*The Flexible Enterprise* Sushil,Edward A. Stohr,2013-11-19 The need for enterprise flexibility in an era of rapidly advancing technology, increasing competition, and globalization, is apparent. Flexibility can be thought of as an ability of the enterprise to quickly and efficiently respond to market changes and to bring new products and services quickly to the market place. Beyond this definition, a truly flexible enterprise should proactively change the market through its ability to create new and innovative products and services. The proposed book is intended to provide a conceptual framework of 'Flexible Enterprise' supported by researches/case applications in various types of flexibilities exhibited by a flexible enterprise. The selected papers from a variety of issues concerning the planning and operation of a flexible enterprise are organized into following four parts: I Enterprise and Strategic Flexibility II Organizational Flexibility III Business Process and Information Systems Flexibility IV Operations Flexibility

**Privatizing Poland** Elizabeth Cullen Dunn,2015-09-25 The transition from socialism in Eastern Europe is not an isolated event, but part of a larger shift in world capitalism: the transition from Fordism to flexible (or neoliberal) capitalism. Using a blend of ethnography and economic geography, Elizabeth C. Dunn shows how management technologies like niche marketing, accounting, audit, and standardization make up flexible capitalism's unique form of labor discipline. This new form of management constitutes some workers as self-auditing, self-regulating actors who are disembedded from a social context while defining others as too entwined in social relations and unable to self-manage. Privatizing Poland examines the effects privatization has on workers' self-concepts; how changes in personhood relate to economic and political transitions; and how globalization and foreign capital investment affect Eastern Europe's integration into the world economy. Dunn investigates these topics through a study of workers and changing management techniques at the Alima-Gerber factory in Rzeszów, Poland, formerly a state-owned enterprise, which was privatized by the Gerber Products Company of Fremont, Michigan. Alima-Gerber instituted rigid quality control, job evaluation, and training methods, and developed sophisticated distribution techniques. The core principle underlying these goals and strategies, the author finds, is the belief that in order to produce goods for a capitalist market, workers for a capitalist enterprise must also be produced. Working side-by-side with Alima-Gerber employees, Dunn saw firsthand how the new techniques attempted to change not only the organization of production, but also the workers' identities. Her seamless, engaging narrative shows how the employees resisted, redefined, and negotiated work processes for themselves.

The Administration of International Organizations Michael D.V. Davies,2017-07-05 Drawing on his extensive practical experience as an international civil servant in a number of organizations, Davies writes in a lively and readable manner about all aspects of administrative policy and its related implications. Divided into two parts, the first - Top down - will enable policy makers in government, academia and elsewhere who have an interest in the proper governance and management of international institutions to gain fresh insight into the topic. The second part - Bottom up - provides a substantial body of knowledge of administrations, including case studies of best and worse practice. The book includes analysis of: -The UN system -International Financial Institutions -Co-ordinated Organizations -Regional European Institutions -The Consultative Group for International Agricultural Research This is a work that fills a well-defined gap in organizational knowledge in a rigorous, but accessible way. It is essential reading for both practitioners and academics involved with international organizations.

**The Flexible Workplace** Marko Orel,Ondřej Dvouletý,Vanessa Ratten,2021-01-19 With current socio-economic development trends and changing work landscapes, modern workplaces are

progressively becoming a subject of flexibilisation and hybridisation. Contemporary office environments are commonly adapting to the needs of the flexible labour markets by offering the non-territorial and rotation-based practice of allocating desks to workers on dynamic schedules. This book explores this growing trend by offering different perspectives on the benefits and challenges of the flexible workplace phenomena. Topics discussed range from defining and comparing flexible, coworking and corpworking spaces, policies made in local environments, and the flexible working taxonomy.

*Workforce Cross Training* David A. Nembhard,2007-04-25 In today's ultra-competitive global business environment, it is becoming increasingly important for companies to reduce spending while simultaneously improving their efficiency and productivity. To achieve this goal, many organizations are opting to implement cross training programs in order to maximize the potential of their existing workforce, thus avoiding the need to outsource. Filling a gap in the literature, *Workforce Cross Training* presents a pioneering overview of the currently available research on this topic and provides invaluable insight into the design of successful cross training programs. Featuring contributions from a team of experts, this text integrates information from a wide variety of disciplines including human factors, industrial engineering, operations management, and behavioral psychology. The authors examine the use of cross training programs in various work environments including serial production systems, call centers, and manufacturing industries. Discussion includes best practices of cross training methods and the future opportunities offered by cross training programs. A single resource featuring an in-depth summary of the policies, methods, and results of cross training, this book delivers a much needed source of guidance for creating effective workforce cross training programs.
