Intrepid Warriors Bernd Horn,2007-11-15 Command and leadership are very personal endeavours. The manner in which an individual commands others and exercises leadership speaks more to the character and personality of the individual in question than it does to the concept of command or leadership in and of themselves. Intrepid Warriors takes an intimate look at a number of Canada's finest military commanders and leaders during the crucible of war. Collectively, the chapters in this volume offer invaluable insights into different command and leadership approaches, behaviours, and styles. The Grand Strategy of the Russian Empire, 1650-1831 John P. LeDonne,Senior Research Associate Davis Center for Russian Studies John P Ledonne,2004 At its height, the Russian empire covered eleven time zones and stretched from Scandinavia to the Pacific Ocean. Arguing against the traditional historical view that Russia, surrounded and threatened by enemies, was always on the defensive, John P. LeDonne contends that Russia developed a long-term strategy not in response to immediate threats but in line with its own expansionist urges to control the Eurasian Heartland. LeDonne narrates how the government from Moscow and Petersburg expanded the empire by deploying its army as well as by extending its patronage to frontier societies in return for their serving the interests of the empire. He considers three theaters on which the Russians expanded: the Western (Baltic, Germany, Poland); the Southern (Ottoman and Persian Empires); and the Eastern (China, Siberia, Central Asia). In his analysis of military power, he weighs the role of geography and locale, as well as economic issues, in the evolution of a larger imperial strategy. Rather than viewing Russia as peripheral to European Great Power politics, LeDonne makes a powerful case for Russia as an expansionist, militaristic, and authoritarian regime that challenged the great states and empires of its time.

Strange Parallels: Volume 1, Integration on the Mainland Victor Lieberman,2003-05-26 This ambitious work has two novel goals: to overcome the extreme fragmentation of early Southeast Asian historiography, and to connect Southeast Asian to world history. Combining careful local research with wide-ranging theory Lieberman argues that over a thousand years, each of mainland Southeast Asia's great lowland corridors experienced a pattern of accelerating integration punctuated by recurrent collapse. These trajectories were synchronized not only between corridors, but most curiously, between the mainland as a whole, much of Europe, and other sectors of Eurasia. He describes in detail the nature of mainland consolidation - which was simultaneously territorial, religious, ethnic, and commercial - and dissects the mix of endogenous and external factors responsible. Here, then, is a fundamentally original analysis not only of Southeast Asia, but of the pre-modern world.
