The Chain Ted Genoways, 2014-10-14 A powerful and important work of investigative journalism that explores the runaway growth of the American meatpacking industry and its dangerous consequences "A worthy update to Upton Sinclair's *The Jungle* and a chilling indicator of how little has changed since that 1906 muckraking classic." — Mother Jones "I tore through this book. . . . Books like these are important: They track the journey of our thinking about food, adding evidence and offering guidance along the way." —Wall Street

Journal On the production line in American packing-houses, there is one cardinal rule: the chain never slows. Under pressure to increase supply, the supervisors of meat-processing plants have routinely accelerated the pace of conveyors, leading to inhumane conditions, increased accidents, and food of questionable, often dangerous quality. In *The Chain*, acclaimed journalist Ted Genoways uses the story of Hormel Foods and its most famous product, Spam—a recession-era staple—to probe the state of the meatpacking industry, from Minnesota to Iowa to Nebraska. Interviewing scores of line workers, union leaders, hog farmers, and local politicians and activists, Genoways reveals an industry pushed to its breaking point—while exposing alarming new trends, from sick or permanently disabled workers to conflict between small towns and immigrant labor. A searching exposé in the tradition of Upton Sinclair, Rachel Carson, and Eric Schlosser, *The Chain* is a mesmerizing story and an urgent warning about the hidden costs of the food we eat.

Hactivism and Cyberwars Tim Jordan, Paul Taylor, 2004-03-01 As global society becomes more and more dependent, politically and economically, on the flow of information, the power of those who can disrupt and manipulate that flow also increases. In *Hactivism and Cyberwars* Tim Jordan and Paul Taylor provide a detailed history of hacktivism's evolution from early hacking culture to its present day status as the radical face of online politics. They describe the ways in which hacktivism has re-appropriated hacking techniques to create an innovative new form of political protest. A full explanation is given of the different strands of hacktivism and the 'cyberwars' it has created, ranging from such avant garde groups as the Electronic Disturbance Theatre to more virtually focused groups labelled 'The Digitally Correct'. The full social and historical context of hacktivism is portrayed to take into account its position in terms of new social movements, direct action and its contribution to the globalization debate. This book provides an important corrective flip-side to mainstream accounts of E-commerce and broadens the conceptualization of the internet to take into full account the other side of the digital divide.

Highlights of Spanish Astrophysics V Jose M. Diego, Luis J. Goicoechea, J. Ignacio González-Serrano, Javier Gorgas, 2010-03-18

Astronomy is a scientific discipline that has developed a rapid and impressive growth in Spain. Thirty years ago, Spain occupied a purely anecdotal presence in the international context, but today it occupies the eighth position in the world in publication of astronomical articles, and, among other successes, owns and operates ninety per cent of the world's largest optical telescope GTC (Gran Telescopio Canarias). The Eighth Scientific Meeting of the Spanish Astronomical Society (Sociedad Española de Astronomía, SEA), held in Santander in July 7-11 2008, whose proceedings are in your hands, clearly shows the enthusiasm, motivation and quality of the present Spanish astronomical community. The event brought together 322 participants, who represent almost 50% of Spanish professional astronomers. This percentage, together with the continuously increasing, with respect to previous SEA meetings, number of oral presentations and poster contributions (179 and 127 respectively), confirms that the SEA conferences have become a point of reference

to assess the interests and achievements of astrophysical research in Spain. The most important and current topics of modern Astrophysics were taken into account at the preliminary meeting, as well as the number and quality of participants and their contributions, to select the invited speakers and oral contributors. We took a week to enjoy the high quality contributions submitted by Spanish astronomers to the Scientific Organizing Committee. The selection was difficult. We wish to acknowledge the gentle advice and commitment of the SOC members.

