you with proven strategies and techniques for producing high-quality, extremely usable documentation, while cutting cost and time-to-market. Dr. JoAnn T. Hackos, a top documentation design and project management consultant to major corporations, including IBM and Hewlett-Packard, shares with you the fruit of her more than 15 years of experience in the field. She gives you: * Clear-cut, rational guidelines to managing every phase of the project from planning and development, through production, distribution, and project evaluation

* Scores of usable templates, checklists, summaries, and forms * Dozens of real-life case studies and scenarios taken from the author's extensive experience at top corporations * Techniques applicable to virtually all fields of documentation

Managing Your Documentation Projects was designed to function as a comprehensive guide for new managers and a daily tool of survival for veterans. It is also an invaluable resource for technical writers, editors, graphic designers, consultants, and anyone called upon to produce high-quality technical documentation on time and within budget. JOANN T. HACKOS, PhD, is President of Comtech Services, Inc., an information/design firm in Denver, Colorado and San Jose, California. She is also president of JoAnn Hackos & Associates, Inc., a strategic planning and management consulting firm. In 1993, she served as president of the Society for Technical Communication (STC) and is a frequent conference keynote speaker on such topics as quality and usability of products and services, the importance of meeting the needs of the customer, and project management.

Elements of Web Design Darcy DiNucci, Maria Giudice, Lynne Stiles, 1998 Introducing traditional designers to the opportunities and pitfalls of Web design, this guide includes chapters on every step of assembling pages, and has commonsense advice from Web pioneers based on their own experiences.
