Essential Speech and Language Technology for Dutch Peter Spyns, Jan Odijk, 2013-02-26 The book provides an overview of more than a decade of joint R&D efforts in the Low Countries on HLT for Dutch. It not only presents the state of the art of HLT for Dutch in the areas covered, but, even more importantly, a description of the resources (data and tools) for Dutch that have been created are now available for both academia and industry worldwide. The contributions cover many areas of human language technology (for Dutch): corpus collection (including IPR issues) and building (in particular one corpus aiming at a collection of 500M word tokens), lexicology, anaphora resolution, a semantic network, parsing technology, speech recognition, machine translation, text (summaries) generation, web mining, information extraction, and text to speech to name the most important ones. The book also shows how a medium-sized language community (spanning two territories) can create a digital language infrastructure (resources, tools, etc.) as a basis for subsequent R&D. At the same time, it bundles contributions of almost all the HLT research groups in Flanders and the Netherlands, hence offers a view of their recent research activities. Targeted readers are mainly researchers in human language technology, in particular those focusing on Dutch. It concerns researchers active in larger networks such as the CLARIN, META-NET, FLReNet and participating in conferences such as ACL, EACL, NAACL, COLING, RANLP, CICling, LREC, CLIN and DIR (both in the Low Countries), InterSpeech, ASRU, ICASSP, ISCA, EUSIPCO, CLEF, TREC, etc. In addition, some chapters are interesting for human language technology policy makers and even for science policy makers in general.

ATTILA JÓZSEF SELECTED POEMS Attila József, 2005-06-13 Award-winning translator Peter Hargitai celebrates 100 years of Attila József (1905-1937) in this new selection of 100 poems. His previous selection, *Perched On Nothing's Branch* (1986), enjoyed a remarkable run of five editions and won for him the Academy of American Poets' Landon Translation Award. His translation of Attila József is listed among the world classics cited by Harold Bloom in *The Western Canon*. Praise for Peter Hargitai's translation of Attila József: These grim, bitter, iron-cold poems emerge technically strong, spare and authentic in English, and they are admirably contemporary in syntax. -MAY SWENSON in *Citation for the Academy of American Poets* A rich nuanced translation by Peter Hargitai. These poems are ageless, mirroring the human conditions and focusing in humankind's existential loneliness. -MAXINE KUMIN I have long thought of Attila József as one of the great poets of the century, a tragic realist whose work beautifully redeemed the unbearable conditions of the life to which history condemned him. These new translations by Peter Hargitai will be welcomed by József's admirers and will certainly add to their number. -DONALD JUSTICE [Other] translations of József's work are stiff and academic, whereas Peter Hargitai's versions are colloquial and emotionally charged as the originals. Reading them one lapses into the silence that attends the reception of all great poetry. -DAVID KIRBY

Dark Water Robert Clark, 2009-10-06 Birthplace of Michelangelo and home to untold masterpieces, Florence is a city for art lovers. But on November 4, 1966, the rising waters of the Arno threatened to erase over seven centuries of history and human achievement. Now Robert Clark explores the Italian city's greatest flood and its aftermath through the voices of its witnesses. Two American artists wade through the devastated beauty; a photographer stows away on an army helicopter to witness the tragedy first-hand; a British "mud angel" spends a month scraping mold from the world's masterpieces; and, through it all, an author asks why art matters so very much to us, even in the face of overwhelming disaster.

Lost River Farley McAllister, 2021-07-14 A raw tour through an aging songwriter's life as he watches his Alzheimer's stricken spouse deteriorate, *Lost River* (The Sinks) weaves intellect and emotion into an expansive exploration of how protagonist Carson Hicks (and we) experience consciousness. Like a collaboration between Montaigne and James Joyce were they gifted twenty-first century knowledge, *Lost River* alternates still waters with rapids, leaving you at the end of the ride with your sense of place, time and memory altered, replaced by a new physics of Being.

