Parameter Setting in Evolutionary Algorithms F.J. Lobo, Cláudio F. Lima, Zbigniew

Michalewicz, 2007-04-03 One of the main difficulties of applying an evolutionary algorithm (or, as a matter of fact, any heuristic method) to a given problem is to decide on an appropriate set of parameter values. Typically these are specified before the algorithm is run and include population size, selection rate, operator probabilities, not to mention the representation and the operators themselves. This book gives the reader a solid perspective on the different approaches that have been proposed to automate control of these parameters as well as understanding their interactions. The book covers a broad area of evolutionary computation, including genetic algorithms, evolution strategies, genetic programming, estimation of distribution algorithms, and also discusses the issues of specific parameters used in parallel implementations, multi-objective evolutionary algorithms, and practical consideration for real-world applications. It is a recommended read for researchers and practitioners of evolutionary computation and heuristic methods.

Principles of Petroleum Reservoir Engineering Gian L. Chierici, 2013-03-09 Six years ago, at the end of my professional career in the oil industry, I left my management position within Agip S.p.A., a major multinational oil company whose headquarters are in Italy, to take up the chair in reservoir engineering at the University of Bologna, Italy. There, I decided to prepare what was initially intended to be a set of lecture notes for the students attending the course. However, while preparing these notes, I became so absorbed in the subject matter that I soon found myself creating a substantial volume of text which could

not only serve as a university course material, but also as a reference for wider professional applications. Thanks to the interest shown by the then president of Agip, Ing. Giuseppe Muscarella, this did indeed culminate in the publication of the first Italian edition of this book in 1989. The translation into English and publication of these volumes owes much to the encouragement of the current president of Agip, Ing. Guglielmo Moscato. My grateful thanks are due to both gentlemen. And now - the English version, translated from the second Italian edition, and containing a number of revisions and much additional material. As well as providing a solid theoretical basis for the various topics, this work draws extensively on my 36 years of worldwide experience in the development and exploitation of oil and gas fields.

Evolutionary Scheduling Keshav Dahal, Kay Chen Tan, Peter I. Cowling, 2007-02-15 Evolutionary scheduling is a vital research domain at the interface of artificial intelligence and operational research. This edited book gives an overview of many of the current developments in the large and growing field of evolutionary scheduling. It demonstrates the applicability of evolutionary computational techniques to solve scheduling problems, not only to small-scale test problems, but also fully-fledged real-world problems.

Hello Now Jenny Valentine, 2020-03-31 From Carnegie Medal finalist Jenny Valentine comes a bold new story about the boundlessness of love and second chances, perfect for fans of David Levithan's Every Day. Jude doesn't believe in love, or magic. Life is little more than ordinary. That is, until Jude's mother

loses her job and moves them to a little town by the sea to live with Henry Lake--an eccentric old man with rooms to rent. Henry is odd, the town is dull, and worst of all, Jude feels out of place and alone. So when Novo turns up in the house across the street, dressed all in black and looking unbearably handsome, Jude's summer takes an immediate turn for the better. But Novo isn't all that he seems to be--or maybe he's more than Jude can possibly understand. Novo is pure magic--someone who can bend and stretch the bounds of time. Someone who wakes up in different places and at different points in history with utter regularity. He knows that each Now is fleeting, that each moment is only worth the energy it expends on itself, and that each experience he has will be lost to him before long. But Jude and Novo form a bond that shifts reality for both of them. Jude begins to question what forever really means--only to find out that Novo knows that forever isn't real. And when things go horribly wrong, Jude and Novo are faced with an impossible question that may change both of their lives irreparably--what is worth sacrificing for love? A stunningly written, compelling exploration of the universality of love--and what it means to live in the moment--that quite literally defies both logic and time. A love story without borders that reflects the best of our modern world. Praise for Hello Now: * Babbitt's Tuck Everlasting revisioned as a passionate YA love story, this is an exquisitely told romantic fantasy, golden yet lacerating. --BCCB, STARRED REVIEW

Scalable Optimization via Probabilistic Modeling Martin Pelikan,Kumara Sastry,Erick Cantú-Paz,2006-09-25 I'm not usually a fan of edited volumes. Too often they are an incoherent hodgepodge of remnants, renegades, or rejects foisted upon an unsuspecting reading public under a misleading or fraudulent title. The volume Scalable Optimization via Probabilistic Modeling: From Algorithms to

Applications is a worthy addition to your library because it succeeds on exactly those dimensions where so many edited volumes fail. For example, take the title, Scalable Optimization via Probabilistic Modeling: From Algorithms to Applications. You need not worry that you're going to pick up this book and find stray articles about anything else. This book focuses like a laser beam on one of the hottest topics in evolutionary computation over the last decade or so: estimation of distribution algorithms (EDAs). EDAs borrow evolutionary computation's population orientation and selectionism and throw out the genetics to give us a hybrid of substantial power, elegance, and extensibility. The article sequencing in most edited volumes is hard to understand, but from the get go the editors of this volume have assembled a set of articles sequenced in a logical fashion. The book moves from design to efficiency enhancement and then concludes with relevant applications. The emphasis on efficiency enhancement is particularly important, because the data-mining perspective implicit in EDAs opens up the world of optimization to new methods of data-guided adaptation that can further speed solutions through the construction and utilization of effective surrogates, hybrids, and parallel and temporal decompositions.

Mathematical Methods for Engineers and Scientists 1 Kwong-Tin Tang, 2006-11-10 The topics of this set of student-oriented books are presented in a discursive style that is readable and easy to follow. Numerous clearly stated, completely worked out examples together with carefully selected problem sets with answers are used to enhance students' understanding and manipulative skill. The goal is to help students feel comfortable and confident in using advanced mathematical tools in junior, senior, and beginning graduate courses.

Neuro Design Darren Bridger, 2017-02-03 COMMENDED: Business Book Awards 2018 - Thought Leader Category Today, businesses of all sizes generate a great deal of creative graphic media and content, including websites, presentations, videos and social media posts. Most big companies, including the likes of Procter & Gamble, Coca-Cola, Tesco and Google, now use neuroscience research and theories to optimize their digital content. *Neuro Design* opens up this new world of neuromarketing design theories and recommendations, and describes insights from the growing field of neuroaesthetics that will enable readers to enhance customer engagement through their website, and boost profitability. *Neuro Design* emphasizes the importance of understanding consumers' non-conscious reactions to design and how brands can use them to improve performance, and increase the credibility and persuasiveness of their content. Including practical methods such as neuro-research for testing websites, plus real world case studies from P&G, Coca-Cola, Google and neuroscientific advertising for Nielson, this is the essential handbook for any marketer looking to improve engagement with their creative graphic content. Also covering visuospatial resonance, banner blindness, visual saliency, the Gestalt Psychology Model, the halo effect and much more, *Neuro Design* will equip any marketer with the design techniques they need to engage with consumers. Online resources include web links to inspiring reading, and further website resources.

Mathematical Methods for Engineers and Scientists 3 Kwong-Tin Tang, 2007-01-10 Pedagogical insights gained through 30 years of teaching applied mathematics led the author to write this set of student oriented books. Topics such as complex analysis, matrix theory, vector and tensor analysis, Fourier analysis, integral

transforms, ordinary and partial differential equations are presented in a discursive style that is readable and easy to follow. Numerous examples, completely worked out, together with carefully selected problem sets with answers are used to enhance students' understanding and manipulative skill. The goal is to make students comfortable in using advanced mathematical tools in junior, senior, and beginning graduate courses.
