Strengthening Forensic Science in the United States National Research Council,Division on Engineering and Physical Sciences,Committee on Applied and Theoretical Statistics,Policy and Global Affairs,Committee on Science, Technology, and Law,Committee on Identifying the Needs of the Forensic Sciences Community,2009-07-29 Scores of talented and dedicated people serve the forensic science community, performing vitally important work. However, they are often constrained by lack of adequate resources, sound policies, and national support. It is clear that change and advancements, both systematic and scientific, are needed in a number of forensic science disciplines to ensure the reliability of work, establish enforceable standards, and promote best practices with consistent application. Strengthening Forensic Science in the United States: A Path Forward provides a detailed plan for addressing these needs and suggests the creation of a new government entity, the National Institute of Forensic Science, to establish and enforce standards within the forensic science community. The benefits of improving and regulating the forensic science disciplines are clear: assisting law enforcement officials, enhancing homeland security, and reducing the risk of wrongful conviction and exoneration. Strengthening Forensic Science in the United States gives a full account of what is needed to advance the forensic science disciplines, including upgrading of systems and organizational structures, better training, widespread adoption of uniform and enforceable best practices, and mandatory certification and accreditation programs. While this book provides an essential call-to-action for congress and policy makers, it also serves as a vital tool for law enforcement agencies, criminal prosecutors and attorneys, and forensic science educators.

The Fall of the House of Bush Craig Unger,2008-09-04 Conventional wisdom has it that the Middle East crisis is the product of a clash of civilizations between Islam and the West. THE FALL OF THE HOUSE OF BUSH frames that conflict as part of an entirely different paradigm -- namely, the ongoing war between faith and reason, between fundamentalisms (Islamic, Jewish, Christian) and the modern, scientific, post-Enlightenment world. It tells the story of how radical, neoconservative ideologues secretly formed an alliance with the Christian Right in the Bush White House -- and how, driven by delusional idealism and ideological and religious zeal, they waged unilateral and pre-emptive war in the Middle East as well as a domestic war against reason, science and civil liberties. Extending the investigative reach deployed so devastatingly in HOUSE OF BUSH, HOUSE OF SAUD, Craig Unger's brilliant exposé shows the real intentions -- and likely outcomes -- of the Bush administration's true playbook.
