Wait no longer! It's time to save time, boost productivity, and double your typing speed. This book is neatly organized and will introduce you to the 7 keystones to success. The keystones are the key to learning how to type like a pro. No longer will you have to use the inconvenient 'hunt-and-peck' approach. Here is what you'll learn: - How to set goals - How to choose the right keyboard - How to apply good ergonomics - How to touch type - How to identify and fix bad habits - How to write books 2x faster - Typing for beginners and experts - 35 typing tips and techniques - Enhance your touch typing skills for a lifetime - And much more... Unlike the other guides out there, this book is full of quality material that is often left out in other guides. As an author with 10 years of typing experience, an average typing speed of 128 words per minute, and a volunteer at Typeracer.com, you can be assured you are learning from a reliable source. Additionally, many tips and techniques have been gathered from some of the top typists in the world and various typing forums, all compiled and presented in an easy-to-read chapter. It doesn't matter if you can type 10 words per minute or 100, there will be value in this book for you. Think about this: If you are currently 30 years of age and type at 80 wpm for 2 hours a day 5 days a week until you are 60 years of age, and assuming you type at 40 wpm, you will have saved 325 days of your life. 325 days of your life. If you are younger than 30 or continue typing past the age of 60, even better. Imagine what you could do with all that extra time. Spend more time building your business, bonding with your family and friends and traveling the world. The list is endless. The earlier you learn, the better, but it's never too late. Finally, 3 bonus chapters have been included: 10 answers to questions I'm asked most frequently, how to make money by typing, and a case study on how I went from typing 0 - 125 words per minute and you can too. Increase Your Typing Speed Tremendously Harvey Swann,2017-02-06 Come along. Follow me on my journey. This is a true story of my life as a 100+ words per minute speedster. After struggling to type 35 to 45 words per minute, I developed a technique that transformed me into a 100+ words per minute speedster. Since then, I've been clocked as high as 110+ words per minute. Go on this journey with me to Washington, D.C., Baltimore, New Jersey and New York as you read my story. And learn how to become a typing speedster.Here is an excerpt.....After sitting down, she went over the information the receptionist had taken from me and asked me other questions as she took notes. She asked me what type of work I was interested in. I told her I was interested in working as a word processor. The next question she asked, as usual was, How fast do you type? I told her, Approximately 100 words per minute. Maybe it's because I am a male; maybe because of other reasons. I don't know. But the look she gave me was as if to say, Sure you can! And I can jump over the moon! I didn't say anything because by now, ever since I had acquired the ability of typing 100+ words per minute, I had become used to this type of reaction from individuals who interviewed me at employment agencies and elsewhere. She was not the first person to give me that expression. She asked me to sit at the typewriter to take a 5 minute typing test. I could tell by her manner that she still did not believe I typed 100 words per minute. She didn't act maliciously or anything. She only seemed a little irritated with me for coming in and wasting her time. She set the timing clock and told me to begin typing.I began typing, thinking to myself, I am going to love this. The bell went off indicating my time was up. She came over, took the paper on which I had typed, went to her desk and proceeded to check my typing for errors, etc.I will never forget the look on her face and how quickly her attitude towards me changed after she finished grading that paper. She became all bubbly. She wanted to send me to this company. She wanted to send me to that company. She told me that there were numerous companies to which she would like to send me. I had become a commodity to her. She called her co-worker over and told her co-worker about me. It turns out that I had typed a total of 110 words per minute. They told me they had never run into anyone who typed that fast. Keep in mind, this was an employment agency, located just outside of New York city. A place where secretaries, word processors and other typists trek practically every day of the year looking for work and taking typing tests. I would like to add that a lot of the individuals who frequent these agencies are professional secretaries in between jobs. Others, like myself, work as temporary employees because of the flexibility it offers as to when and where to work. But my point is a lot of them have great skills. Some don't. But a lot of them do. And for those counselors to tell me that I was the fastest typist they had ever seen was a feather in my cap.I had walked into that agency an obscure individual. By the time I left I was the talk of the office. As I left, I said to myself, I knew I was going to love this, smiled slightly and went on my way.

Zoom-Type Renee R Ellison,2004-02-03 Teach yourself how to type in 5 days instead of wasting all year on it. Zoom-Type is a revolutionary breakthrough in teaching touch-typing FAST by using the right brain. 100s of quick snapshots and a musical finger march get you seeing, saying, and tapping the correct keys with the correct fingers in just 5 days (each session lasts 5 minutes). For ages 4 to 94. Totally portable-no computer necessary. This is the only right-brain typing course on the market. You'll be speed-typing while students trying other programs are still just getting started. Most computer-based programs designed to teach typing are still in the dark ages, pedagogically. The brain learns best by pictures. This typing course is unique in 3 ways: (1) Spaced repetition-five-minute lessons, several times a day! Away with hour-long drudgery! Rapid-fire quick imprints of the autonomic nervous system gets the job done. (2) Right brain-uses the picture side of the brain, not just the left side as other typing methods do. With Zoom-Type, you subconsciously learn where the letters LIVE, not just what they ARE. (3) Splintered skills-you learn each skill separately, in small increments, and then when you put them together all the brain has to do is jump the synapses between the already acquired mini-skills. The brain is tricked into thinking the whole task is super EASY. THIS VERSION IS ONLY THE PAPERBACK BOOK. IT IS POSSIBLE TO LEARN THIS PROGRAM WITH ONLY THIS BOOK, BUT USING THE AUDIO FILES IS HIGHLY RECOMMENDED.
