Personal Influence Elihu Katz,Paul F. Lazarsfeld,Elmo Roper,2017-07-12 First published in 1955, *Personal Influence* reports the results of a pioneering study conducted in Decatur, Illinois, validating Paul Lazarsfeld's serendipitous discovery that messages from the media may be further mediated by informal opinion leaders who intercept, interpret, and diffuse what they see and hear to the personal networks in which they are embedded. This classic volume set the stage for all subsequent studies of the interaction of mass media and interpersonal influence in the making of everyday decisions in public affairs, fashion, movie-going, and consumer behavior. The contextualizing essay in Part One dwells on the surprising relevance of primary groups to the flow of mass communication. Peter Simonson of the University of Pittsburgh has written that *Personal Influence* was perhaps the most influential book in mass communication research of the postwar era, and it remains a signal text with historic significance and ongoing reverberations...more than any other single work, it solidified what came to be known as the dominant paradigm in the field, which later researchers were compelled either to cast off or build upon. In his introduction to this fiftieth-anniversary edition, Elihu Katz discusses the theory and methodology that underlie the Decatur study and evaluates the legacy of his coauthor and mentor, Paul F. Lazarsfeld.

Designing and Conducting Business Surveys Ger Snijkers, Gustav Haraldsen, Jacqui Jones, Diane Willimack, 2013-07-01 *Designing and Conducting Business Surveys* provides a coherent overview of the business survey process, from start to finish. It uniquely integrates an understanding of how businesses operate, a total survey error approach to data quality that focuses specifically on business surveys, and sound project management principles. The book brings together what is currently known about planning, designing, and conducting business surveys, with producing and disseminating statistics or other research results from the collected data. This knowledge draws upon a variety of disciplines such as survey methodology, organizational sciences, sociology, psychology, and statistical methods. The contents of the book formulate a comprehensive guide to scholarly material previously dispersed among books, journal articles, and conference papers. This book provides guidelines that will help the reader make educated trade-off decisions that minimize survey errors, costs, and response burden, while being attentive to survey data quality. Major topics include: • Determining the survey content, considering user needs, the business context, and total survey quality • Planning the survey as a project • Sampling frames, procedures, and methods • Questionnaire design and testing for self-administered paper, web, and mixed-mode surveys • Survey communication design to obtain responses and facilitate the business response process • Conducting and managing the survey using paradata and project management tools • Data processing, including capture, editing, and imputation, and dissemination of statistical outputs *Designing and Conducting Business Surveys* is an indispensable resource for anyone involved in designing and/or conducting business or organizational surveys at statistical institutes, central banks, survey organizations, etc.; producing statistics or other research results from business surveys at universities, research organizations, etc.; or using data produced from business surveys. The UNESCO Convention on the Protection and Promotion of the Diversity of Cultural Expressions Sabine Schorlemer, Peter-Tobias Stoll, 2012-05-23 The 2005 UNESCO Convention on Cultural Diversity is a landmark agreement in modern international law of culture. It reflects the diverse and pluralist understanding of culture, as well as its growing commercial dimension. Thirty diplomats, practitioners and academics explain and assess this important agreement in a commentary style. Article by article, the evolution, concepts, contents and implications of the Convention are analysed in depth and are complemented by valuable recommendations for implementation. In an unprecedented way, the book draws on the first-hand insights of negotiators and on the experience of practitioners in implementation, including international cooperation, and combines this with a good deal of critical academic reflection. It is a valuable guide for those who deal with the Convention and its implementation in governments, diplomacy, international organizations, cultural institutions and non-governmental organizations and will also serve as an important resource for academic work in such fields as international law and international relations.

Equity Trading Round-Up Robert A. Schwartz,John Aidan Byrne,Eileen Stempel,2020-11-16 This book examines the complexity of trading and the creation of liquidity. Titled after the Baruch College Financial Markets Conference, Equity Market Round-Up: Proposals for Strengthening the Markets, this book explores how regulation has a clear impact on market structure and, therefore, how market structure impacts efficient trading and capital formation. The following questions are analyzed: What are the liquidity strategies for pricing and interacting? Is liquidity any more available today for an illiquid stock than it was on the floor of the exchange 20 years ago? How do we cope with the dynamics of a continuous market? How can market structure be improved? What are the effects of high frequency trading? The Zicklin School of Business Financial Markets Series presents the insights emerging from a sequence of conferences hosted by the Zicklin School at Baruch College for industry professionals, regulators, and scholars. The transcripts from the conferences are edited for clarity, perspective and context; material and comments from subsequent interviews with the panelists and speakers are included for a complete thematic presentation. Each book is focused on a well delineated topic, but all deliver broad insights into the quality and efficiency of the U.S. equity markets and the dynamic forces that are changing them.

Follow-ups in Political Discourse Elda Weizman,Anita Fetzer,2015-08-15 This book explores the various forms and functions of follow-ups in a range of political speech events. Follow-ups are conceptualized as communicative acts, in and through which a prior communicative act is accepted, challenged, or otherwise negotiated by ratified participants in the exchange or by third parties. The broad view suggested here accommodates a large variation in the functions of follow-ups, e.g. positioning, third-party involvement, evaluation and argumentation, ratification, support, challenge and attendance to face wants. These variations are explored in a range of cultural environments, such as the UK, The Netherlands, Israel and France. Inter-cultural exchanges are studied through the analysis of diplomatic discourse, interpreting and cross-cultural comparison.

Computed Tomography in Head Injuries W. Lanksch,T. Grumme,E. Kazner,2012-12-06 The introduction of computed tomography in the diagnosis of pathological intracranial conditions has had considerable significance in cases of cranio cerebral injury. The decisive diagnostic advantage lies in the possibility of demonstrating both gross pathological change directly as well as secondary changes in normal brain structures. Computed tomography has proved its considerable worth, especially in evaluation of patients with craniocerebral injury and its sequelae. The capabilities of CT were quickly recognized and use of the technique spread rapidly. It is likely that CT will be available within a few years in all hospitals and clinics treating patients with craniocerebral injury. We believe it appropriate to present a detailed report on our experience with CT in 1800 cases of craniocerebral injury treated in the neurosurgical departments in Miinchen-GroBhadern and Berlin-Charlottenburg over a period of five years. Both acute posttraumatic complications and late sequelae are discussed extensively. A large number of illustrations is provided in order to facilitate the reader's introduction to CT diagnosis. The great interest in our conjoint study originally published in the German language, induced us to translate this book and to update the clinical material. We wish to thank the Stiftung Volkswagenwerk, the Senat of Berlin, the Ludwig-Maximilians-Universitat in Munich and the Freie Universitat of Berlin for the generous financial support which made this study possible.
