**Victorian Theatrical Burlesques** Richard Schoch,2018-01-29 First published in 2003. Wildly popular in their own day, Victorian burlesques are now little read, scarcely studied, and never performed. Giving long overdue emphasis to an unjustly neglected theatrical tradition, this critical edition - the first to focus on Victorian burlesques of Victorian plays - represents a valuable scholarly tool for students and scholars of modern drama, theatre history, and nineteenth-century popular culture. Victorian Theatrical Burlesques includes a 'state-of-the-art' introduction which provides a general overview of theatrical burlesques in the Victorian era, emphasising performance history. Sustained reference is made to burlesques other than those presented in the anthology. Through its general introduction, prefaces and annotations to individual plays, checklist of burlesque plays, and bibliography, the unique volume allows both specialist and non-specialist readers to see Victorian burlesques as a rich historical record of shifting attitudes toward drama and the theatre.

*From Nuclear Transmutation to Nuclear Fission, 1932-1939* Per F Dahl,2002-07-01 From Nuclear Transmutation to Nuclear Fission, 1932-1939 deals with a particular phase in the early history of nuclear physics: the race among four laboratory teams to be the first to achieve the transmutation of atomic nuclei with artificially accelerated nuclear projectiles (protons) in high-voltage discharge tubes. This volume covers the backgro

**Text and Image in the City** Catherine Armstrong,John Hinks,2017-03-07 The essays in this collection discuss how the city is 'textualized', and address many aspects of how texts and images are written and produced in, and about, cities. They demonstrate how urban texts and images provoke reactions, in city-dwellers, visitors, civic and political actors, that, in turn, impact upon the shape of the city itself. Many kinds of urban texts – both manuscript and print – are discussed, including chapbooks, periodicals, poetry, graffiti and street-signs. The essays derive from a range of disciplines including book history, urban history, cultural history, literary studies, art history and urban planning, and explore some key questions in urban cultural history, including the relationship between text, image and the city; the function of the text or image within an urban environment; how urban texts and images have been used by those in positions of power and by those with little or no power; the ways in which urban identity and values have been reflected in 'street literature', graffiti and subversive texts and images; and whether theories of urban space can help us to understand the relationship between text, image and the city. As such, this volume will serve to enhance the reader's understanding of the nature of urbanism from a historical perspective, the creation and representation of urban space, and the processes of urbanization. It investigates how the creation, distribution and consumption of urban texts and images actively affect the shaping of the city itself – a mutually constitutive process whereby text, image and city create and sustain each other.

Gaines identifies what he calls 'whaps,' or unusual odds changes and tells you how to spot them. Illustrated with charts and examples, the book shows how to understand and apply tote board fluctuation analysis. He points out how to avoid false favorites, tells when it's okay to follow a trend and how to find that key horse for exotics betting.

*Regulating Securitized Products* R. Saleuddin,2015-07-14 Securitization regulation remains, in the eyes of investors, banks, businesses, bureaucrats and politicians, one of the remaining unsolved puzzles of the post-Global Financial Crisis landscape. This book describes the key features of securitization, including the most common structures and their uses as well as the motivations of the participants in these markets. Important historical moments and case studies are frequently used to illustrate critical issues in the design and enforcement of regulation for securitized products. This work is intended to contextualize and contribute to the highly specialized debates between policymakers, regulators and the regulated financial intermediaries, setting out an agenda for discussion as well as providing some strongly held views on possible solutions. Written by an industry insider with over 20 years' experience in the markets, this book considers regulatory tools from all sides while avoiding common biases. It is a valuable source for not only regulators and policymakers, but also educators, students and researchers in financial regulation, financial engineering and investment management.

**An Introduction to Lightning** Vernon Cooray,2014-10-08 This book about lightning summarizes the essence of physics and effects of lightning in a non-technical manner and provides an up-to-date description of the phenomenon of lightning in simple language. Starting with the myths related to lightning, the reader is introduced to the mechanism of lightning flashes and their interactions with humans, human-made systems and Earth's environment. Most of the available books on lightning are written for the experts in the field and there is a need for a book that introduces the undergraduate and beginning post graduate students to the subject of lightning and prepares them for more advanced books meant for the experts. This introductory book, which is based on a series of lectures given to undergraduate and postgraduate students in electrical engineering, is intended to fill this need. Tailored to the needs of university students who plan to study electrical engineering, meteorology, environmental or basic physics, it is also a valuable reference resource for laymen who are interested in knowing more on this phenomenon.

This volume examines the range of Non-Trade Concerns (NTCs) that may conflict with international economic rules and proposes ways to protect them within international law and international economic law. Globalization without local concerns can endanger relevant issues such as good governance, human rights, right to water, right to food, social, economic, cultural and environmental rights, labor rights, access to knowledge, public health, social welfare, consumer interests and animal welfare, climate change, energy, environmental protection and sustainable development, product safety, food safety and security. Focusing on China, the book shows the current trends of Chinese law and policy towards international standards. The authors argue that China can play a leading role in this context: not only has China adopted several reforms and new regulations to address NTCs; but it has started to play a very relevant role in international negotiations on NTCs such as climate change, energy, and culture, among others. While China is still considered a developing country, in particular from the NTCs' point of view, it promises to be a key actor in international law in general and, more specifically, in international economic law in this respect. This volume assesses, taking into consideration its special context, China's behavior internally and externally to understand its role and influence in shaping NTCs in the context of international economic law.

**Using Technology with Elementary Music Approaches** Amy M. Burns,2020-08-18 Do you find it challenging to integrate technology into your elementary music classroom? Do you feel that it could enhance your classroom experience if you could implement it in an approachable and realistic way? In *Using Technology with Elementary Music Approaches*, author Amy M. Burns offers an all-in-one, classroom-vetted guide to integrate technology into the music classroom while keeping with core educational strategies. In this book, you will find practical lessons and ideas that can be used in any elementary classroom, whether that classroom has one device per educator or a device for every student. Written for a range of experience levels, lessons further enhance classrooms that utilize the approaches of Feierabend, Kodály, Orff Schulwerk, and project-based learning. Experts from each field-Dr. Missy Strong, Glennis Patterson, Ardith Collins, and Cherie Herring-offer a variety of approaches and project ideas in the project-based learning section. Complemented by a companion website of lesson videos, resource guides, and more, *Using Technology with Elementary Music Approaches* allows new and veteran educators to hit the ground running on the first day of school.
