SAS Graphics for Clinical Trials by Example Kriss Harris,Richann Watson,2020-11-25 Create industry-compliant graphs with this practical guide for professionals Analysis of clinical trial results is easier when the data is presented in a visual form. However, clinical graphs must conform to specific guidelines in order to satisfy regulatory agency requirements. If you are a programmer working in the health care and life sciences industry and you want to create straightforward, visually appealing graphs using SAS, then this book is designed specifically for you. Written by two experienced practitioners, the book explains why certain graphs are requested, gives the necessary code to create the graphs, and shows you how to create graphs from ADaM data sets modeled on real-world CDISC pilot study data. SAS Graphics for Clinical Trials by Example demonstrates step-by-step how to create both simple and complex graphs using Graph Template Language (GTL) and statistical graphics procedures, including the SGPLOT and SG PANEL procedures. You will learn how to generate commonly used plots such as Kaplan-Meier plots and multi-cell survival plots as well as special purpose graphs such as Venn diagrams and interactive graphs. Because your graph is only as good as the aesthetic appearance of the output, you will learn how to create a custom style, change attributes, and set output options. Whether you are just learning how to produce graphs or have been working with graphs for a while, this book is a must-have resource to solve even the most challenging clinical graph problems.

The Church in Ancient Society Henry Chadwick,2001 The Church in Ancient Society provides a full and enjoyable narrative history of the first six centuries of the Christian Church. Ancient Greek and Roman society had many gods and an addiction to astrology and divination. This introduction to the period traces the process by which Christianitychanged this and so provided a foundation for the modern world: the teaching of Jesus created a lasting community, which grew to command the allegiance of the Roman emperor. Christianity is discussed in relation to how it appeared to both Jews and pagans, and how its Christian doctrine and practicewere shaped in relation to Graeco-Roman culture and the Jewish matrix. Among the major figures discussed are Tertullian, Clement of Alexandria, Origen, Constantine, Julian the Apostate, Basil, Ambrose, and Augustine.Following a chronological approach, Henry Chadwick's clear exposition of important texts and theological debates in their historical context is unrivalled in detail. In particular, theological and ecclesial texts are examined in relation to the behaviour and beliefs of people who attended churchesand synagogues. Christians did not find agreement and unity easy and the author displays a distinctive concern for the factors - theological, personal, and political - which caused division in the church and prevented reconciliation. The emperors, however, began to foster unity for political reasonsand to choose monotheism. Finally, the Church captured the society.

Smoke From the Barrel John Arthur Cooper,2021-06-05 God it was boring! He was a cream man, in a cream and grey office, if he stood against the wall he was invisible. ‘I’m the invisible man, incredible how you can,

see right through me!’ But there were no Freddie Mercury frantic drums for Reg Moorcroft. Coffee four times a day, that was it. A piece of cake if it was someone's birthday! God it was exciting, dark hard blue metal, beautiful old chequered wood, powerful, life changing! But changes meant risk, excitement meant danger, the power of life and death came in a package labelled ‘fear.’ Still it was better than washing the car and cutting the lawn. It wasn’t supposed to be like that. He had to make amends, he couldn’t continue his life in front of a computer even if he did some good, he just felt like an on/off switch that could read. Get out now Reg, change your life, ‘Got to leave you all behind and face the truth!’
