Personal Influence Elihu Katz, Paul F. Lazarsfeld, Elmo Roper, 2017-07-12 First published in 1955, *Personal Influence* reports the results of a pioneering study conducted in Decatur, Illinois, validating Paul Lazarsfeld's serendipitous discovery that messages from the media may be further mediated by informal opinion leaders who intercept, interpret, and diffuse what they see and hear to the personal networks in which they are embedded. This classic volume set the stage for all subsequent studies of the interaction of mass media and interpersonal influence in the making of everyday decisions in public affairs, fashion, movie-going, and consumer behavior. The contextualizing essay in Part One dwells on the surprising relevance of primary groups to the flow of mass communication. Peter Simonson of the University of Pittsburgh has written that *Personal Influence* was perhaps the most influential book in mass communication research of the postwar era, and it remains a signal text with historic significance and ongoing reverberations...more than any other single work, it solidified what came to be known as the dominant paradigm in the field, which later researchers were compelled either to cast off or build upon. In his introduction to this fiftieth-anniversary edition, Elihu Katz discusses the theory and methodology that underlie the Decatur study and evaluates the legacy of his coauthor and mentor, Paul F. Lazarsfeld.

Sales Closing For Dummies Tom Hopkins, 1998-04-30 Without the close, there is no sale. Pretty obvious, right? Yet, for many salespeople, closing is the most baffling and elusive part of the selling process. All too often, salespeople meet qualified clients and charm them with an eloquent presentation, only to see the sale mysteriously slip from between their fingers in the end. Which is sad when you consider all the hard work - the prospecting, preparation, planning, and practice - done for the sake of a moment of truth that never arrives. Fortunately, closing is an art that can be mastered, and now *Sales Closing For Dummies* shows you how. Packed with powerful principles that can help you become a top-producing salesperson, *Sales Closing For Dummies* is the ultimate guide to mastering that most mysterious part of the selling equation. Tom Hopkins, the legendary sales genius who, by age 30 was the nation's leading real-estate trainer, demystifies closing and shows what it takes to be a champion closer, including how to: Lead a sale without being pushy Read the signs of an interested potential buyer Use questioning methods that close sales, time and again Help clients feel good about their buying decisions Keep your clients' business and build their loyalty Build long-term relationships and watch your sales grow With the help of dozens of real-life examples from a wide cross section of industries, Tom shows why professional selling is about communication, not coercion. And he shares his considerable insight and experience on: Verbal and visual buying cues and how to recognize them Choosing the best location for closing Addressing concerns and creating a sense of urgency Time-tested tactics and strategies for ending customer procrastination, overcoming their fear, closing from a distance, and more The ten biggest closing mistakes and how to avoid them

Add-on selling and other ways of getting your clients to help you to build your business Featuring Tom's Hopkins' trademark "Red Flag" key points and situation scripts, this fun, easy-to-understand guide arms you with the hands-on tools and techniques you'll need to become a world-class closer.

Making Treaties Work Geir Ulfstein, 2007-04-12 There is an increasing focus on the need for national implementation of treaties. International law has traditionally left enforcement to the individual parties, but more and more treaties contain arrangements to induce States to comply with their commitments. Experts in this 2007 book examine three forms of such mechanisms: dispute settlement procedures in the form of international courts, non-compliance procedures of an administrative character, and enforcement of obligation by coercive means. Three fields are examined, namely human rights, international environmental law, and arms control and disarmament. These areas are in the forefront of the development of international law and deal with multilateral, rather than purely bilateral issues. Each part of the book on human rights, international environmental law and arms control contain a general introduction and case studies of the relevant treaties in the field. Will appeal widely to both generalists and specialists in international law and relations.

Rethinking History, Dictatorship and War Claus-Christian Szejnmann, 2009-11-10 The contributions in this collection deal with three of the most important themes of historical studies: the way history is or ought to be written, the nature of dictatorships and the nature of wars. The primary focus is on modern Europe and two defining experiences in the first half of the twentieth century: the two world wars and totalitarian dictatorships. This volume seeks to honour Professor Richard J. Overy, one of the great historians of his generation. Richard Overy has shaped our understanding of the main themes of this volume with the publication of over 20 books - most recently, *The Morbid Age: Britain Between the Wars* (2009), *The Times Complete History of the World* (2007), *The Dictators: Hitler's Germany and Stalin's Russia* (2004). In a substantial conversation that serves as an introduction, he reflects on some of the key issues of this book.

Teacher Development Over Time Tessa Woodward, Kathleen Graves, Donald Freeman, 2018-04-09 Teacher Development Over Time: Practical Activities for Language Teachers addresses teacher learning over the span of the careers of both novice and experienced teachers in English Language Teaching (ELT). It is designed to a) help novice ELT teachers to see the ways in which their learning may open up careers and communities over a professional life span; and b) support experienced ELT teachers in understanding where they are in their careers and how they may respond creatively to the challenges in that particular career phase. Part 1 synthesises the views of major research on teaching as it is experienced over time by teachers and discusses the implications. Readers engage with these ideas via the activities in Part 2, which encourage them to reflect on their career paths and on possible themes for future work. Part 3 describes ways teachers can set the Part 2 activities within a busy professional life, and Part 4 helps teachers to engage in further explorations on their own or with others. By merging a strong line of research with very practical tools for understanding professional development, Teacher Development Over Time proves to be an indispensable resource for language teachers as well as teacher educators and mentors.

Indigenous Peoples and Human Rights Ben Saul, 2016-06-30 Indigenous Peoples and Human Rights explores how general human rights standards have enabled, empowered and constrained indigenous peoples in claiming and defending their essential economic, social, cultural, civil and political interests. The book examines the jurisprudence of United Nations treaty committees and regional human rights bodies (in Africa, the Americas and Europe) that have interpreted and applied human rights standards to the special circumstances and experiences of indigenous peoples. It focuses particularly on how human rights laws since the 1960s have been drawn upon by indigenous activists and victims to protect their interests in ancestral lands, natural resources, culture and language. It further explores the right to indigenous self-determination; civil and political rights; economic, social and cultural rights (including labour rights); family and children's rights; violence and discrimination against indigenous peoples; and access to justice and remedies for violations. The book also discusses international and regional efforts to define who is 'indigenous' and who is a 'minority', and the legal relationship between indigenous individuals and their communities. The jurisprudence considered in this book significantly shaped the UN Declaration on the Rights of Indigenous Peoples 2007, which particularises and adapts general human rights standards for indigenous peoples. The book concludes by exploring future normative and implementation challenges in the light of the standard setting and consolidation, and political momentum, surrounding the UN Declaration and associated UN human rights mechanisms.
