Implant Aesthetics Edward Dwayne Karateew,2017-06-16 This book, written by acknowledged experts with international reputations, provides clinicians with detailed guidelines on the nature of the ideal anterior dental implant and, more importantly, how the desired aesthetic outcome is to be achieved. It reflects the incredible paradigm shift that has taken place within implant dentistry during the past 5 years, with recognition of the importance of a 'crown down' approach to diagnosis, planning, and treatment, especially in the anterior zone. In

order to ensure reproducibility and predictability of treatment outcomes, the fabrication of an aesthetic dental implant must follow a complex algorithm, which is reviewed in a stepwise approach. Sections are devoted to evaluation of the aesthetic implant patient, immediate implant placement, staged implant placement, and restoration. Readers will come to appreciate how the final emergence profile of the definitive restoration reflects the complex interplay of components below the visible smile zone. Helpful flow charts are included that will assist in optimal performance of the described procedures.□

Chemical Reactor Omnibook- soft cover Octave Levenspiel, 2013 The Omnibook aims to present the main ideas of reactor design in a simple and direct way. It includes key formulas, brief explanations, practice exercises, problems from experience and it skims over the field touching on all sorts of reaction systems. Most important of all it tries to show the reader how to approach the problems of reactor design and what questions to ask. In effect it tries to show that a common strategy threads its way through all reactor problems, a strategy which involves three factors: identifying the flow pattern, knowing the kinetics, and developing the proper performance equation. It is this common strategy which is the heart of Chemical Reaction Engineering and identifies it as a distinct field of study.

Radio Girl David Dufty, 2020-04-28 All around Australia, former WRANs and navy men regard the woman they know as Mrs Mac with a level of reverence usually reserved for saints. Yet today no-one has any idea of who she was and how she rescued Australia's communication systems in World War II. Winner, Best 2020 Non-fiction, ACT Notable Awards As you climbed the rickety stairs of an old woolshed at Sydney harbour in 1944, you would hear the thrum of clicks and buzzes. Rows of men and women in uniforms and headsets would be tapping away vigorously at small machines, under the careful watch of their young female trainers. Presiding over the cacophony was a tiny woman, known to everyone as 'Mrs Mac', one of Australia's wartime legends. A smart girl from a poor mining town who loved to play with her father's tools, Violet McKenzie became an electrical engineer, a pioneer of radio and a successful businesswoman. As the clouds of war gathered in the 1930s, she defied convention and trained young women in Morse code, foreseeing that their services would soon be sorely needed. Always a champion of women, she was instrumental in getting Australian women into the armed forces. Mrs Mac was adored by the thousands of young women and men she trained, and came to be respected by the defence forces and the public too for her vision and contribution to the war effort. David Dufty brings her story to life in this heartwarming and captivating biography. '[An] incredible and inspiring life... Dufty's new biography captures her unwavering dedication in the face of adversity.' - Professor Genevieve Bell, Australian National University 'A cracking story about the famous Australian radio engineer you've never heard of.' - Dick Smith, entrepreneur and philanthropist
