The 10,000 Dollar Flip Book , 2012-10-31 From photographer Santiago Melazzini, maker of popular flipbooks such as Tango Dancer and I Love You, comes a special four-in-one, full-color flipbook disguised as a stack of \$100 bills. Running a thumb over the edges of the "bills" in the stack, the viewer will observe four short, satirical films on the transience of wealth. A recurring cast of characters plays roles based on stereotypes from slapstick silent movies: the wealthy, arrogant high roller; the robber in his

prison stripes and domino mask; and the opportunistic showgirl. In a time of financial uncertainty gripping the world, this playful and good-natured item is a reminder that fortunes can change in the blink of an eye, but a sense of humor is an asset that, once possessed, can never be taken away.

Working with Children's Language Diana Williams, 2021-09-28 This revised and updated second edition of Working with Children's Language has been created to support practitioners who work with young children with delayed language acquisition. Rooted in a developmental theory of language learning, it covers topics such as attention control and listening, the role of play, verbal comprehension and the acquisition of spoken expressive language. Each chapter offers a straightforward overview of current research relating to the specific language skill before introducing a wealth of targeted games and activities that can help support the development of those skills. Key features include: • A structured approach to language learning that can be followed as a programme or adapted for informal use by individual practitioners. • Accessible activities, games and ideas suitable for small group or individual intervention, linked to specific aims based on developmental norms. • Photocopiable and downloadable resources, including a record sheet to track progress in each skill against aims and outcomes for individual children. Clearly linking theory and practice in an engaging and easy-to-follow format, this is an invaluable resource to support children in early years settings and Key Stage 1 whose language is delayed, but who are otherwise developing normally. It is a must-have book for early years practitioners, teachers, SEND professionals and speech and language therapists with varying levels of experience.

Hero Maker: 12 Weeks to Superhero Fit Duffy Gaver, 2020-04-21 A breakout training and fitness book by Hollywood trainer and former Navy SEAL, Duffy Gaver, featuring the tried and true workouts used by movie stars like Chris Pratt and Brad Pitt. Former Marine sniper and ex-navy Seal, Duffy Gaver is the unsung hero of Hollywood. As a master trainer to the stars, he has transformed the bodies of actors such as Chris Hemsworth, Chris Pratt, Scarlett Johanson, Brad Pitt and many others. He is a Hero-Maker. He gets the most out of his clients by making them rethink their lives. For Duffy, the fitness industry sells a myth: it's all about the latest and greatest fads. Back in 1965, Larry Scott won the first Mr. Olympia. There was no Nike. No thermogenic products. No supplement industry. How did he do it then? With his will, his discipline, his desire. The things that big businesses can't manufacture. The first four minute mile, the first iron man triathlon, and the first world's strongest man all took place before 99% of today's companies even existed. What does this prove? None of this stuff is necessary. Inside Hero Maker, Duffy Gaver shares the knowledge and motivational sit-downs that get his stars to take hold of their own bodies. None of these stars bought their way to their impressive physiques; they earned it with old fashioned work and dedication. He will tell you what you need to do to look super heroic, and he will show you how you too can do this if you put yourself to the task. Inside, you will also find some of his game-changing workouts to help get you there.

Tony Rinaudo Johannes Dieterich,2018-05-25 The Australian agronomist Tony Rinaudo revolutionized reforestation in Africa with Farmer Managed Natural Regeneration (FMNR). His method is based on deploying tree stumps and roots that still grow even in degraded landscapes: thanks to the protection and care of the shoots, the original tree population can be regenerated without major financial costs. The method is now successfully applied in at least 24 African countries. Where the desert was still expanding 20 years ago, farmers reforest large areas with FMNR: in Niger alone seven million hectares of land were already restored in this way. Up to 700 million people will possibly be obliged to leave their homelands during the next three decades because of increasing desertification in the landscapes where they live. In the opinion of scientists, there is only one hope: to convince the local farmers of 'sustainable land management'. Tony Rinaudo believes that with FMNR he has found the appropriate method for such management - and just in time to stop, or even to be able to reverse the destruction of livelihoods.

Peek-a-Baby Karen Katz, 2007-06-05 How many kisses does a tired baby need to change her from crying into sleeping?

Better Off Eric Brende, 2009-10-13 What happens when a graduate of MIT, the bastion of technological advancement, and his bride move to a community so primitive in its technology that even Amish groups consider it antiquated? Eric Brende conceives a real-life experiment: to see if, in fact, all our cell phones, wide-screen TVs, and SUVs have made life easier and better -- or whether life would be preferable without them. By turns, the query narrows down to a single question: What is the least we need to achieve the most? With this in mind, the Brendes ditch their car, electric stove, refrigerator, running water, and everything else motorized or hooked to the grid and begin an eighteen-month trial run -- one that dramatically changes the way they live, and proves entertaining and surprising to readers. Better Off is a smart, often comedic, and always riveting book that also mingles scientific analysis with the human story, demonstrating how a world free of technological excess can shrink stress -- and waistlines -- and expand happiness, health, and leisure. Our notion that technophobes are backward gets turned on its head as the Brendes realize that the crucial technological decisions of their adopted Minimite community are made more soberly and deliberately than in the

surrounding culture, and the result is greater -- not lesser -- mastery over the conditions of human existence.
