Mammon's Ecology Stan Goff, 2018-04-26 Proverbs 22:22 enjoins the reader, "Don't take advantage of the poor just because you can." Mammon's Ecology is a systematic investigation into the mysterious nature of modern money, which confronts us with the perplexing fact that, in the global economy as it is, we take advantage of the poor whether we want to or not. We destroy natural systems whether we want to or not. Ched Myers describes Mammon's Ecology as a "workbook" about "the secret life of money." Where Prather and others have shown that money is one of the perverse Powers described in Ephesians 6, Mammon's Ecology details precisely how money exercises this peculiar power and outlines suggestions for Christians who feel trapped in this complicity—not just as individuals, but as church. Mammon's Ecology is not a book about economics (which the author calls "the world's best antidote to insomnia"), but rather a book about the "deep ecology" of (post)modern power and injustice. Read individually or as a group, Mammon's Ecology will leave you unable to think about money the same way again.

AppleScript for the Internet Ethan Wilde, 1998 Applescript is estimated by the Georgia Institute of Technologies Annual World Wide Web survey, among others, as the second most common language for Internet CGI development after PERL. Indeed, after a period of being almost forgotten, a host of new developments in the Applescript world have brought AppleScript into the limelight once again. Products and free 'add-ons' like Marionette, from Allegiant technologies, allow AppleScripters to 'script the Internet', -- write simple applications that reach out into the network and search web sites, download files, even write their own web browsers. In addition, products like FaceSpan allow AppleScripters to add sophisticated application interfaces to their scripts, making it harder to differentiate between an AppleScript and a 'regular' application. These developments, combined with an estimated 5 million AppleScripts worldwide has prompted Apple Computer Inc. to start development again, and the first PowerPC native version of AppleScript, with a host of new features and a dramatic speed increase, has been announced for the middle of 1998.