Culture Jam Kalle Lasn, 2000-11-07 America is no longer a country but a multimillion-dollar brand, says Kalle Lasn and his fellow culture jammers. The founder of Adbusters magazine, Lasn aims to stop the branding of America by changing the way information flows; the way institutions wield power; the way television stations are run; and the way the food, fashion, automobile, sports, music, and culture industries set agendas. With a courageous and compelling voice, Lasn deconstructs the advertising culture and our fixation on icons and brand names. And he shows how to organize resistance against the power trust that manages the brands by uncooling consumer items, by dermarketing fashions and celebrities, and by breaking the media trance of our TV-addicted age. A powerful manifesto by a leading media activist, Culture Jam lays the foundations for the most significant social movement of the early twenty-first century -- a movement that can change the world and the way we think and live.

Back to Black Kehinde Andrews, 2018-07-10 'Lucid, fluent and compelling' - Observer 'We need writers like Andrews ... These are truths we need to be hearing' - New Statesman Back to Black traces the long and eminent history of Black radical politics. Born out of resistance to slavery and colonialism, its rich past encompasses figures such as Marcus Garvey, Angela Davis, the Black Panthers and the Black Lives Matter activists of today. At its core it argues that racism is inexorably embedded in the fabric of society, and that it can never be overcome unless by enacting change outside of this suffocating system. Yet this Black radicalism has been diluted and moderated over time; wilfully misrepresented and caricatured by others; divested of its legacy, potency, and force. Kehinde Andrews explores the true roots of this tradition and connects the dots to today's struggles by showing what a renewed politics of Black radicalism might look like in the 21st century.

The Phoney Victory Peter Hitchens, 2018-09-06 Was World War II really the 'Good War'? In the years since the declaration of peace in 1945 many myths have sprung up around the conflict in the victorious nations. In this book, Peter Hitchens deconstructs the many fables which have become associated with the narrative of the 'Good War'. Whilst not criticising or doubting the need for war against Nazi Germany at some stage, Hitchens does query whether September 1939 was the right moment, or the independence of Poland the right issue. He points out that in the summer of 1939 Britain and France were wholly unprepared for a major European war and that this quickly became apparent in the conflict that ensued. He also rejects the retroactive claim that Britain went to war in 1939 to save the Jewish population of Europe. On the contrary, the beginning and intensification of war made it easier for Germany to begin the policy of mass murder in secret as well as closing most escape routes. In a provocative, but deeply-researched book, Hitchens questions the

most common assumptions surrounding World War II, turning on its head the myth of Britain's role in a 'Good War'.

Central Bank Governance and the Role of Nonfinancial Risk Management Ashraf Khan, 2016-02-25 This paper argues that nonfinancial risk management is an essential element of good governance of central banks. It provides a funnelled analysis, on the basis of selected literature, by (i) presenting an outline of central bank governance in general; (ii) zooming in on internal governance and organization issues of central banks; (iii) highlighting the main issues with nonfinancial risk management; and (iv) ending with recommendations for future work. It shows how attention for nonfinancial risk management has been growing, and how this has amplified the call for better governance of central banks. It stresses that in the area of nonfinancial risk management there are no crucial differences between commercial and central banks: both have people, processes, procedures, and structures. It highlights policy areas to be explored.

Media Spectacle Douglas Kellner, 2003-08-29 During the mid-1990s, the O.J. Simpson murder trial dominated the media in the United States and were circulated throughout the world via global communications networks. The case became a spectacle of race, gender, class and violence, bringing in elements of domestic melodrama, crime drama and legal drama. According to this fascinating new book, the Simpson case was just one example of what the author calls 'media spectacle' - a form of media culture that puts contemporary dreams, nightmares, fantasies and values on display. Through the analysis of several such media spectacles - including Elvis, The X Files, Michael Jordan, and the Bill Clinton sex scandals - Doug Kellner draws out important insights into media, journalism, the public sphere and politics in an era of new technologies. In this excellent follow up to his best selling Media Culture, Kellner's fascinating new volume delivers an informative read for students of sociology, culture and media.
