## **Official Gazette of the United States Patent and Trademark Office ,2007**

*MSDN Magazine ,2005*

Law and Risk Law Commission of Canada,2005 The study and practice of risk analysis, risk management, and the communication of risk has been the subject of heated debates. This is no less so when law is added to the mix. Despite the law's constant search for certainty, the concept of risk itself is inherently uncertain. From the precautionary principle to the role of research ethics boards, risk remains a value-laden term, difficult to define and even more difficult to address. This collection from the Law Commission of Canada looks at law and risk in a variety of contexts and provides insight into how courts use and interpret risk, how the law allocates risk, and the regulation of risky activities. To demonstrate the linkages between law and risk, the essays tackle some difficult topics, including dangerous offenders, sex offender notification, drug courts, genetic research, pesticide use, child pornography, and tobacco advertising. These important contributions to whether the law adequately and appropriately responds to risk will be of interest to students and scholars of law and the social sciences, as well as to law practitioners and lawmakers.
