A History Of The B-17 Flying Fortress in Over 400 Photographs, Stories And Analysis: Including The U.S. Army Air Forces in World War II: Combat Chronology 1941 - 1945 - American Air Power in WWII ,2015-08-01 PREFACE The chronology is concerned primarily with operations of the US Army Air Forces and its combat units between December 7, 1941 and September 15, 1945. It is designed as a companion reference to the seven-volume history of The Army Air Forces in World War II, edited by Wesley Frank Craven and James Lea Cate. The research was a cooperative endeavor carried out in the United States Air Force historical archives by the Research Branch of the Albert F. Simpson Historical Research Center. Such an effort has demanded certain changes in established historical methodology, as well as some arbitrary rules for presentation of the results. After International and US events, entries are arranged geographically. They begin with events at Army Air Forces Headquarters in Washington then proceed eastward around the world, using the location of the headquarters of the numbered air forces as the basis for placement. For this reason, entries concerning the Ninth Air Force while operating in the Middle East follow Twelfth Air Force. When that headquarters moves to England in October 1943, the entries are shifted to follow Eighth Air Force. The entries end with those numbered air forces which remained in the Zone of the Interior, as well as units originally activated in the ZI, then designated for later movement overseas, such as Ninth and Tenth Air Forces. The ZI entries do not include Eighth and Twentieth Air Forces, which were established in the ZI with the original intent of placing them in those geographical locations with which they became historically identified. For these two units, original actions are shown either under AAF or in their intended geographic area of location. All times and dates used are those of the area under discussion. The entry 1/2 Jun indicates that an event occurred during the night between the two given dates, while 1-2 Jun indicates an action over a period of time. In dealing with people, again arbitrary decisions were implemented. For military men below the general officer or equivalent level, full grade and name were used. For general officers and those of equal grade in other US and foreign services, the complete rank (both that at the time first mentioned and the highest rank held prior to the end of the war) and name will be found in the index. Only an abbreviated rank (e.g., Gen or Adm) and last name are used in the text. The exception is where two general officers had the same last name; in such cases, the first name is also included. Similarly for civilian leaders, only the last name is used; full name and title are given in the index. Location of all towns, islands, etc., is also made in the index. In all cases, attempts were made to cite place names in use by the native population at the time of or immediately before the war. No names imposed by a conqueror are used. For example Pylos

Bay, not Navarino Bay, is used. Further, as appropriate, native geographic terms are used: Shima for island in Japanese island groups, See for lake in Germany. However, two exceptions were made. In cases in which the place became infamous because of the actions of the conquering power, that name is preferred—for example Auschwitz would be used rather than the Polish name of Oswiecim. Also, in larger international cities, such as Roma, Koln and Wien, the anglicized name is used. Where a village or hamlet was difficult to locate or where there were several such places with the same name in a general area, the coordinates are given in the index. In some cases, with no extant navigational aids of the attacking force, the best possible guess was made based upon all available evidence. In other instances, such as the bridge at Hay-ti-attacked so often by Tenth Air Force-- a logical guess could not be made. In these cases, a question mark is placed in brackets after the index entry. Accent marks, such as umlauts, were omitted.

Lockheed Blackbird Paul F. Crickmore, 2023-11-23 The SR-71 Blackbird is an iconic aircraft that has come to symbolize America's technological superiority during the Cold War. Using recently declassified information, globally renowned expert Paul Crickmore updates his definitive account of the aircraft. The Lockheed SR-71 Blackbird ranks as one of the most elegant, sleek and powerful aeroplanes ever designed. But it was not built to be admired – it was built not to be seen at all. The high-altitude aerial reconnaissance sorties it was to perform were top secret and carefully concealed from public knowledge. However, as the aircraft have become museum pieces and details of their work declassified, the whole story of their design and operation can finally be told. This updated edition of Paul Crickmore's classic *Lockheed Blackbird: Beyond the Secret Missions* is based on 850 pages of documentation and images declassified by the CIA covering the A-12 Oxcart programme. These highly significant documents range from discussions at the highest levels of the US government concerning the rationale for Oxcart's development and eventual deployment, to extremely detailed intelligence data gleaned from each of the 29 operational missions flown by Oxcart during Operation Black Shield. The Blackbird family of aircraft continue to fascinate a wide age group and, since the aircraft will never fly again, its history has become timeless. This new edition will provide the last word on the SR-71 Blackbird and its operational history.

Mikoyan-Gurevich MiG-21 Pilot's Flight Operating Instructions Nato, 2008-09 The Mikoyan-Gurevich MiG-21 is known in NATO circles as the 'Fishbed'. Designed as a Mach 2.0 interceptor, the plane holds the distinction of being produced in greater numbers than any other jet aircraft. The Fishbed flew in combat in Vietnam, where it held its own against the F-105 Thunderchief. During the 1973 Arab-Israeli War, 17 Israeli aircraft were shot down, for a loss of six Egyptian MiG-21s. The plane also flew in combat in the Indo-Pakistani War of 1971, during the Soviet invasion of Afghanistan, and in Yugoslavia. Today, over 28 of the world's air forces continue to fly MiG-21s. Originally printed by NATO, this English-language handbook provides a glimpse inside the cockpit of this incredible plane. The manual was recently declassified and is here reprinted in book form. Care has been taken to preserve the integrity of the text
