Ball Redbook: Greenhouses and equipment Chris Beytes,2011 This professional horticulture reference, which has been in print continuously since 1932, is fully revised and updated in this new edition. Based on real-life experiences from industry professionals including growers and equipment and greenhouse manufacturers, the presented information covers all aspects of greenhouse equipment -- the structures themselves, benches, irrigation, curtains, environmental controls, machination, and the greenhouse as a retail facility. The most recent developments in greenhouse evolution are discussed, as are the varieties of available greenhouse structures, from free-standing and gutter-connected greenhouses to shade houses and open-roof greenhouses. Information on the business side of managing a greenhouse is provided, including how to market products and how to operate a retail store from a greenhouse.

Forensic Speaker Recognition Amy Neustein,Hemant A. Patil,2011-10-05
Forensic Speaker Recognition: Law Enforcement and Counter-Terrorism is an anthology of the research findings of 35 speaker recognition experts from around the world. The volume provides a multidimensional view of the complex science involved in determining whether a suspect's voice truly matches forensic speech samples, collected by law enforcement and counter-terrorism agencies, that are associated with the commission of a terrorist act or other

crimes. While addressing such topics as the challenges of forensic case work, handling speech signal degradation, analyzing features of speaker recognition to optimize voice verification system performance, and designing voice applications that meet the practical needs of law enforcement and counter-terrorism agencies, this material all sounds a common theme: how the rigors of forensic utility are demanding new levels of excellence in all aspects of speaker recognition. The contributors are among the most eminent scientists in speech engineering and signal processing; and their work represents such diverse countries as Switzerland, Sweden, Italy, France, Japan, India and the United States. Forensic Speaker Recognition is a useful book for forensic speech scientists, speech signal processing experts, speech system developers, criminal prosecutors and counter-terrorism intelligence officers and agents.

Multiple Elementary Hannah Jickling,Helen Reed,2018-01-30 Multiple Elementary explores the elementary school classroom as a site of invention and reception of contemporary art practices. Part exhibition catalogue, part artists' book and part corner store advertisement, the book reflects on the

making of an artwork by Hannah Jickling and Helen Reed, in collaboration with a class of grade six students in Toronto. Begun as a riff on the Ontario social studies curriculum Canada and It's Trading Partners, the engagement with students evolved as a series of field trips, extended research and finally, the making of 28 chocolates, each as an edition of ten. Explorations of trade, exchange and labour took shape as exercises in public engagement, curatorial experimentation and institutional translation. Beyond socially engaged practices and expressions of art-as-pedagogy, this book explores aesthetic and representative possibilities for process-based and publicly oriented artworks, especially amidst the complications and contradictions inherent to collaborations with children.