Energetic Bodies Thomas Moser, Wilma Scheschonk, 2022-06-06 Throughout the fin de siècle, energy was a buzzword that was used far beyond the boundaries of the sciences to negotiate the formative scope as well as limits of Western modernity. The human body was positioned at the center of the visualization of this enigmatic drive of all movement in discourses on labor and economics, physical culture, sport, art, and literature. It was through the body that this all-pervading and conditioning physical principle as well as its perceptual qualities were to be made tangible. This volume is dedicated to these energetic bodies. The transdisciplinary individual contributions

trace body scenarios of force and energy over the course of history from 1800 to the peak phase around 1900 and up to the present.

The Dervish House Ian McDonald,2018-03-05 Another day, another tram bomb. It seems everyone is after a piece of Turkey. But the shock waves from this random act of twenty-first-century terrorism will ripple far beyond Necatibey Cadessi. Welcome to the world of *The Dervish House*—the great, ancient, paradoxical city of Istanbul, divided like a human brain, in the great, ancient, equally paradoxical nation of Turkey. With a population pushing one hundred million, and Istanbul alone swollen to fifteen million, Turkey is the largest, most populous, and most diverse nation in the new Europe, but also one of the poorest and most socially divided. It's a boom economy, the sweatshop of Europe, the bazaar of central Asia, the key to the immense gas wealth of Russia and central Asia. *The Dervish House* is seven days, six characters, and three interconnected story strands all woven around the common core of the old dervish house of Aden Dede. A terror attack, a vision of djinn, a commodities scam, a hunt for half a miniature Koran that holds the key to new technology, and a quest for a creature from Arabic legend—that may not be so legendary after all. Praise for *The Dervish House* “To read McDonald is to fall in love with a place and to become drunk with it....If you've never read him, you're in for a treat. If you're a fan like me, you'll be delighted anew. What a wonderful, wonderful book.”—Boing Boing *The Dervish House* is an audacious look at the shift in the power centers of the world and an intense vision of one possible future. —New York Times “Hugely adventurous and entertaining, sumptuously inventive and full of heart... it is likely to rank as Ian McDonald's finest creative achievement.” —Locus

The Stars Are Also Fire Poul Anderson,2015-12-08 Humans and their genetically altered descendants struggle to find their place in a universe controlled by a benevolent artificial intelligence in this brilliant classic of future speculation On a far-future Earth, a linked system of artificial intelligences called the cybercosm runs the planet and the universe far more efficiently than any flesh and blood ruler ever could, in essence rendering the human race obsolete. On the Earth's moon, genetically engineered Lunarians carrying the DNA of Dagny Beynac—a descendant of the legendary Anton Guthrie, founder of the powerful and visionary Fireball Enterprises—struggle to preserve their lives, their freedom, and their satellite's resources in the face of threats posed by encroaching humans and controlling machines. Over a span of five centuries, tensions have increased in the wake of the political and technological revolutions that reshaped their universe. And suddenly radical change is in the offing once more, as a secret kept hidden since the earliest days of Lunar colonization is about to be revealed—one that could effectively shut down the cybercosm and plunge the universe into chaos. Poul Anderson advances the worlds-shattering circumstances he so brilliantly introduced in *Harvest of Stars*, creating a vision of the future that is at once astonishing, provocative, and troubling. A true science fiction classic, *The Stars Are Also Fire* explores deep questions about the nature, complexity, and worth of humankind in an unforgettable novel considered by many to be Anderson's masterpiece.

Yes Yes Good: The Heart of Teaching Cheryl Hulteen,2013-08 Teaching at Public School 1430 in New York City is where Cheryl Hulteen discovered and refined the heart of her teaching, Prior to PS 1430 I taught the same way I had been taught. The teacher speaks to the students and they listen somewhat attentively. The teacher tells students to do something and for the most part they do it. In many classrooms I worked in before PS 1430, the teachers led the class in a Good morning Ms. H sing-song chant as greeting to me, the new teacher, the Resident Artist. None of those things happened at PS 1430. I had to... improvise. Hulteen shares how she improvised new,

humorous and powerful ways of understanding what it meant to learn, teach and embrace change in an educational culture that often settled for much less. YES YES GOOD explores the poignantly compelling and emotional portraits of students and teachers who learn to: Say YES to their creativity and ideas. Say YES to the creativity and ideas of the people they work with.
