**Masters of the Air** Donald L. Miller,2006-10-10 The inspiration for the major Apple TV+ series, streaming now! The riveting history of the American Eighth Air Force in World War II and the young men who flew the bombers that helped beat the Nazis and liberate Europe, brilliantly told by historian and World War II expert Donald L. Miller. The Masters of the Air streaming series stars Austin Butler and Callum Turner, and is produced by Tom Hanks and Steven Spielberg, the legendary duo behind *Band of Brothers* and *The Pacific*. Masters of the Air is the deeply personal story of the American bomber boys in World War II who brought the war to Hitler's doorstep. With the narrative power of fiction, Donald Miller takes you on a harrowing ride through the fire-filled skies over Berlin, Hanover, and Dresden and describes the terrible cost of bombing for the German people. Masters of the Air is the deeply personal story of the American bomber boys in World War II who brought the war to Hitler's doorstep. With the narrative power of fiction, Donald Miller takes you on a harrowing ride through the fire-filled skies over Berlin, Hanover, and Dresden and describes the terrible cost of bombing for the German people. Fighting at 25,000 feet in thin, freezing air that no warriors had ever encountered before, bomber crews battled new kinds of assaults on body and mind. Air combat was deadly but intermittent: periods of inactivity and anxiety were followed by short bursts of fire and fear. Unlike infantrymen, bomber boys slept on clean sheets, drank beer in local pubs, and danced to the swing music of Glenn Miller's Air Force band, which toured US air bases in England. But they had a much greater chance of dying than ground soldiers. The bomber crews were an elite group of warriors who were a microcosm of America—white America, anyway. The actor Jimmy Stewart was a bomber boy, and so was the “King of Hollywood,” Clark Gable. And the air war was filmed by Oscar-winning director William Wyler and covered by reporters like Andy Rooney and Walter Cronkite, all of whom flew combat missions with the men. The Anglo-American bombing campaign against Nazi Germany was the longest military campaign of World War II, a war within a war. Until Allied soldiers crossed into Germany in the final months of the war, it was the only battle fought inside the German homeland. Masters of the Air is “a stunning achievement” (David McCullough), “a fresh new account” (Walter Boyne, former director of the Smithsonian Air and Space Museum) of life in wartime England and in the German prison camps, where tens of thousands of airmen spent part of the war. It ends with a vivid description of the grisly hunger marches captured airmen were forced to make near the end of the war through the country their bombs destroyed. Drawn from recent interviews, oral histories, and American, British, German, and other archives, Masters of the Air is an authoritative, deeply moving account that “accurately and comprehensively” (Lt. Gen. Bernard E. Trainor, USMC (Ret.) and coauthor of *Cobra II*) tells of the world's first and only bomber war.

A Vast Machine Paul N. Edwards, 2013-02-08 The science behind global warming, and its history: how scientists learned to understand the atmosphere, to measure it, to trace its past, and to model its future. Global warming skeptics often fall back on the argument that the scientific case for global warming is all model predictions, nothing but simulation; they warn us that we need to wait for real data, “sound science.” In *A Vast Machine* Paul Edwards has news for these skeptics: without models, there are no data. Today, no collection of signals or observations—even from satellites, which can “see” the whole planet with a single instrument—becomes global in time and space without passing through a series of data models. Everything we know about the world's climate we know through models. Edwards offers an engaging and innovative history of how scientists learned to understand the atmosphere—to measure it, trace its past, and model its future.

It holds the secrets of former kings and saints and has been protected through time by the Hugen-Toblers'. The farming family's future is in the balance when tragic events unfold, and the tree is threatened. Corrado's passion is cooking. When he leaves Italy for London no one knows the unimaginable effect it will have on the tree and his family... In London, Margaret is trapped in a loveless marriage with an older man who has a dark secret. He constantly buys her shoes but cannot make love to her. Shifting between drab, grey England and vibrant, sunny Italy, Margaret and Corrado find themselves embarking on life changing journeys; little do they know how inconceivably important it will become when their lives collide and cultures clash. **Proteomics in Nephrology** Visith Thongboonkerd,2008 Since the publication of the first volume on proteomics in nephrology, methodologies and protocols for renal and urinary proteome analyses have been continuously improved, resulting in considerable progress towards clinical application. Proteomics not only contributes to a better understanding of the renal physiology and pathogenic mechanisms of kidney diseases, but also assists in the search for novel biomarkers for diagnostics and prognostics and supports the definition and development of new therapeutic targets and drugs for better therapeutic outcome. While the first volume focused mainly on an overview, technologies and methodologies, this volume highlights successful applications of proteomics to several kidney diseases, including acute kidney injury, nephrotic syndrome, diabetic nephropathy, renal allograft rejection, renal cell carcinoma, obstructive nephropathy, kidney stone disease, uremia, and others. Written by acclaimed experts in proteomics and nephrology, this book is an excellent resource of references for nephrologists, clinicians, pharmacists, other healthcare professionals, proteomists, physiologists, scientists, and trainees.

**Wing Ding** Gene T. Carson,2001-04-01 This is no run-of-the-mill WWII book. It is the exciting story of a cook in the Army Air Corps. It tells of his unauthorized move from the kitchen to life as an aerial gunner on a B-17 Flying Fortress in the unfriendly skies of Europe in 1943 to 1945. You will laugh cry and share in his life as he fights for his country while snatching moments of relief and love between missions. For those who were there it will bring back memories. For others, it will tell what it was like for grandfathers, fathers and uncles.

**Merchants of Doubt** Naomi Oreskes,Erik M. Conway,2011-10-03 The U.S. scientific community has long led the world in research on such areas as public health, environmental science, and issues affecting quality of life. These scientists have produced landmark studies on the dangers of DDT, tobacco smoke, acid rain, and global warming. But at the same time, a small yet potent subset of this community leads the world in vehement denial of these dangers. *Merchants of Doubt* tells the story of how a loose-knit group of high-level scientists and scientific advisers, with deep connections in politics and industry, ran effective campaigns to mislead the public and deny well-established scientific knowledge over four decades. Remarkably, the same individuals surface repeatedly-some of the same figures who have claimed that the science of global warming is not settled denied the truth of studies linking smoking to lung cancer, coal smoke to acid rain, and CFCs to the ozone hole. Doubt is our product, wrote one tobacco executive. These experts supplied it. Naomi Oreskes and Erik M. Conway, historians of science, roll back the rug on this dark corner of the American scientific community, showing how ideology and corporate interests, aided by a too-compliant media, have skewed public understanding of some of the most pressing issues of our era.
