Figural Philology Adi Eyal, 2016-10-20 Though inspired by a Panofskyan legacy, this book diverges at certain points from Erwin Panofsky's declared objectives, and calls attention to several of aspects that were until now less accentuated in his intellectual reception. Insisting on the importance of iconology as a method for art history and the humanities in general, it shows how examining this promotes a cooperation between the history of art and the history of philosophy. It discusses whether Panofsky's method could be of use for general questions in the epistemology of the historical sciences that examine human works. Figural Philology also shows that Panofsky shares affinities with twentieth-century romance philology. A reading of Panofsky's work alongside the philological enterprise of Erich Auerbach and several other authors demonstrates that a proper appropriation of the philological impulse can provide a way out of the methodological antimony still hanging between hyper-formalist and hyper-theoretical approaches to the history of art.

Sermon Listening Enoh Šeba, 2021-06-30 Preaching is an integral part of every church service, and its purpose has always been to edify, encourage, and to emphasize the positive effects of coming together as a people of God. Yet there remains an inconsistency between the intended goals of preaching and the subjective perception of the listeners. In this homiletical study, Dr. Enoh Šeba provides fresh insight into the "turn to the listener" model and offers a theologically sustainable warrant mandate for the transformation of the preaching practice through a stronger involvement of the congregation. While grounding the research in the experience of Croatian Baptists, Dr. Šeba highlights practical suggestions for both listeners and preachers that are transferrable across contexts. This important work reveals that preaching can and should be transformed into a truly congregational practice that will affirmatively affect the dynamics of ecclesial life. This book will spark conversations and induce small-scale changes on a variety of levels while bridging the gap between preachers and their listeners.

Reconciliation in Conflict-Affected Communities Bert Jenkins, D. B. Subedi, Kathy Jenkins, 2017-10-29 This book focuses on the formal and informal reconciliation processes during conflict and post-conflict periods in various locations in the Asia-Pacific, and includes cases studies based on primary research conducted in countries such as Cambodia, Timor-Leste, Nepal, Sri Lanka, Pakistan, India, South Thailand, Bougainville and the Solomon Islands. It offers insights to further our understanding of the social and political processes of reconciliation in a region that has witnessed numerous armed conflicts, many of them perpetuating over generations. The book also draws lessons from the richness arising from diversity in terms of religious and cultural practices, social life, and forms of government and governance, and through the exploration of theories and practices of reconciliation in conflict and post-conflict contexts in the region. It provides useful reference material for researchers, academics, policy makers and students working in the areas of peacebuilding, conflict transformation, reconciliation, social cohesion, development, transitional justice and human rights in the Asia and Pacific region.

Global Perspectives of Nanoscience and Engineering Education Kurt Winkelmann, Bharat Bhushan, 2016-06-28 This book presents the perspectives of nanotechnology educators from around the world. Experts present the pressing challenges of teaching nanoscience and engineering to students in all levels of education, postsecondary and informal environments. The book was inspired by the 2014 NSF workshop for Nanoscience and Engineering Education. Since nanotechnology is a relatively new field, authors present recommendations for designing nanotechnology education programs. The chapters describe methods to teach specific topics, such as probe microscopy, size and scale, and nanomaterial safety, in classrooms around the world. Other chapters describe the ways that organizations like NNIN and the NISE Network have influenced informal nanotechnology education. Information technology plays a growing role in all types of education and several chapters are devoted to describing ways how educators can use online curricula for teaching nanotechnology to students from preschool to graduate school.

Guatemala, the Question of Genocide Elizabeth A. Oglesby, Diane M. Nelson, 2018-12-07 In Guatemala, it was called the trial of the century: the 2013 prosecution of former de facto head of state (1982-1983) General José Efraín Ríos Montt and his intelligence chief, General José Mauricio Rodríguez Sánchez, on charges of genocide and crimes against humanity against the Maya-Ixil people. Ríos Montt's seventeen-month reign was one of the bloodiest periods in Guatemala's history, with scorched earth massacres, the destruction of hundreds of Maya communities, and militarized resettlement of Mayas into model villages. Ríos Montt was convicted on all charges. Ten days later, a higher court vacated the verdict on dubious procedural grounds. Nevertheless, Guatemala's genocide trial, held in the domestic courts in the country where the crimes were committed, was precedent-setting. In this volume, Guatemalan and international scholars rigorously explore the complexities of the Guatemala experience and reflect upon the case's implications for understanding and prosecuting the category of genocide more broadly. Topics

include: the nexus of racism and counterinsurgency in explaining Guatemala's genocide; the politics of Maya collective memory; the intersections of gender, sexuality, and ethnicity in genocide; the decades-long interconnections of national and transnational justice processes that brought the case to trial; and the limits and contributions of tribunal justice. This book was originally published as a special issue of the Journal of Genocide Research.

Salt Mark Kurlansky, 2011-03-18 From the award-winning and bestselling author of Cod comes the dramatic, human story of a simple substance, an element almost as vital as water, that has created fortunes, provoked revolutions, directed economies and enlivened our recipes. Salt is common, easy to obtain and inexpensive. It is the stuff of kitchens and cooking. Yet trade routes were established, alliances built and empires secured – all for something that filled the oceans, bubbled up from springs, formed crusts in lake beds, and thickly veined a large part of the Earth's rock fairly close to the surface. From pre-history until just a century ago – when the mysteries of salt were revealed by modern chemistry and geology – no one knew that salt was virtually everywhere. Accordingly, it was one of the most sought-after commodities in human history. Even today, salt is a major industry. Canada, Kurlansky tells us, is the world's sixth largest salt producer, with salt works in Ontario playing a major role in satisfying the Americans' insatiable demand. As he did in his highly acclaimed Cod, Mark Kurlansky once again illuminates the big picture by focusing on one seemingly modest detail. In the process, the world is revealed as never before.
